**A Financial Conditions Index for South Africa** Mr.Nombulelo Gumata, Nir Klein, Mr.Eliphaz Ndou, 2012-08-01 The main purpose of this paper is to construct a financial conditions index FCI for South Africa The analysis extracts the index by applying two alternative approaches principal component analysis and Kalman filter which identify an unobservable common factor from a group of external and domestic financial indicators The alternative estimated FCIs which share a similar trajectory over time seem to have a powerful predictive information for the near term GDP growth up to four quarters and they outperform the South African Reserve Bank s SARB leading indicator as well as individual financial variables Their recent dynamics suggest that following a strong recovery in late 2009 and 2010 reflecting in part domestic factors such as systematic reductions in the policy rate the rebound in real economic activity and a benign inflationary environment the financial conditions have deteriorated in recent months though not as sharply as in end 2008 Given their relatively high predictive power regarding GDP growth a further deterioration may imply that economic activity is likely to slow in the period ahead
