*Coastal Conservation and Management* J. Pat Doody, 2012-12-06 Coastal Conservation and Management provides the reader with a synthesis of the range and variation of the main coastal formations and includes practical guidance on their management The book discusses all the main coastal habitats of importance for nature conservation saltmarsh shingle sand dune and seacliff as well as combinations of these habitats estuaries and other coastal wetlands It offers a comprehensive picture of both the soft sedimentary formations and those which are more resilient While these habitats have all been covered elsewhere in the literature no single volume gives such a wide ranging account An attempt is made throughout to provide the reader with a basic understanding of the importance and range of variation of each habitat and coastal ecosystem The principal issues are discussed and the key management options identified Some prescriptive suggestions are made though for the most part the reader is left to ponder the issues and their possible solutions

*Linking People, Place, and Policy* Stephen J. Walsh, Kelley A. Crews-Meyer, 2012-12-06 Linking People Place and Policy A GIScience Approach describes a breadth of research associated with the study of human environment interactions with particular emphasis on land use and land cover dynamics This book examines the social biophysical and geographical drivers of land use and land cover patterns and their dynamics which are interpreted within a policy relevant context Concepts tools and

techniques within Geographic Information Science serve as the unifying methodological framework in which landscapes in Thailand Ecuador Kenya Cambodia China Brazil Nepal and the United States are examined through analyses conducted using quantitative qualitative and image based techniques Linking People Place and Policy A GIScience Approach addresses a need for a comprehensive and rigorous treatment of GIScience for research and study within the context of human environment interactions The human dimensions research community land use and land cover change programs and human and landscape ecology communities among others are collectively viewing the landscape within a spatially explicit perspective where people are viewed as agents of landscape change that shape and are shaped by the landscape and where landscape form and function are assessed within a space time context This book articulates some of these challenges and opportunities

**Planning for Coastline Change** Gillian Cambers,1997      **Wildland Fire in Ecosystems** ,2005      **Integration of GIS and Remote Sensing** Victor Mesev,2008-03-11 In an age of unprecedented proliferation of data from disparate sources the urgency is to create efficient methodologies that can optimise data combinations and at the same time solve increasingly complex application problems Integration of GIS and Remote Sensing explores the tremendous potential that lies along the interface between GIS and remote sensing for activating interoperable databases and instigating information interchange It concentrates on the rigorous and meticulous aspects of analytical data matching and thematic compatibility the true roots of all branches of GIS remote sensing applications However closer harmonization is tempered by numerous technical and institutional issues including scale incompatibility measurement disparities and the inescapable notion that data from GIS and remote sensing essentially represent diametrically opposing conceptual views of reality The first part of the book defines and characterises GIS and remote sensing and presents the reader with an awareness of the many scale taxonomical and analytical problems when attempting integration The second part of the book moves on to demonstrate the benefits and costs of integration across a number of human and environmental applications This book is an invaluable reference for students and professionals dealing not only with GIS and remote sensing but also computer science civil engineering environmental science and urban planning within the academic governmental and commercial business sectors      **Conserving Plant Genetic Diversity in Protected Areas** José María Iriondo,Nigel Maxted,Mohammad Ehsan Dulloo,2008-01-01 This book comprises 7 chapters discussing the genetic diversity conservation in protected areas and the management of wild relatives Some topics covered were genetic reserve management location and design plant population monitoring methods for in situ conservation of wild relatives habitat recovery and ex situ measures      **The Zoological Record** ,2003      International Sheep and Wool Handbook D.
