Twelve authors, each of them with his own distinct contribution to economics, make a step forward by reinterpreting major areas of micro and macroeconomics in line with modern evolutionary thinking. This volume offers a unified approach to economics that allows recent developments in various strands of Evolutionary Economics to be integrated and major positions of Neoclassical Economics to be reconsidered. The chapters on Evolutionary Macro Economics explore macro areas such as the division of labor and knowledge, technology, and institutions, population thinking, meso economics, techno-economic trajectories, and industrial sectors. By telescoping structure into time, they highlight the processes of structural change and co-evolution between technologies and institutions and provide a causal explanatory core for a modern evolutionary theory of economic growth and economic development. The chapters on Evolutionary Micro Economics offer insights into the knowledge-based theories of the firm and take up the issues of cognitive and behavioral routines. The contributions explore the processes of complex human choice, creativity, and adaptation in selective and path-dependent environments. The discussions make an essential contribution to the cognitive and behavioral foundations of a modern institutional economics. **Competition Law and Economics in Australia, Volume I** Julie Clarke, Allan Fels, Brent Fisse, Deborah Healey, Mel Marquis, John Middleton, Rhonda Smith, 2025-02-27. Entrepreneurship and Economic Progress Randall Holcombe,2007-01-24

Entrepreneurship is the engine of economic progress but mainstream economic models of economic growth tend to leave out the entrepreneurial elements of the economy This new book from Randall Holcombe begins by identifying areas in which evolutionary and Austrian approaches differ from the academic mainstream literature on economic growth before moving on to distinguish growth from progress The author then analyzes economic models of the firm based on the idea that it is entrepreneurship that drives economic progress The book should prove to be a natural successor to recent Routledge books by Frederic Sautet and David Harper

Epistemics of Development Economics Kofi Kissi Dompere,Manzur Ejaz,1995-08-22 The effective use of development economic theories in practice is limited the authors contend by the lack of explicit criterion for judging their scientific content The directional progress of critical research and teaching is also constrained by this deficiency This study advances a meta theory designed to assist in evaluating the scientific validity of theories in economic development and how these theories can be improved to assist social practice Using this model the study then examines existing theories dividing them into explanatory and prescriptive theories The explanatory theories include the stage based theories of Marx Schumpeter and Rostow and factor based theories including capital based human capital based and technology based theories The prescriptive theories include explanatory theory based prescriptions interventionist prescriptive theories and theories of economic planning In conclusion the authors contend that modern analysis of development economics is plagued with logical ills misleading notions and a weak theoretical structure that lacks scientific appeal Most of the theories except for those of Marx and Schumpeter neglect an analysis of the mechanism of change
