The Knowledge Economy and Lifelong Learning D.W. Livingstone,David Guile,2012-09-07 This book presents some of the most trenchant critical analyses of the widespread claims for the recent emergence of a knowledge economy and the attendant need for greater lifelong learning The book contains two sections first general critiques of the limits of current notions of a knowledge economy and required adult learning in terms of historical comparisons socio political construction and current empirical evidence secondly specific challenges to presumed relations between work requirements and learning through case studies in diverse current workplaces that document richer learning processes than knowledge economy advocates intimate Many of the leading authors in the field are represented There are no other books to date that both critically assess the limits of the notion of the knowledge economy and examine closely the relation of workplace restructuring to lifelong learning beyond the confines of formal higher education and related educational policies This reader provides a distinctive overview for future studies of relations between work and learning in contemporary societies beyond caricatures of the knowledge economy The book should be of interest to students following undergraduate or postgraduate courses in most social sciences and education business and labour studies departments as well as to policy makers and the general public concerned about economic change and lifelong learning issues D W
