Good Neighborhoods A Study Of In Town And Suburban Residential Environments:

Good Neighborhoods Sidney Brower, 2000-02-28 What makes a good neighborhood Can one neighborhood be good for all people Brower s study examines the variable image of the ideal residential area in contemporary and earlier writings from utopian visions and popular media to historical records and the findings of social science research Brower identifies four common ideal neighborhood types each providing a distinct and specific residential experience that suits a particular way of life He details the characteristics of each of these good neighborhoods and argues that their coexistence in a single urban environment is not only possible but desirable it creates a healthy variety of residential areas that together suit the needs and desires of different urban dwellers This absorbing and timely study will be of interest to scholars and professionals in urban studies urban design and planning environmental studies environment psychology and sociology Residential Satisfaction and Housing Policy Evolution Clinton Aigbavboa, Wellington Thwala, 2018-07-04 This book explores residential satisfaction and housing policy trends in developing nations by using subsidised low income housing examples in South Africa Ghana and Nigeria as case studies While there has been much documentation on the formation of residential satisfaction and the evolution of housing policy in developed nations relatively little has been written about these topics in developing nations This book provides readers with two major practical insights The first is focused on the theoretical underpinning of residential satisfaction and the formation of residential satisfaction in subsidised low income housing through the development of a conceptual framework while the second is focused on housing policy evolution and its trends in South Africa In this section of the book comparative overviews of public housing in two West African countries are provided with an emphasis on the philosophical basis for its development in these countries The central aim of the book is to provide readers with ideas on residential satisfaction formation and housing policy trends in South Africa *Fleeing the City* M. Thompson, 2009-08-31 This collection of essays explores the phenomenon of antiurbanism the antipathy fear and hatred of the city Antiurbanism has been a pervasive counter discourse to modernity and urbanization especially since the beginning of industrialism and the dawning of modern life Most of the attention on modernity has been focused on urbanization and its consequences But as the essays collected here demonstrate antiurbanism is an equally important reality as it can be seen as playing a crucial role in cultural identity in the formation of the self within the context of modernity as well as in the root of many forms of conservative politics and cultural movements *Creating Healthy Neighborhoods* Ann Forsyth, Emily Salomon, Laura Smead, 2017-10-24 Good housing Easy transit Food access Green spaces Gathering places Everybody wants to live in a healthy neighborhood Bridging the gap between research and practice it maps out ways for cities and towns to help their residents thrive in places designed for living well approaching health from every side physical mental and social *Between Bohemia and Suburbia* William J. Weston, 2019-04-16 This book identifies a distinctive kind of urban neighborhood that is on the rise throughout the USA the dense walkable mixed use bourgeois bohemian suburb or the

boburb It looks at case studies of areas to live in Louisville Kentucky Based on scores of interviews with college graduates backed by survey data and Census figures it provides a clear historical account of how these spaces arose Chapters depict analyze and compare the Highlands neighborhood with other Louisville boburbs contrasting them with the ephemeral bohemian quarters and the many suburban subdivisions The Highlands are also compared with five other boburbs around the USA Attention is given to the influence of transportation systems in shaping residential community and commercial spaces Deeper cultural reasons for choosing the boburbs or the suburbs are also explored including the political big sort between liberal and conservative places and Bourdieu s account of how the distinction between economic and cultural capital shapes how people choose to live where they live This book will appeal to those interested in the evolution and distinctions among urban neighborhoods It is ideal for academics and students within urban geography urban gentrification cities and population

Community Livability Fritz Wagner, Roger W. Caves, 2012-06-25 What is a livable community How do you design and develop one What does government at all levels need to do to support and nuture the cause of livable communities Using a blend of theory and practice experts in the field look at evidence from international state and local perspectives to explore what is meant by the term livable communities Chapters examine the various influencing factors such as the effect and

importance of transportation options alternatives to the elderly the significance of walkability as a factor in developing a livable and healthy community the importance of good open space providing for human activity and health restorative benefits the importance of coordinated land use and transportation planning and the relationship between livability and quality of life While much of the discussion of this topic is usually theoretical and abstract Wagner and Caves use case studies from North America Brazil and the United Kingdom to provide substantive examples of initiatives implemented across the world This book fills an important gap in the literature on livable communities and at the same time assists policy officials professionals and academics in their quest to develop livable communities

Good Neighborhoods Sidney Brower, 1996-11-30 What makes a good neighborhood Can one neighborhood be good for all people Brower s study examines the variable image of the ideal residential area in contemporary and earlier writings from utopian visions and popular media to historical records and the findings of social science research Brower identifies four common ideal neighborhood types each providing a distinct and specific residential experience that suits a particular way of life He details the characteristics of each of these good neighborhoods and argues that their coexistence in a single urban environment is not only possible but desirable it creates a healthy variety of residential areas that together suit the needs and desires of different urban dwellers This absorbing and timely study will be of interest to scholars and professionals in urban studies urban design and planning environmental studies environment psychology and sociology *Healthy Cities* Namir Khan, Willem H. Vanderburg, 2001 Modern cities can be designed to constitute a more supportive environment for a great many activities provide a more livable habitat and reduce the burden imposed on the biosphere They can be made healthier in terms of the definition by World Health Organization and more sustainable by means of new and emerging preventive approaches Healthy Cities focuses on those preventive approaches that can make cities healthier and more sustainable This book as well as the two companion volumes Sustainable Energy and Sustainable Production is the result of a twelve year research project carried out at the Center for Technology and Social Development at the University of Toronto The research findings led to the development of a new conceptual framework and strategy aimed at converting technological and economic growth into development that would gradually become more sustainable Urban Research Monitor , 1998

Complex Systems, Smart Territories and Mobility Patricia Sajous, Cyrille Bertelle, 2021-01-27 This book reflects the outcome of contribution by the plural community and of the interactions between disciplines With the mass of data available through Information and Communication Technologies ICT in an unprecedented quantity since the Human History it is now possible to access dimensions of knowledge that though not hidden could not be grasped in the same way in the past The question of how this information can be used for the benefit of institutional and economic actors to foster the development of a territory Tackling the issue from a resolutely interdisciplinary perspective the authors explore the theories and methods of complex systems in order to discuss how they can contribute in these new circumstances to territorial intelligence and to the development practices in which it is embodied This book illustrates how today s research explores the multiple facets of territorial systems in order to reproduce their richness It invites readers to learn about the challenges ideas results and advances present in this domain Planning Knowledge and Research Thomas W. Sanchez, 2017-12-22 The field of urban planning is far reaching in breadth and depth This is due to the complex nature of cities regions and development processes The knowledge domain of planning includes social economic technological environmental and political systems that continue

to evolve and expand rapidly Understanding these systems is an inter disciplinary endeavor at the scale of several academic fields The wide range of topics considered by planning educators and practitioners are often based on varying definitions of planning and modes of planning practice This unique book discusses various elements and contributions to urban planning research to show that seemingly disparate topics do in fact intersect and together contribute to ways of understanding urban planning The objective is not to discuss how to do research but rather to explore the context of urban planning scholarship with implications for the planning academy and planning practice This edited volume includes chapters contributed by a diverse range of planning scholars who consider the corpus of planning scholarship both historically and critically in their area of expertise It is essential reading for students of planning research and planning theory from around the world
