American Zoo David Grazian, 2017-12-05 A close up look at the contradictions and wonders of the modern zoo Orangutans swing from Kevlar lined fire hoses Giraffes feast on celebratory birthday cakes topped with carrots instead of candles Hi tech dinosaur robots growl among steel trees while owls watch animated cartoons on old television sets In *American Zoo* sociologist David Grazian takes us on a safari through the contemporary zoo alive with its many contradictions and strange wonders Trading in his tweed jacket for a zoo uniform and a pair of muddy work boots Grazian introduces us to zookeepers and animal rights activists parents and toddlers and the other human primates that make up the zoo's social world He shows that in a major shift away from their unfortunate pasts American zoos today emphasize naturalistic exhibits teeming with lush and immersive landscapes breeding programs for endangered animals and enrichment activities for their captive creatures In doing so zoos blur the imaginary boundaries we regularly use to separate culture from nature humans from animals and civilization from the wild At the same time zoos manage a wilderness of competing priorities animal care education scientific research and recreation all while attempting to serve as centers for conservation in the wake of the current environmental and climate change crisis The world of the zoo reflects how we project our own prejudices and desires onto the animal kingdom and invest nature with meaning and sentiment A revealing portrayal of comic animals delighted children and feisty zookeepers *American Zoo* is a remarkable close up exploration of a classic cultural attraction

Dunlop, 2016-11-20 The 24th of March 1939 was a poignant day for twelve year old Gerald Wiener. He was on a train pulling out of Berlin and he was on his way to the UK to escape persecution in Nazi Germany. He was one of the thousands of unaccompanied children saved by the Kindertransport. Looked after by two sisters in Oxford his abilities as a scholar became apparent and from an early age he was set on the road to academic achievement. There followed a distinguished career as a research scientist in Edinburgh where he made a genetic discovery that received international recognition. His research department was a centre of excellence and members of his team went on to make an astonishing breakthrough in genetics the cloning of Dolly the sheep. During his career Gerald was also in demand to assist agricultural development in China India the secretive North Korea and many other countries and his trips during these years are full of incident and fascinating human and social insights. It was while he was on a postdoctoral fellowship in the USA that he discovered he had a large family in California. He had known nothing of them as his mother and father had parted when he was only two years old. His aunt and stepmother gave him compelling accounts of their escapes from Hitler via Shanghai and life under the Japanese during the War. Their stories and that of Gerald himself are amazing tales of resilience and triumph over adversity. This book shows how one man's life and achievements mirror the great events of the second half of the twentieth century and the opening years of the new millennium.
