**The Political Economy of Racism** Melvin Leiman, 2011-02-02 An intense and compact resource for understanding how the political economy of racism evolved in the United States Science Society Racism is about more than individual prejudice And it is hardly the relic of a past era This scholarly readable and provocative book shows how the persistence of racism in America relies on the changing interests of those who hold the real power in society and use every possible means to hold onto it

Racial Classification and History E. Nathaniel Gates, 1997 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source Authoritative commentary The series editor has put together a balanced selection of the most significant works accompanied by expert commentary A general introduction gives important background information and outlines fundamental issues current scholarship and

scholarly controversies Introductions to individual volumes put the articles in context and draw attention to germinal ideas and major shifts in the field After reading the material even a beginning student will have an excellent grasp of the basics of the subject Also available individually by volume 1 The Concept of Race in Natural and Social Science 0 8153 2600 9 288 pages 2 Cultural and Literary Critiques of the Concepts of Race 0 8153 2601 7 3 Racial Classification and History 0 8153 2602 5 4 The Judicial Isolation of the Racially Oppressed 0 8153 2599 1      **The Rise and Fall of the White Republic** Alexander Saxton, 2003 Saxton asks why white racism remained an ideological force in America long after the need to justify slavery and Western conquest had disappeared      **Racism and Anti-Racism Today** Amanuel Elias, 2024-05-02 Acknowledging efforts to dismantle racism at multiple levels this book examines racism and anti racism as interconnected rather than isolated issues proposing a framework for effective anti racist policy and practice      **African American Settlements in West Africa** A. Beyan, 2005-09-16 John Brown Russwurm and African American Settlement in West Africa examines Russwurm s intellectual accomplishments and significant contributions to the black civil rights movement in America from 1826 1829 and more significantly explores the essential characteristics that distinguished his thoughts and endeavours from other black leaders in America Liberia and Maryland in Liberia Not surprisingly the most controversial of Russwurm s ideas was his unwavering support of the American Colonization Society ACS and the Maryland State Colonization Society MSCS two organizations that most civil rights activists found racist and pro slavery Beyan probes the social and intellectual sources underlying motives and the legacies of Russwurm s thoughts and endeavours all in an attempt to dissect why Russwurm acted and made the choices that he did      **Critical Pedagogy and Race** Zeus Leonardo, 2009-02-09 Critical Pedagogy and Race argues that a rigorous engagement with race is a priority for educators concerned with equality in schools and in society A landmark collection arguing that engaging with race at both conceptual and practical levels is a priority for educators Builds a stronger engagement of race based analysis in the field of critical pedagogy Brings together a melange of theories on race such as Afro centric Latino based and postcolonial perspectives Includes historical studies and social justice ideas on activism in education Questions popular concepts such as white privilege color blind perspectives and race neutral pedagogies      *Race, Work, and Family in the Lives of African Americans* Marlese Durr, Shirley A. Hill, 2006-05-25 Family and work are major integrally related dimensions of social life which affect the well being and success of family members As social institutions family and work are also avenues where social inequality may be understood as a major element in the distribution of social cultural and economic resources and sites where inequality is perpetuated negotiated and contested In this book editors Durr and Hill focus on African Americans navigating the terrain of race work and family and examining persistent barriers to equality and ways in which Blacks have sought to become an integral part of the American economy      **Uprooting Racism - 4th Edition** Paul Kivel, 2017-08-28 In 2016 the president elect of the United States openly called for segregation and deportation based on race and religion Meanwhile

inequalities in education housing health care and the job market continue to prevail while increased insecurity and fear have led to an epidemic of scapegoating and harassment of people of color Yet recent polls show that only thirty one percent of white people in the United States believe racism is a major societal problem at the same time resistance is strong as highlighted by indigenous struggles for land and sovereignty and the Movement for Black Lives Completely revised and updated this fourth edition of *Uprooting Racism* offers a framework around neoliberalism and interpersonal institutional and cultural racism along with stories of resistance and white solidarity It provides practical tools and advice on how white people can work as allies for racial justice engaging the reader through questions exercises and suggestions for action and includes a wealth of information about specific cultural groups such as Muslims people with mixed heritage Native Americans Jews recent immigrants Asian Americans and Latino as Previous editions of *Uprooting Racism* have sold more than 50 000 copies This accessible personal supportive and practical guide is ideal for students community activists teachers youth workers and anyone interested in issues of diversity multiculturalism and social justice Paul Kivel is an award winning author and an accomplished trainer and speaker He has been a social justice activist a nationally and internationally recognized anti racism educator and an innovative leader in violence prevention for over forty years

Routledge Handbook of Modern Economic History Robert Whaples, Randall E. Parker, 2013. The aim of *The Handbook of Modern Economic History* will be to introduce readers to the key approaches and findings of economic historians who study the modern world. Modern economic history blends two approaches: Cliometrics, which focuses on measuring economic variables and explicitly testing theories about the historical performance and development of the economy as exemplified by the approach of Robert Fogel; and the New Institutional Economics, which focuses on how social, cultural, legal, and organizational norms and rules shape.

**Employment & Unemployment in the Black & Hispanic Communities in the United States**, 1983. *Subterranean Fire* Sharon Smith, 2018-07-17. A concise, well-written history of U.S. working class struggle and radicalism from the author of *Women and Socialism: Class, Race, and Capital Solidarity*. Smith explores how the connection between the U.S. labor movement and the Democratic Party, with its extensive corporate ties, has repeatedly held back working class struggles. And she closely examines the role of the labor movement in the 2004 presidential election, tracing the shrinking electoral influence of organized labor and the failure of labor management cooperation, business unionism, and reliance on the Democrats to deliver any real gains. Sharon Smith brings that history to life once again, blasting through the myths of the working class that Trump-era narratives cling to in order to connect us once again to the possibility of building broad solidarity.

Sarah Jaffe, author of *Work Won't Love You Back*. A veteran worker intellectual brilliantly addresses the crisis of the labor movement, skewering those who believe that renewal can come from the top down and encouraging those who are fighting to rebuild it from the bottom up.

Mike Davis, author of *Planet of Slums*.
