Principles of Institutional and Evolutionary Political Economy Phillip Anthony O'Hara, 2022-08-29

This is the very first book to explicitly both detail the core general principles of institutional and evolutionary political economy and also apply the principles to current world problems such as the coronavirus crisis, climate change, corruption, AI, Robotics, policy, governance, money, and financial instability, terrorism, AIDS, HIV, and the nurturance gap. No other book has ever detailed explicitly such core principles and concepts nor ever applied them explicitly to numerous current major problems. The core general principles and concepts in this book, which are outlined and detailed, include historical specificity, hegemony, circular heterogeneous groups, contradiction, uncertainty, innovation, and policy, as well as a Presidential address to the Association for Evolutionary Economics (AFEE) on corruption. The structure of the book starts with two chapters on the principles of institutional and evolutionary political economy: firstly, their history, and secondly, a chapter on the contemporary nature of the principles and concepts. This is followed by nine chapters applying some of the core principles to current world problems such as the coronacrisis, climate change, corruption, AI, robotics, policy, money, financial instability, terrorism, HIV, AIDS, and the nurturance gap. The book finishes with a conclusion, a glossary of major terms, and an index. The author's principles are well established in the literature, and this book provides a detailed exposition of them and
