## **Ecology Politics And Violent Conflict:**

Ecology, Politics and Violent Conflict Mohamed Suliman, 1999 Violent internal conflicts in more and more countries are ruining the lives of millions of people and undermining the ability of their governments to provide security and a tolerable economic existence The contributors to this book take a new view of the reasons for this grave development in Africa the Balkans Central Asia and elsewhere They question traditional analyses of conflict which rely primarily on ethnic religious and cultural explanations since these do not take account of the increasingly obvious link between the growing scarcity of renewable resources and violent conflict in developing countries Shortages of cropland fresh water woodfuel pasture and marine resources cannot be ignored At the same time this book argues that one cannot understand domestic conflicts simply in environmental terms For environmental scarcity functions in a society within a complex matrix of historically derived economic and political situations In particular an unequal social distribution of resources exacerbates scarcity and fuels popular conflict

**The A to Z of Environmentalism** Peter Dauvergne, 2009-09-02 Environmentalism involves hundreds of international environmental groups thousands of national groups and tens of thousands of local ones It also includes hundreds of international agreements hundreds of national environmental agencies and countless environmental sections in other organizations from those in multinational corporations to ones in regional and international organizations Such environmental concepts as

sustainable development the precautionary principle corporate social responsibility and eco labeling percolate from all of these sources Every year new ideas refinements policies institutions markets and problems continue to enter into environmental debates and discourses making it nearly impossible to keep abreast of the changes constantly taking place The A to Z of Environmentalism is a paperback edition of the Historical Dictionary of Environmentalism It strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This goal is accomplished through a chronology an introductory essay and over 300 cross referenced dictionary entries

**Coping with Global Environmental Change, Disasters and Security** Hans Günter Brauch, Úrsula Oswald Spring, Czeslaw Mesjasz, John Grin, Patricia Kameri-Mbote, Béchir Chourou, Pál Dunay, Joern Birkmann, 2011-02-03 Coping with Global Environmental Change Disasters and Security Threats Challenges Vulnerabilities and Risks reviews conceptual debates and case studies focusing on disasters and security threats challenges vulnerabilities and risks in Europe the Mediterranean and other regions It discusses social science concepts of vulnerability and risks global regional and national security challenges global warming floods desertification and drought as environmental security challenges water and food security challenges and vulnerabilities vulnerability mapping of environmental security challenges and risks contributions of remote sensing to the recognition of security risks mainstreaming early warning of conflicts and hazards and provides conceptual and policy conclusions

**Environmental Security** Rita Floyd, Richard A. Matthew, 2013 Economic development population growth and poor resource management have combined to alter the planet's natural environment in dramatic and alarming ways For over twenty years considerable research and debate have focused on clarifying or disputing linkages between various forms of environmental change and various understandings of security At one extreme lie sceptics who contend that the linkages are weak or even non-existent they are simply attempts to harness the resources of the security arena to an environmental agenda At the other extreme lie those who believe that these linkages may be the most important drivers of security in the 21st century indeed the very future of humankind may be at stake This book brings together contributions from a range of disciplines to present a critical and comprehensive overview of the research and debate linking environmental factors to security It provides a framework for representing and understanding key areas of intellectual convergence and disagreement clarifying achievements of the research as well as identifying its weaknesses and gaps Part I explores the various ways environmental change and security have been linked and provides principal critiques of this linkage Part II explores the linkage through analysis of key issue areas such as climate change energy water food population and development Finally the book concludes with a discussion of the value of this subfield of security studies and with some ideas about the questions it might profitably address in the future This volume is the first to provide a comprehensive overview of the field With contributions from around the world it combines established and emerging scholars to offer a platform for the next wave of

research and policy activity It is invaluable for both students and practitioners interested in international relations environment studies and human geography *Handbook of Cultural Geography* Kay Anderson,2003 Presenting a state of the art assessment of the key questions informing cultural geography in the 21st century this handbook emphasises the intellectual diversity of the discipline and is cross referenced throughout **Climate Wars** Harald Welzer,2015-02-03 Struggles over drinking water new outbreaks of mass violence ethnic cleansing civil wars in the earth s poorest countries endless flows of refugees these are the new conflicts and forces shaping the world of the 21st century They no longer hinge on ideological rivalries between great powers but rather on issues of class religion and resources The genocides of the last century have taught us how quickly social problems can spill over into radical and deadly solutions Rich countries are already developing strategies to garner resources and keep climate refugees at bay In this major book Harald Welzer shows how climate change and violence go hand in hand Climate change has far reaching consequences for the living conditions of peoples around the world inhabitable spaces shrink scarce resources become scarcer injustices grow deeper not only between North and South but also between generations storing up material for new social tensions and giving rise to violent conflicts civil wars and massive refugee flows Climate change poses major new challenges in terms of security responsibility and justice but as Welzer makes disturbingly clear very little is being done to confront them The paperback edition includes a new Preface that brings the book up to date and addresses the most recent developments and trends Rights Resources and Rural Development Christo Fabricius,Eddie Koch,Stephen Turner,Hector Magome,2013-01-11 Community based natural resource management CBNRM is an approach that offers multiple related benefits securing rural livelihoods ensuring careful conservation and management of biodiversity and other resources and empowering communities to manage these resources sustainably Recently however the CBNRM concept has attracted criticism for failing in its promise of delivering significant local improvements and conserving biodiversity in some contexts This book identifies the flaws in its application which often have been swept under the carpet by those involved in the initiatives The authors analyse them and propose remedies for specific circumstances based on the lessons learned from CBNRM experience in southern Africa over more than a decade The result is essential reading for all researchers observers and practitioners who have focused on CBNRM in sustainable development programmes as a means to overcome poverty and conserve ecosystems in various parts of the globe It is a vital tool in improving their methods and performance In addition academics students and policy makers in natural resource management resource economics resource governance and rural development will find it a very valuable and instructive resource **Research Handbook on Law and Diplomacy** Margaret E. McGuinness,David P. Stewart,2022-12-08 This timely Research Handbook examines the dynamic and interdependent relationship between law and diplomacy in the contemporary international system Through accounts of the actual practice of international law and diplomacy it provides insights into how international law and relations operate and examines the complex relationship **Peacekeeping and**

**Conflict Resolution** Oliver Ramsbotham, Tom Woodhouse, 2013-07-04 Conflict resolution theory has become relevant to the various challenges faced by the United Nations peacekeeping forces as efforts are made to learn from the traumatic and devastating impact of the many civil wars that have erupted in the 1990s This work analyzes the theory

**Peace Studies in the Chinese Century** Alan Hunter, 2017-05-15 The rise of China is probably the most significant shift in the international power structure this generation China's leaders have so far committed themselves to a peaceful rising but serious tensions are inevitable in such a rapid transformation Dialogue on peace and conflict issues at this juncture is invaluable This volume focuses on developments in peace research in a number of key countries and in particular introduces for the first time in English the perspectives of a number of Chinese scholars who have started to engage with peace studies agendas Comparisons are drawn from the UK USA Mexico Japan and South Africa to provide a better understanding of the debates on a global level and the discussion among different countries Some of the outstanding peace researchers who contribute to the volume include Andrew Rigby Johan Galtung who is generally considered to have founded the discipline in its current form and Ursula Oswald The volume is a valuable and unique contribution to the contemporary peace research agenda and will appeal to an interdisciplinary readership in peace studies sociology politics international relations religious studies philosophy and Asian studies

*The NGO Factor in Africa* Maurice N. Amutabi, 2013-09-13 The book breaks new ground in understanding the role of Non Governmental Organizations NGOs in Africa The book historicizes NGOs using the Rockefeller Foundation as a case study looking at its tripartite paradoxical roles as an agent of colonialism globalization and development underdevelopment It deploys interdisciplinary devices to show how the RF projects have engaged in marginalization patronage and othering of African values and customs and the ensuing controversies Using globalization postmodern and postcolonial theories the book deconstructs the long held myths about NGO inviolability and opens ground for understanding their strengths It interrogates sites of contestation apprehension and possibilities that the RF has produced Using RF projects it looks at structures of hegemony race power class and gender that the RF has created The book illustrates the extent to which the RF has been instrumental in spreading capitalism imperialism in economic political cultural and social realms through globalization It desists from the grand narrative approach that has dominated African history in the past but instead gives agency and voice to those that have previously been marginalized

**Contemporary Security Studies** Alan Collins, 2016 This book offers an introduction to Security Studies It features an impressive breadth and depth of coverage of the different theoretical approaches to the study of security and the ever evolving range of issues that dominate the security agenda in the 21st Century

**Environmental Politics** Shannon O'Lear, 2010-08-19 Shannon O Lear brings a geographer's perspective to environmental politics The book considers issues of climate change energy food security toxins waste and resource conflict to explore how political economic ideological and military power have contributed to the generation of environmental issues and the formation of dominant narratives about them The book encourages the reader to think critically

about the power dynamics that shape and limit how we think about environmental issues and to expand the reader's understanding of why it matters that these issues are discussed at particular spatial scales. Applying a geographer's sense of scale and power leads to a better understanding of the complexity of environmental issues and will help formulate mitigation and adaptation strategies. The book will appeal mainly to advanced students and researchers from a geography background but also to social and political scientists who wish to look at the topic from this different perspective.

WELFARE ECONOMICS AND SUSTAINABLE DEVELOPMENT - Volume II Yew-Kwang Ng, Ian Wills, 2009-11-17. Welfare Economics and Sustainable Development theme is a component of Encyclopedia of Development and Economic Sciences in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty-one Encyclopedias. This theme introduces welfare economics and sustainable development in four topics dealing with four important issues to be considered in implementing sustainable development. These are the use of ethics and discounting and economic growth models in balancing the interests of future generations against those of the present; the advantages and limitations of national accounting methodologies as means of evaluating sustainability; the international dimensions of sustainable development arising out of environmental and economic linkages among nations; and the nature of institutions required to promote sustainable development. These two volumes are aimed at the following five major target audiences: University and College students; Educators; Professional practitioners; Research personnel; and Policy analysts, managers, and decision makers, and NGOs.

*The Darfur Conflict* Osman Suliman, 2011-01-05. Although it is often simplified as an ethnic conflict in popular media, the current crisis in Darfur can only be superficially defined across ethnic lines. This project diverges from previous studies by addressing how the underlying social and environmental influences such as changing resource dynamics, expanding poverty, lack of infrastructure, and political corruption have brought the crisis to a head. Analyzing the interplay of these factors will yield valuable insights as to how a concerned international community can both end the tragic genocide and address the underlying injustices that engendered it.

Gender and International Security Laura Sjoberg, 2009-10-16. This book defines the relationship between gender and international security, analyzing and critiquing international security theory and practice from a gendered perspective. Gender issues have an important place in the international security landscape but have been neglected both in the theory and practice of international security. The passage and implementation of UN Security Council Resolution 1325 on Security Council operations, the integration of gender concerns into peacekeeping, the management of refugees, post-conflict disarmament and reintegration, and protection for non-combatants in times of war shows the increasing importance of gender sensitivity for actors on all fronts in global security. This book aims to improve the quality and quantity of conversations between feminist security studies and security studies more generally in order to demonstrate the importance of gender analysis to the study of international security and to expand the feminist research program in Security Studies. The chapters included in this book not only challenge the assumed irrelevance of gender, they

argue that gender is not a subsection of security studies to be compartmentalized or briefly considered as a side issue. Rather, the contributors argue that gender is conceptually, empirically, and normatively essential to studying international security. They do so by critiquing and reconstructing key concepts and theories in international security by looking for the increasingly complex roles women play as security actors and by looking at various contemporary security issues through gendered lenses. Together, these chapters make the case that accurate, rigorous, and ethical scholarship of international security cannot be produced without taking account of women's presence in or the gendering of world politics. This book will be of interest to all students of critical security studies, gender studies, and International Relations in general.

Laura Sjöberg is Assistant Professor of Political Science at the University of Florida. She has a Ph.D. in International Relations and Gender Studies from the University of Southern California and is the author of *Gender Justice and the Wars in Iraq* (2006) and, with Caron Gentry, *Mothers, Monsters, Whores: Women's Violence in Global Politics* (2007).

**Agriculture, Human Security, and Peace**

M. Taeb, A. H. Zakri, 2008. Covering more than the conventional food-only role of agriculture, the international contributors to this volume detail how the solution to agricultural problems can lead to general socioeconomic and political development in impoverished countries.
