World Cyndy Baskin, Norma Jean Profitt, 2019-11-20 *Spirituality and Social Justice* explores how critically informed spirituality can serve as an inspiration and a political force in the quest for social and ecological justice. Writing from various spiritual and religious worldviews including Indigenous, Islamic, Wicca, Witchcraft, Jewish, Buddhist, and Christian, the authors, practitioners, and academics of social work draw on lived experience, research, and literature to illuminate how relationships with spirit can orient ways of being and acting to build a more just society. In Part One, the authors foreground Indigenous spirituality as resistance and decolonization. Part Two examines the complex ethical and political dimensions of spirituality, including the ecological destruction of the Earth and the influence of contemporary neoliberalism. Lastly, Part Three explores spirituality in teaching and learning contexts, both inside and beyond the classroom. Engaging and well-written, *Spirituality and Social Justice* challenges the notion that practitioners must put aside their critical spirituality in teaching, learning, healing, and practice. Students, practitioners, and academics of social work and other helping professions will benefit from the unique insights into spirituality and religion and how they inform social justice activism. *Promoting Health and Well-being in Social Work Education* Beth R. Crisp, Liz Beddoe, 2013-10-18 Social work educators can play an important part in ensuring that the promotion of health and well-being is firmly on the social work agenda for service users as well as for students and educators. Nevertheless, this has not been a priority within social work education and presents a challenge which requires some rethinking in terms of curriculum, content, pedagogy, and how social workers respond to social problems. Furthermore, if the promotion of health and well-being is not considered a priority for social workers, this raises important questions about the role and relevance of social work in health and thus poses challenges to social work education both now and in the future. This book contains contributions from social work educators from Australia, America, Canada, New Zealand, and the UK. They reflect on how best to prepare students to put health and well-being to the forefront of practice, drawing on research on quality of life, subjective well-being, student well-being, community participation, and social connectedness, religion, and spirituality, mindful practices, trauma, and health inequalities. This book is an extended version of a special issue of *Social Work Education*. *The Ecosocial Transition of Societies* Aila-Leena Matthies, Kati Närhi, 2016-10-04 This groundbreaking book both explains and expands the growing debate on ecological environmental social work at the global level. In order to achieve this, the book strengthens the environmental paradigm in social work and social policy by undertaking further research on theoretical and conceptual clarification as well as distinct reflections on its practical directions. Divided into five parts, concepts, the impact of environmental crises, sustainable communities and lifestyles, food politics, and the profession in transition, this work's main objective is to place ecological social work as a part of the more comprehensive and interdisciplinary eco-social transition of societies towards sustainability, balancing economic and social development with the limited resources of the natural environment. By focussing on these five core concepts, it shows how social work and social policy contribute to this transition through having a research-based approach and orientation on solutions rather than
