Geography and Enlightenment David N. Livingstone, Charles W. J. Withers, 1999-12-15 Geography and Enlightenment explores both the Enlightenment as a geographical phenomenon and the place of geography in the Enlightenment From wide ranging disciplinary and topical perspectives contributors consider the many ways in which the world of the long eighteenth century was brought to view and shaped through map and text exploration and argument within and across spatial and intellectual borders The first set of chapters charts the intellectual and geographical contexts in which Enlightenment ideas began to form including both the sites in which knowledge was created and discussed and the different means used to investigate the globe Detailed explorations of maps created during this period show how these new ways of representing the world and its peoples influenced conceptions of the nature and progress of human societies while studies of the travels of people and ideas reveal the influence of far flung places on Enlightenment science and scientific credibility The final set of chapters emphasizes the role of particular local contexts in Enlightenment thought Contributors are Michael T. Bravo, Paul Carter, Denis Cosgrove, Stephen Daniels, Matthew Edney, Anne Marie Claire Godlewska, Peter Gould, Michael Heffernan, David N. Livingstone, Dorinda Outram, Chris Philo, Roy Porter, Nicolaas

Rupke Susanne Seymour Charles Watkins and Charles W J Withers *Rivers of the World* James Penn, 2001-12-12 Rivers of the World vividly written and meticulously researched is a rich and thorough treatment of some 200 of the world's rivers. In this comprehensive treatment of the major rivers of the world, author James R. Penn's purpose is not just to feature geographic data but to tell a story of historical drama, poetic significance, and cultural relationships. The book shows glimpses of Chairman Mao boosting his image by swimming in the Yangtze, Indian middlemen residing on both sides of the Columbia River exacting tolls from travelers like Lewis and Clark, and near the Dordogne in southwest France, Paleolithic cave art, paintings, and designs in rock shelters and subterranean caverns, which are textbook examples of early human creativity and artistic impulse. In nearly 200 entries ranging from a few paragraphs to several pages, *Rivers of the World* covers all of the great rivers of the world, including the Nile, Niger, Amazon, and Mississippi, as well as smaller waterways that illustrate important themes or represent trends. The book includes bibliographies for each river. **Siberian Village** Bella Bychkova Jordan, 2001
