Gottfried Bohm Buildings Projects 1985:

Gottfried Bohm Elisabeth Böhm, 2001 Twenty projects by one of Germany's most important architects are presented here in photographs, illustrations and explanatory ground plans. Winner of the Pritzker Prize in 1986, Gottfried Bohm has built a diverse body of work that includes the multiuse WDR arcades in Cologne, the administrative headquarters of Züblin AG in Stuttgart, the Peek Cloppenburg store in Berlin and the Deutsche Bank and Philharmonie in Luxembourg. **Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott, 2004 A balance of sophistication and clarity in the writing, authoritative entries and strong cross referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world's most notable architecture. The contents feature major architects, firms and professional issues, buildings, styles and sites, the architecture of cities and countries, critics and historians, construction materials and planning topics, schools, movements and stylistic and theoretical terms. Entries include well-selected bibliographies and illustrations. Reference that rocks American Libraries May 2005 Concrete Construction Manual Friedbert Kind-Barkauskas, Bruno Kauhsen, Stefan Polónyi, Jörg Brandt, 2013-01-07 No detailed description available for Concrete Construction Manual **Architecture in the 20th Century** Udo Kultermann, 1993 A comprehensive guide to 20th-century architecture which places design in its historical, sociological and political context. Intended as a text but useful to professionals, it covers all periods, types and movements, including examples from the Third World and Eastern Europe. Four parts examine puristic tendencies, organic architecture, urban arch. **Architect** Ruth Peltason, Grace Ong-Yan, 2017-11-07 In this completely revised and up-to-date edition, the world's most accomplished architects Gehry, Pei, Meier, Nouvel, Piano and 37 more express their views on creativity, inspiration and legacy in this visually stunning one-of-a-kind collection. The Pritzker Prize is the most prestigious international prize for architecture. Architect includes all 42 recipients of the Pritzker Prize and captures in pictures and their own words their awe-inspiring achievements. Organized in reverse chronological order by laureate, each chapter features four to six of the architect's major works, including museums, libraries, hotels, places of worship and more. The text, culled from notebooks, interviews, articles and speeches, illuminates the architect's influences and inspirations, personal philosophy and aspirations for his own work and the future of architecture. The book includes more than 1000 stunning photographs, blueprints, sketches and CAD drawings. Architect offers an unprecedented view into the minds of some of the most creative thinkers, dreamers and builders of the last three decades and reveals that buildings are political, emotional and spiritual. **The Oxford Dictionary of Architecture** James Stevens Curl, Susan Wilson, 2015 With over 6 000 entries, this is the most authoritative dictionary of architectural history available. Architecture Series: Bibliography, 1989 Intelligence, Creativity and Fantasy Mário Ming Kong, Maria do Rosário Monteiro, Maria João Pereira Neto, 2019-09-30 The texts presented in Proportion, Harmonies and Identities PHI INTELLIGENCE CREATIVITY AND FANTASY were compiled with the intent to establish a multidisciplinary

Architecture Through Case Studies 1945 to 1990 Peter Blundell Jones, Eamonn Canniffe, 2012-08-21 Once again new interpretations are presented of some of the most famous architecture of the period Work by lesser known architects whose influence and role have been overlooked by conventional histories of the subject is discussed The case study structure allows each example to be discussed and used as a springboard to explore different theoretical approaches Filled with beautiful photographs plans and architect's drawings this is a clear and accessible discussion on a period of architecture that engages many questions still under debate in architecture today *Architectural Publications Index*, 2001 **New buildings and projects**, 2001 *Encyclopedia of Architecture, Aalto, Alvar to Concrete-General Principles* Joseph A. Wilkes, 1988-02-26

Sacred Buildings Rudolf Stegers, 2008-05-16 The building of religious structures represents a rare opportunity for the architect to concentrate on the creation of volume space and form Sacred architecture is far less determined than other building tasks by functional requirements norms and standards As a rule it is free to unfold as pure architecture Thus in design terms this building task offers enormous freedoms to the architect At the same time however the special atmospherics of sacred spaces call on the part of the architect for a highly sensitive treatment of religion and the relevant cultural and architectural traditions In a systematic section this volume introduces the design technical and planning fundamentals of building churches synagogues and mosques In its project section it also presents about seventy realized structures from the last three decades Drawing upon his in depth knowledge of the subject and his many years of publishing experience the author offers a valuable analysis of the conceptual and formal aspects that combine to create the religious impact of spaces e g the ground plan the shapes of the spaces the incidence of light and materiality *Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl* Avery Library, 1991 **Contemporary Architecture in Germany 1970-1996** Gerd Bruyn de, 1997-06

In recent years the importance of architecture in Germany has surged There is hardly any other country in the world where internationally acclaimed architects including Tadao Ando Richard Meier James Stirling and Norman Foster to name a few have erected so many major structures And in turn the buildings by German architects e g Gottfried Bohm Thomas Herzog Josef Paul Kleihues and Oswald Mathias Ungers are meriting increasing international attention With its selection of 50 buildings this handsome volume documents the development and diversity of contemporary architecture in Germany since 1970 It deliberately assumes the character of an introduction and therefore is aimed not only at a specialized readership but

also and above all at culturally interested readers at home and abroad Gerd de Bruyn opens the work with a sketch of German architectural history since 1945 and Gerd Zimmermann presents the special position of architecture in the former GDR The entries in the main section of this reference work are ordered alphabetically by architect and feature 50 specially chosen buildings each on a double page with photographs ground plans and a project description **Encyclopedia of 20th Century Architecture** R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries *Contemporary Architects* Ann Lee Morgan, Colin Naylor, 1987 To strengthen the contemporary focus of this volume we have added about forty architects and have deleted some whose activity ceased before World War II In making these decisions we have been assisted by an Advisory Board As in the first volume we have continued to define the word architect very broadly so as to include planners theorists structural engineers and landscape architects whose work seems to be central to the enterprise of creating habitable spaces in our day Editor's note **Avery Index to Architectural Periodicals** Avery Library, 1997

Designer Offices Otto Riewoldt, 1994 Examines 56 projects illustrated by some 230 color photos and bandw plans and drawings The projects reflect the increasing integration of work and leisure facilities the needs of a younger work force and the requirements of communication based office interiors Structures profiled include lofts banks financial centers and the headquarters of the Playboy Entertainment Group in Los Angeles A reference section includes architects biographies and addresses and details of project teams and suppliers Lacks a bibliography and an index Distributed in the US and Canada by Rizzoli through St Martins Press Annotation copyright by Book News Inc Portland OR Companion to Contemporary Architectural Thought Ben Farmer, Dr Hentie J Louw, Hentie Louw, Adrian Napper, 2003-09-02 Architecture has attracted increasing worldwide attention in recent years not only because of its cultural significance but also because of concern over the performance and resource implications of buildings 101 in depth articles by international scholars and practitioners bring the subject into focus by examining issues from various viewpoints Please contact your representative for a leaflet detailing full contents and contributors It also includes sample pages and several illustrations from the book
