A Strategy for Technology Development for Semi-Arid Sub-Saharan Africa, Reforming agricultural markets in Africa Kherallah, Mylene, Delgado, Christopher L., Gabre-Madhin, Eleni Z., Minot, Nicholas, Johnson, Michael, 2002-01-01 The long term reduction of hunger and poverty in Sub Saharan Africa remains one of the great challenges for the international development community Eliminating hunger and promoting widespread growth in the region inevitably involves agriculture given its central role in the region's economies Over the past 20 years most African governments have carried out reforms to deregulate agricultural markets and reduce the role of state enterprises How much has the state actually withdrawn from agricultural markets Have well functioning private markets emerged How successful were these reforms in boosting agricultural production economic growth and the incomes of the rural poor What lessons can we learn from the reform process The authors of this book address these questions through an analysis based on an extensive review of experiences with reform focusing on three major agricultural markets fertilizer food crops and export crops They examine the historical rationales for intervention the factors contributing to reform the process of implementation and the impact of the reforms on farmers and consumers in Sub Saharan Africa The authors find that reforms have had many favorable results but that the impact has been muted by partial implementation and structural constraints They propose a new agenda for promoting the development of agricultural markets in Sub Saharan Africa identifying areas where governments can play a supportive role They argue that appropriate agricultural marketing policies and investments can improve livelihoods and the economic health of the region Adapting Social Science to the Changing Focus of International Agricultural Research The Political Economy of Economic Growth in Africa, 1960-2000 Simeon Ehui, John K. Lynam, I. Okike, 2004-01-01 B. J. Ndulu, 2008 Volume 2 of an analysis of the economic development of Sub Saharan Africa 1960 2000 An Economic Assessment of Banana Genetic Improvement and Innovation in the Lake Victoria Region of Uganda and Tanzania Melinda Smale, W. Tushemereirwe, 2007 This report assesses the impact on smallholder farmers of technology options developed by Uganda's National Agricultural Research Organization NARO to improve the productivity of the East African highland banana a major crop in Uganda and Tanzania The contributors survey an array of options either currently practiced or under development including improved soil fertility management practices conventional banana improvement and transgenic banana cultivars Their survey produces a number of findings with important implications for banana production a recently

developed banana hybrid adopted in Tanzania reduced the vulnerability of Tanzanian households to yield losses from pests and disease a strong network of social ties among farmers facilitates the spread of best soil fertility management practices through farmer to farmer exchange and transgenic bananas currently being developed could have pro poor impact Drawing on simulations of the economic benefits of these and other technology options the contributors conclude that the current strategy endorsed by NARO of combining conventional and transgenic approaches to mitigate the biotic pressures that cause major economic losses is essential for sustaining banana production systems. The report serves as a valuable baseline for researchers and others interested in measuring the effectiveness of crop improvement programs to Agriculture in Sub-Saharan Africa, 2007-01-01 Sub Saharan Africa is a critical development priority it has some of the world's poorest countries and during the past two decades the number of poor in the Region has doubled to 300 million more than 40 percent of the Region's population Africa remains behind on most of the Millennium Development Goals MDGs and is unlikely to reach them by 2015 With some of the world's poorest countries Africa is a development priority for the donor community A major drag on Africa's development is the underperformance of the critical agriculture sector which has been neglected both by donors and governments over the past two decades. The sector faces a variety of constraints that are particular to agriculture in Africa and make its development a complex challenge Poor governance and conflict in several countries further complicate matters IEG has assessed the development effectiveness of World Bank assistance in addressing constraints to agricultural development in Africa over the period of fiscal 1991 2006 Organic Agriculture in the **Tropics and Subtropics** Christian Hülsebusch, 2007 Advances in Integrated Soil Fertility Management in sub-Saharan Africa: Challenges and Opportunities Andre Bationo, Boaz Waswa, Job Kihara, Joseph Kimetu, 2007-10-16 Food insecurity is a fundamental challenge to human welfare and economic growth in Africa Low agricultural production leads to low incomes poor nutrition vulnerability to risk and threat and lack of empowerment This book offers a comprehensive synthesis of agricultural research and development experiences from sub Saharan Africa The text highlights practical lessons from the sub Saharan Africa region Agrobiodiversity Conservation and Economic Development Andreas Kontoleon, Unai Pascual, Melinda Smale, 2008-10-03 This book reflects current developments in the economics of agrobiodiversity and focuses its attention on the role agrobiodiversity can have for economic development As a new and rapidly expanding subfield at the interface of environmental ecological agricultural and development economics the editors and contributors to this volume provide a thorough structured and authoritative coverage of this field Topics covered include the economic modelling of agrobiodiversity policy and governance solutions for the conservation of biodiversity in agricultural landscapes contracts markets and valuation The authors include well known and respected academics and researchers who have a real policy perspective into the role of agrobiodiversity and economic development The book provides coherent and up to date coverage of the economics of in situ agrobiodiversity conservation which is to a large extent currently absent Though the material in the volume is primarily written for economists its content and style are highly relevant and accessible to ecologists and conservation biologists and to academics from other broad disciplines that are located within the areas of economics and ecology
