Lucas,2014-12-31 This Handbook summarizes the state of thinking and presents new evidence on various links between international migration and economic development with particular reference to lower income countries The connections between trade aid and migration ar **The Economics of Migration in the Volta Basin of Ghana** Daniel Tsegai,2005 **Economics of Seasonal Migration** D. V. Kasar,1992 **The Economics of Agricultural Development** George W. Norton,Jeffrey Alwang,William A. Masters,2014-06-03 Persistent problems with poverty rapid population growth and malnutrition in many developing countries are among the most serious issues facing the world today This book examines the causes severity and effects of these problems as well as potential solutions The authors consider the implications of globalization of goods services and capital for agriculture poverty and the environment and identify linkages in the world food system stressing how agricultural and economic situations in poor countries affect industrialized nations and vice versa Focusing on the role that agriculture can play in improving economic and nutritional wellbeing and how that role might be enhanced this book is essential reading **The Economics of Climate-Resilient Development** Sam Fankhauser,Thomas K.J. McDermott,2016-07-27 Some climate change is now inevitable and strategies to adapt to these changes are quickly developing The question is particularly paramount for low income countries which are likely to be most affected This timely and unique book takes an integrated look at the twin challenges of climate change and development The book treats adaptation to climate change as an issue of climate resilient development rather than as a bespoke set of activities flood defences drought plans and so on combining climate and development challenges into a single strategy It asks how the standard approaches to development need to change and what socio economic trends and urbanisation mean for the vulnerability of developing countries to climate risks Combining conceptual thinking with practical policy prescriptions and experience the contributors argue that to address these questions climate risk has to be embedded fully into wider development strategies Essays on the Economics of Migratory Fish Stocks Ragnar Arnason,Trond Bjørndal,2012-12-06 Following the publication of seminal papers by professors H S Gordon in 1954 and A D Scott in 1955 active research has led to rapid progress in our understanding of the economics of fisheries Fishing however is a complicated activity involving intricate interactions between man made fishing capital and naturally produced fish stocks in an inherently dynamic and stochastic setting Consequently in spite of significant advances important sections of fisheries economics remain largely unexplored One such area is the economics of migratory fish stocks In 1985 the editors of this volume

embarked on a research project concerned with the optimal utilization of common Nordic fish stocks A fundamental feature of some of the most important of these fish stocks such as the Atlanto Scandian herring and the Icelandic capelin is their migratory behaviour Not only do the migrations continuously alter the economic conditions for harvesting these species They also result in the periodical transfer of stock concentrations from one exclusive fisheries jurisdictions to another It was readily apparent that this behaviour constituted a crucial determinant of the appropriate harvesting pattern of these stocks More importantly however migrations are by no means a unique feature of Nordic fish stocks In fact it appears that migratory behaviour is exhibited albeit in varying degrees by all species of fish It therefore stands to reason that migrations constitute an important aspect of the economics of fisheries in general
