Chalmers,1997-01-30 Against a broader backdrop of globalization and worldwide moves toward political democracy *The New Politics of Inequality in Latin America* examines the unfolding relationships among social change equity and the democratic representation of the poor in Latin America Recent Latin American governments have turned away from redistributive policies at the same time popular political

and social organizations have been generally weakened inequality has increased and the gap between rich and poor has grown Hanging in the balance is the consolidation and the quality of new or would be democracies this volume suggests that governments must find not just short term programmes to alleviate poverty but long term means to ensure the effective integration of the poor into political life The New Politics of Inequality in Latin America bridges the intellectual chasm between on the one hand studies of grassroots politics and on the other explorations of elite politics and formal institution building It will be of interest to students and scholars of contemporary Latin American politics and society and more generally in the vicissitudes of democracy and citizenship in the late twentieth century global system

Handbook of Bureaucracy Ali Farazmand, 2018-12-13 This encyclopedic reference text provides an analysis of the basic issues and major

aspects of bureaucracy bureaucratic politics and administrative theory public policy and public administration in historical and contemporary perspectives Examining theoretical philosophical and empirical interpretations as well as the intricate position of b Earthly Goods Fen Osler Hampson, Judith Reppy, 2018-09-05 Global environmental change raises profound moral issues with which society has only begun to grapple What does fairness mean in dividing responsibilities for problems of global warming between rich and poor nations Does the environment itself have moral standing and if so how should its conflicts with the interests of people who depend on the land for their livelihood be resolved How can the interests of the poor of indigenous peoples and of future generations be properly accommodated in a political discourse about environmental policy which is dominated by industrialized states This book extends the debate both within and across disciplines engaging philosophers geographers political scientists economists sociologists and environmental activists from four continents The essays address the role of science in global change and argue that western science does not provide morally disinterested solutions to environmental problems They discuss the role of state and substate actors in the international politics of the environment and then use accounts of actual negotiations to argue for the centrality of social justice in reaching desirable and equitable agreements They conclude that a framework for social justice under conditions of global environmental change must include community values and provide for participatory structures to arbitrate among competing interests
