## **Economics And Interdisciplinary Exchange:**

Economics and Interdisciplinary Exchange Guido Erreygers, 2001-04-12 This book documents exchanges between individual scientists and explores the boundaries between economics and neighbouring fields     **Law and Economics as Interdisciplinary Exchange** Péter Cserne, Magdalena Małecka, 2019-09-09 Law and Economics is an established field of research and arguably one of the few examples of a successful interdisciplinary project This book explores whether or to what extent that interdisciplinarity has indeed been a success It provides insights on the foundations and methods achievements and challenges of Law and Economics at a time when both the continuing criticism of academic economics and the growth of empirical legal studies raise questions about the identity and possible further developments of the project Through a combination of reflections on long term trends and detailed case studies contributors to this volume analyse the institutional and epistemic character of Law and Economics which develops through an exchange of concepts models and practices between economics and legal scholarship Inspired by insights from the philosophy of the social sciences the book shows how concepts travel between legal scholarship and economics and change meanings when applied elsewhere how economic theories and models inform and transform judicial practice and it addresses whether the transfers of knowledge between economics and law are symmetrical exchanges between the two disciplines     Sraffa and Modern Economics, Volume I Roberto Ciccone, Christian Gehrke, Gary Mongiovi, 2013-06-17 Analyzing Sraffa one of the key figures in the history of economics this book explores his legacy and the relevance of his thought for modern economics Written by an array of internationally respected contributors including Schefold Aspromourgos Nell and Kurz it is an invaluable tool for all those studying the history of economic thought     **A Dynamic Approach to Economic Theory** Ragnar Frisch, 2013-03 This book contains a set of notes prepared by Ragnar Frisch for a lecture series that he delivered at Yale University in 1930 complete with an introductory essay from Olav Bjerkholt and Duo Qin placing the notes in their historical context     *The Analysis of Linear Economic Systems* Christian Bidard, Guido Erreygers, 2020-11-25 Maurice Potron 1872 1942 a French Jesuit mathematician constructed and analyzed a highly original but virtually unknown economic model This book presents translated versions of all his economic writings preceded by a long introduction which sketches his life and environment based on extensive archival research and family documents Potron had no education in economics and almost no contact with the economists of his time His primary source of inspiration was the social doctrine of the Church which had been updated at the end of the nineteenth century Faced with the economic evils of his time he reacted by utilizing his talents as a mathematician and an engineer to invent and formalize a general disaggregated model in which production employment prices and wages are the main unknowns He introduced four basic principles or normative conditions sufficient production the right to rest justice in exchange and the right to live to define satisfactory regimes of production and labour on the one hand and of prices and wages on the other He studied the conditions for the existence of these regimes both on the quantity

side and the value side and he explored the way to implement them This book makes it clear that Potron was the first author to develop a full input output model to use the Perron Frobenius theorem in economics to state a duality result and to formulate the Hawkins Simon condition These are all techniques which now belong to the standard toolkit of economists This book will be of interest to Economics postgraduate students and researchers and will be essential reading for courses dealing with the history of mathematical economics in general and linear production theory in particular **Economic**
