## **Ecriture Et Orthophonie Exploration Recherches En Sciences De L'education:**

**Ecriture et orthophonie** Monique Frumholz, 1997 A l'heure où la médicalisation de l'écriture scolaire devient de plus en plus forte il importait de se interroger sur la spécificité de l'intervention orthophonique se situant au deuxième rang dans le champ de ce que l'on pourrait appeler l'oralité dans le traitement des dysfonctionnements de l'ordre scriptural. À travers d'une part une présentation critique des discours et pratiques de l'instance orthophonique concernant la pathologie du langage écrit et d'autre part une analyse approfondie des effets que ces discours et pratiques produisent sur les orthophonistes étudiants. Il a été possible dans un premier temps de mettre en évidence que les orthophonistes ne connaissent les éléments théoriques nécessaires à l'élaboration d'une pratique professionnelle cohérente et dans un second temps de proposer un certain nombre d'hypothèses permettant d'expliquer le pourquoi d'un tel statut théorique. Vu son ancrage théorique en sciences du langage, une seule interrogation a été posée dans cet ouvrage celle des références théoriques privilégiées et qui permettraient la mise en place d'une thérapie du langage tenant compte de la diversité des fonctionnements langagiers. Ce travail est ce titre un premier pas vers une redéfinition de la profession.

Giroux, 2011-09-06T00:00:00-04:00 Plusieurs jeunes présentent des difficultés de lecture et d'écriture. Cela nuit leurs apprentissages la poursuite de leurs études et leur implication active dans la société. Les intervenants qui travaillent auprès de ces jeunes doivent considérer une grande diversité de courants de pensée et ce qui complexifie la prise de décisions quant aux actions entreprendre pour les aider. En tablissant un pont entre les connaissances scientifiques contemporaines et l'expertise clinique, cet ouvrage est l'un des rares en langue française qui propose des pratiques fondées sur les données issues de la recherche en langage écrit. Plus précisément, ce livre adopte une perspective langagiée des difficultés de la lecture et de l'écriture et suggère une démarche clinique aux orthophonistes impliqués dans la prévention et l'évaluation des difficultés du langage écrit. Il s'agit d'une ressource indispensable à la formation et au perfectionnement des orthophonistes et des intervenants œuvrant en langage écrit auprès de la petite enfance et des jeunes de l'école primaire et secondaire.

**Langage oral et écrit** Suzanne Borel-Maisonny, 2019-10-17T00:00:00+02:00 Cet ouvrage rassemble les travaux que Suzanne Borel Maisonny a consacrés aux apprentissages de base : lecture, écriture, orthographe, calcul et la prédiction des difficultés dans le cadre d'une méthode d'enseignement originale. Il s'agit donc de l'héritage pédagogique de la fondatrice de l'orthophonie en France, celle qui a mis au point avec ses équipes des tests psychomoteurs ou de langage ainsi que des techniques innovantes d'éducation. S'appuyant sur une recherche scientifique longuement menée et une connaissance précise des possibilités et des difficultés de l'enfant, Suzanne Borel Maisonny a ainsi laboré peu à peu toute une méthode d'enseignement, celle-ci permettant la fois d'assurer un bon départ pour chaque enfant et de permettre ceux rencontrant des difficultés de réussir au mieux. Cette nouvelle édition destinée aux orthophonistes mais aussi aux enseignants spécialisés et aux éducateurs est augmentée d'une introduction historique et scientifique par Monique Touzin et Olivier Héral, tous deux orthophonistes. Ils replacent les travaux de Suzanne Borel Maisonny dans le contexte de leur publication en 1960 et en soulignent l'intuition remarquable et l'actualité forte.

**Effets d'entraînements multi-sensoriels à la connaissance des lettres sur les habiletés en écriture et en lecture chez les enfants de 5 ans tout-venant** Amélie Dufour, 2011 Les entraînements qui préparent l'acquisition de la lecture en développant la conscience phonologique, la connaissance des lettres et les apprentissages des correspondances lettres-sons sont bienfiques tant en prédiction des difficultés de lecture qu'en remédiation. Ces premières acquisitions sont en effet prédictives de la réussite ultérieure dans l'apprentissage de la lecture et de l'écriture. Notre recherche porte sur les effets d'entraînements multi-sensoriels : la connaissance de lettres sur les habiletés en lecture et en écriture chez les enfants de cinq ans tout-venant. Nous avons comparé les effets d'entraînements mettant en jeu deux modalités d'exploration sensorielles : ceux d'entraînements mettant en jeu trois modalités d'exploration sensorielles. Nous avons notamment étudié l'influence de deux explorations kinesthésiques sur le développement du principe alphabétique : l'une graphomotrice et l'autre haptique. Si ces explorations sont toutes deux tactiles-kinesthésiques, elles diffèrent car l'une se fait avec un stylo et l'autre exploration graphomotrice et procure de ce fait un feed-back visuel à l'enfant sur sa production et l'autre au doigt exploration haptique. Nos résultats indiquent que ces interventions sont plus efficaces lorsque l'exploration des lettres est effectuée en combinant les modalités auditives, visuelles et haptiques afin de créer une représentation plurimodale des lettres et que elle est associée à des entraînements phonologiques. L'ajout de la modalité haptique améliore la connaissance des lettres ainsi que la conscience phonologique et rend le lien entre la lettre et le son plus explicite, ce qui améliore les capacités de codage. L'ajout de la modalité graphomotrice se

montre particulièrement bien que dans le codage de pseudo mots qui est un bon indicateur de la compréhension du principe alphabétique par les enfants. Elle paraît notamment plus efficiente pour faciliter l'acquisition des habiletés en lecture et en écriture en raison du feed back visuel qu'elle implique, ce qui favorise la construction des connaissances sur les lettres et l'encodage du geste moteur nécessaire à la production critique.
