marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

*Urbanization and Socio-Economic Development in Africa* Steve Kayizzi-Mugerwa,Abebe Shimeles,Nadège Désirée Yaméogo,2014-05-16 The main goal of this book is to put urbanization and its challenges squarely on Africa s development agenda Planned urbanization can improve living conditions for the majority help in the expansion of the middle class and create conditions for economic transformation However many African cities have developed haphazardly resulting in the decline of public services in slum proliferation and increases in poverty African cities thrive on activities characterized by easy entry and low productivity generally referred to as the informal sector Indeed today some urban dwellers are poorer than their cousins in the countryside In spite of reform attempts many governments have not been able to create an enabling environment with adequate infrastructure and institutions to sustain markets for easy exchange and production This study argues that with careful policies and planning the situation can be changed If the recent natural resource led economic boom that we have seen in many African countries is used for structural reforms and urban renewal African cities could become centers of economic opportunity The challenge

for African policymakers is to ensure that urban development is orderly and that the process is inclusive and emphasizes the protection of the environment hence green growth     Inner City Regeneration Robert K.
