Few aspects of the history of modern empires are of such significance as their economics and politics. These factors are inextricably linked in many analyses, have generated extensive historiographical debate and are currently the subject of some of the freshest and liveliest scholarship. The articles and chapters which are brought together in this volume relate not only to the European colonial empires but also to the Napoleonic, Russian and Japanese empires. The collection is strongly comparative in approach with the articles arranged into thematic sections on the place of politics and economics in the rise and fall of modern empires, the causal relationship between modern empires and colonial global and metropolitan economic transformations and the technologies of rule which provided the frameworks through which colonial economies were managed and rights defined. The collection reflects new approaches as well as the continuing importance of issues addressed in an older historiography and the thematic arrangement produces useful juxtapositions of older and newer literatures. The substantial introduction explores the themes and identifies key historiographical trends in relation to each.

**The Tentacles of Progress** Daniel R. Headrick, 1988-03-10 This penetrating examination of a paradox of colonial rule shows how the massive transfers of technology including equipment, techniques and experts from the European imperial powers to their colonies in Asia and Africa resulted not in industrialization but in underdevelopment. Examining the most important technologies: shipping and railways, telegraphs and wireless, urban water supply and sewage disposal, economic botany and plantation agriculture, irrigation and mining and metallurgy, Headrick provides a new perspective on colonial economic history and reopens the debate on the roots of Asian and African underdevelopment.

*Imperialism and Economic Development in Sub-Saharan Africa* Simon Mollan, 2020-09-09 This book examines the economic and business history of Sudan, placing Sudan into the wider context of the impact of imperialism on economic development in sub-Saharan Africa. From the 1870s onwards, British interests in Sudan began to intensify as a consequence of the opening of the Suez Canal in 1869 and the overseas expansion of British business activities associated with the Scramble for Africa and the renewal of imperial impulses in the second half of the nineteenth century. Mollan shows the gradual economic embrace of imperialism in the years before 1899, the impact of imperialism on the economic development of colonial Sudan to 1956 and then the post-colonial economic legacy of imperialism into the 1970s. This text highlights how state-centred economic activity was developed in cooperation with British international business. Founded on an economic model that was debt-driven, capital-intensive and cash-crop oriented, the colonial economy of Sudan was centred on cotton growing. This model locked Sudan into a particular developmental path that in turn contributed to the nature and timing of decolonization and the consequent structures of dependency in the post-colonial era.

**Economic Relationships among States** Evan Luard, 1984-06-18  
**British Foreign Policy since 1870** Will Podmore, 2008-10-13 This book surveys Britain's foreign policy since 1870. Conventional accounts stress the rulers' benevolent rhetoric. I present the evidence that refutes this superficial liberal view. Britain's economy is the key to understanding its foreign policy; capitalism causes a conflict-ridden foreign policy. The rulers

focus has been on seizing profits from abroad for which they have sacrificed the welfare of the British people British governments Conservative Liberal and Labour alike have represented the tiny minority who own the means of production and have opposed the great majority who have to work for a living The ruling class's external focus has also damaged relations with other countries and helped to produce the two recurring types of war wars between rival empires and wars against national liberation

Megan Greene, 2016-11-03 Imperialism in the Modern World combines narrative primary and secondary sources and visual documents to examine global relations in the nineteenth and twentieth centuries The three co editors Professors Bowman Chiteji and Greene have taught for many years global history classes in a variety of institutions They wrote Imperialism in the Modern World to solve the problem of

allowing teachers to combine primary and secondary texts easily and systematically to follow major themes in global history some readers use primary materials exclusively Some focus on secondary arguments This book is more focused than other readers on the markets for those teachers who are offering more specialized world history courses one important trend in global history is away from simply trying to cover everything to teaching real connections in more chronologically and thematically focused courses The reader also provides a genuine diversity of global perspectives and invites students to study seriously world history from a critical framework Too many readers offer a smorgasbord approach to world history that leaves students dazed and confused This reader avoids that approach and will therefore solve many problems that teachers have in constructing and teaching world history courses at the introductory or upper division levels The reader will allow show students how to read historical documents through a hands on demonstration in the introduction The book also incorporates images as visual documents Finally the book conceives of global history in the widest possible terms it contains pieces on political diplomatic economic and military history to be sure but it also has selections on technology medicine women the environment social changes and cultural patterns Other readers can not match this text s breadth because they are chronologically and thematically so extended Managing the Business of Empire Peter Burroughs,A.J.

decolonization      The Cambridge History of the Napoleonic Wars: Volume 3, Experience, Culture and Memory Alan Forrest, Peter Hicks, 2022-06-09 Volume III of the Cambridge History of the Napoleonic Wars moves away from the battlefield to explore broader questions of society and culture. Leading scholars from around the globe show how the conflict left its mark on virtually every aspect of society. They reflect on the experience of the soldiers who fought in them, examining such matters as military morale, ideas of honour and masculinity, the treatment of wounds and the fate of prisoners of war, and they explore social issues such as the role of civilians, women's experience, trans-border encounters and the roots of armed resistance. They also demonstrate how the experience of war was inextricably linked to empire and the wider world. Individual chapters discuss the depiction of the Wars in literature and the arts and their lasting impact on European culture. The volume concludes by examining the memory of the Wars and their legacy for the nineteenth-century world.      The Great Powers, Imperialism and the German Problem 1865-1925 John Lowe, 2013-06-17 This is a lucid and well-structured text dealing with key issues in international affairs from the period of German unification to the aftermath of World War I. It provides excellent explanation and analysis of the central issues, clarifies a notoriously complex period of international history, updates traditional books in this field of 19th and 20th-century diplomatic international history, takes a thematic approach, leads students through the main events and reviews recent trends in historical debate and scholarship. Includes an annotated bibliography. Consideration of the German problem and the Balkan problem have taken on a new urgency and relevance with recent developments in Europe, and this book provides an excellent introduction to the subject.      *The Developing Countries and the World Economic Order* Lars Anell, Birgitta Nygren, 2013-11-07 *The Developing Countries and the World Economic Order* provides a lucid introduction to the debate about the developing countries and the quest for a New International Economic Order. The primary objective is to indicate some of the fundamental requirements that must be satisfied by an equitable world order. Since the present economic situation and demands of developing countries cannot be understood thoroughly without prior knowledge of how the present world order has evolved, Part I begins with a detailed historical survey. An account of economic development up to the Second World War and of the colonial heritage of the developing countries is followed by a description of the way in which the postwar world order came into being. Part II analyses more recent developments, including the central demands of developing countries and the background to these demands, and outlines a new perspective on the NIEO programme, with suggestions offered on how the developing countries could secure for themselves a larger share of the world's resources. A major theme of the book is that important changes in the world order take place irrespective of the recommendations adopted at international conferences.
