Economics of Antitrust ,2004 *Economics of Antitrust* Lawrence Wu,2004 **Antitrust Law and Mergers** David Hansen,2025-03-31 This book discusses the economic models and quantitative research involved in merger control forecasts and the relationship between antitrust law and economics Analyzing qualitative and quantitative models within forecasts of merger control the book applies the framework of antitrust law This book proposes that economic modelling econometrics application and juridical application of antitrust law go hand in hand Discussing the question of an economically rational application and enforcement of antitrust and merger control law the book covers both the basic concepts and theory behind economic model forecasts as well as the application of merger control law It also takes a closer look at legal control options for competition authorities when making a forecast decision and the associated problems of applying the law to this The book will be of interest to researchers in the field of antitrust law competition law economics and corporate law Knowledge Governance Reasserting the Public Interest,Anna Célia Castro,Rainer Kattel,2014-10-01 This book argues that the current international intellectual property rights regime led by the World Trade Organization WTO has evolved over the past three decades toward overemphasizing private interests and seriously hampering public interests in access to knowledge and innovation diffusion This approach concentrates on tangible and codified knowledge creation and diffusion in research and development R D that can be protected via patents and other intellectual property rules and regulations In terms of global policy initiatives however it is becoming increasingly clear that the WTO in particular is mostly a conflict resolution facility rather than a global governance body able to generate cooperation and steer international coordinated policy action At the same time rent extraction and profits streaming from legal hyperprotection have become pervasively important for firm strategies to compete in a globalized marketplace Knowledge Governance Reasserting the Public Interest offers a novel approach knowledge governance in order to move beyond the current regime Intellectual Property Law and Policy Volume 10 Hugh Hansen,2008-03-26 Hart Publishing is pleased to announce that it has recently become publisher of this prestigious and much valued work The 15th Annual volume in the series collects the presentations and discussion from the Annual Fordham IP Conference The contributions by leading world experts analyze the most pressing issues in copyright trademark and patent law as seen from the perspectives of the USA the EU Asia and WIPO This volume in common with its predecessors seeks to make a lasting contribution to discourse in IP law few of the chapters are merely descriptive and most raise questions of policy or discuss new developments Praise for the Fordham International Intellectual Property Conference This must be one of the most enjoyable and thought provoking conferences in the IP field The high quality of the speakers is matched by the intense audience led debates and challenges which follow Hugh Laddie formerly Mr Justice Laddie University College London and consultant to Rouse Co Willoughby Partners Faculty for this conference are always well known names well respected leaders in their fields speaking with a combination of candor and timeliness that is unrivaled by any other

Economics and Regulation in China Michael Faure, Guangdong Xu, 2013-10-15 This book from a top international group of scholars explores the ways in which economic tools can be used to improve the quality of regulation in general and legislative tools in particular As the role of law becomes increasingly important in China the question arises of how effective regulatory and legislative tools can be developed to accompany the Chinese evolution towards a welfare state China therefore provides a unique case study for scholars and policymakers interested in examining how regulation can play a role in promoting sustainable development Economics and Regulation in China goes beyond traditional economic analysis of law by focusing specifically on the question of how economic tools can guide the quality of legislation To this end the book centres in on three areas regulation as a tool of economic growth competition policy and environmental policy Not only are these three domains of great importance for China but they are also relevant for a broad scholarship interested in the economic analysis of law This volume contributes to discussions on how ex ante evaluation of legislative proposals and ex post analysis can increase the effectiveness and efficiency of regulation using economic tools offering insights that go beyond the particular case of China The analysis offered by this book makes it an invaluable resource for academics and policymakers alike *Economic Analysis in EU Competition Policy* Parcu, Pier L., Monti, Giorgio, Botta, Marco, 2021-12-10 This insightful book assesses emerging trends in the role of economic analysis in EU competition policy exploring how it has substantially increased in terms of both theories and methods **Public Procurement and the EU Competition Rules** Albert Sánchez Graells, 2011-01-29 Shortlisted for the 2012 Prix Vogel in Economic Law Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This new work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market In this process of convergence between competition and public procurement law the need for this joint study is clearly apparent As such the book asks whether competition law principles inform or condition public procurement rules and whether they are adequate to ensure that competition is not distorted in markets where public procurement is particularly significant The book moves away from the classical focus of public procurement on the activities of private actors developing instead an analytical framework for the appraisal of the market behaviour of the public buyer from a competition perspective The analysis is both legal and economic Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of the rules in competition and public procurement against a standard of the proper functioning of undistorted competition in the market for public procurement *The Political Economy of Regulation* , 1986 **Can Democracy and Capitalism Be Reconciled?** Scott C. Miller, 2025-10-10 In

Can Capitalism and Democracy Be Reconciled Sidney M Milkis and Scott C Miller have gathered a truly eminent cast of contributors to provide a multidisciplinary examination of the intersection of capitalist economic systems and democratic societies across time and space Featuring twenty four essays from scholars across nine different academic fields the volume interrogates the ideas history and policy behind these two principal elements of liberal society The volume begins with an introduction that explores the vibrant historical debate over whether democracy and capitalism can and should coexist in America and further analyzes the places where democracy and capitalism thrive and diverge and the systemic adjustments needed to sustain democratic capitalism in the future **The Oxford Handbook of Comparative Law** Mathias

Reimann,Reinhard Zimmermann,2006-11-16 The Oxford Handbook of Comparative Law provides a wide ranging and highly diverse critical survey of comparative law at the beginning of the twenty first century It summarizes and evaluates a discipline that is time honoured but not easily understood in all its dimensions In the current era of globalization this discipline is more relevant than ever both on the academic and on the practical level The Handbook is divided into three main sections Section I surveys how comparative law has developed and where it stands today in various parts of the world This includes not only traditional model jurisdictions such as France Germany and the United States but also other regions like Eastern Europe East Asia and Latin America Section II then discusses the major approaches to comparative law its methods goals and its relationship with other fields such as legal history economics and linguistics Finally section III deals with the status of comparative studies in over a dozen subject matter areas including the major categories of private economic public and criminal law The Handbook contains forty two chapters which are written by experts from around the world The aim of each chapter is to provide an accessible original and critical account of the current state of comparative law in its respective area which will help to shape the agenda in the years to come Each chapter also includes a short bibliography referencing the definitive works in the field **Nominations, September-December** United States. Congress. Senate. Committee on

Commerce,1973 Competition Law and Economic Inequality Jan Broulík,Katalin Cseres,2022-12-15 The gap between the rich and poor is widening across the globe This book explores whether this major societal challenge of our time can be addressed by the means of competition law The primary goal of today s competition law is to ensure that market power does not lead to an inefficient production of goods and services Nevertheless even such efficiency oriented curbing of market power may arguably contribute to the reduction of differences in how much people own and earn Furthermore many competition law regimes do take into account distributive considerations too The chapters investigate the relationship between competition law and economic inequality from philosophical historical and economic perspectives Their inquiries concern the conceptual foundations of competition law and doctrinal frameworks of individual jurisdictions as well as specific problems and markets As such the book provides a novel and comprehensive overview of whether and how competition law can contribute to more equality in both developed and developing countries The book is a must read for researchers public

officials judges and practitioners within the competition law community It will also appeal to anyone more broadly interested in issues of inequality and economic policy Antitrust Law & Economics Review Thomas M. Hiura,1988 Competition Policy and Patent Law under Uncertainty Geoffrey A. Manne,Joshua D. Wright,2011-06-13 The regulation of innovation and the optimal design of legal institutions in an environment of uncertainty are two of the most important policy challenges of the twenty first century Innovation is critical to economic growth Regulatory design decisions and in particular competition policy and intellectual property regimes can have profound consequences for economic growth However remarkably little is known about the relationship between innovation competition and regulatory policy Any legal regime must attempt to assess the trade offs associated with rules that will affect incentives to innovate allocative efficiency competition and freedom of economic actors to commercialize the fruits of their innovative labors The essays in this book approach this critical set of problems from an economic perspective relying on the tools of microeconomics quantitative analysis and comparative institutional analysis to explore and begin to provide answers to the myriad challenges facing policymakers *Brookings Papers on Economic Activity* Baily, Martin N., and Clifford M. Winston.,2016 **Building Chicago Economics** Robert Van Horn,Philip Mirowski,Thomas A. Stapleford,2011-10-17 Over the past forty years economists associated with the University of Chicago have won more than one third of the Nobel prizes awarded in their discipline and have been major influences on American public policy Building Chicago Economics presents the first collective attempt by social science historians to chart the rise and development of the Chicago School during the decades that followed the Second World War Drawing on new research in published and archival sources contributors examine the people institutions and ideas that established the foundations for the success of Chicago economics and thereby positioned it as a powerful and controversial force in American political and intellectual life **Law and Economics of Justice** Klaus Mathis,Avishalom Tor,2024-04-30 While previous volumes have examined specific issues and developments such as the coronavirus crisis or digital transformation from a law and economics perspective the anniversary edition returns to the methodological and philosophical fundament of the discipline of law and economics The present book aims to examine these foundations in general and in particular efficiency reciprocity and meritocracy and their relation to law and justice from an interdisciplinary perspective Efficiency Traditionally the economic analysis of law has been guided by the goal of efficiency Economists usually define efficiency as Pareto or Kaldor Hicks efficiency Any change that makes one member of society better off without anyone else being worse off is a Pareto improvement A change is a Kaldor Hicks improvement if the gainers value their gains more than the losers value their losses with only hypothetical compensation required Reciprocity Economists have traditionally based their models on the self interest hypothesis of homo oeconomicus In this model an individual maximises his own utility without being altruistic or jealous Behavioural economics challenges the self interest hypothesis In fact many people deviate from purely self interested behaviour There are also signs that considerations of fairness and mutual benefit are important in bilateral negotiations and

in the functioning of markets Meritocracy The concept of meritocracy refers to a system organisation or society in which people are selected and promoted to positions of success power and influence on the basis of their abilities and merits This means that an individual is able to climb the social ladder through hard work Moreover meritocracy directs the most talented people into the most functionally important positions thereby increasing a society s efficiency However the equalising function of meritocracy has been criticised Rather than reducing inequality meritocracy is seen as the cause of racial economic and social inequality
