Good Lives And Moral Education Studies In Moral Philosophy Vol 4

R. S. Peters

Good Lives And Moral Education Studies In Moral Philosophy Vol 4:

Good Lives and Moral Education Evan Simpson, 1989 This book develops a conservative conception of morality and its implications for moral education The argument stresses practices of living over rationalistic theories At its center is an account of the education of the emotions in which cultivating reflective imagination is more important than mastering universal principles The central contrast is with Lawrence Kohlberg and his theory of moral development Simpson sees extending democratic practices of discussion and argument as best answering the question how lacking certain standards of judgment we can decide between competing conceptions of human progress *Practical And Professional Ethics (vol. 4 : Educational Ethics* Debashis Guha, 2007 The Series on Practical and Professional Ethics is an outcome of major research project funded by the U G C in which the task of resolving some value laden practical problems troubling the professionals and the non professionals in India was undertaken **Aristotle and Xunzi on Shame, Moral Education, and the Good Life** Jingyi Jenny Zhao, 2024 Despite recent developments in the history of emotions and in comparative studies sustained cross cultural comparative studies of the emotions remain few and far between Jingyi Jenny Zhao has produced the first major work that takes two philosophers from the ancient Greek and early Chinese traditions to stimulate discussion of an interdisciplinary nature on the rich and complex topic of the emotions in particular of shame It features comparative analysis of Greek and Chinese texts while bringing the ancient materials to bear on modern controversies such as the role of shame in moral education and social cohesion Although unlike in their social historical and intellectual backgrounds Aristotle and Xunzi bear striking similarities in several respects they both conceptualize humans as essentially members of communities as having a unique set of characteristics that set them apart from other living things and as beings in need of moral training to fulfil their potential and become integrated into a well ordered society The two philosophers discourses on shame reveal important insights into their ideals of human nature moral education and the good life This book tackles directly the methodological problems that are relevant to anyone interested in cross cultural comparisons and organizes discussions of the ancient sources to facilitate a thorough integration of perspectives from the cultural traditions concerned This approach provides sufficient focus to allow for detailed textual analysis while giving scope for making constant connections to the broader comparative questions at issue *Engaging in Narrative Inquiry* D. Jean Clandinin, 2022-09-01 In *Engaging in Narrative Inquiry* Second Edition D Jean Clandinin a pioneer in narrative research updates her classic formulation on narrative inquiry clarifying extending and refining methods This updated edition looks at changes and developments in the field since the publication of the first edition in 2013 exploring how narrative inquiry explores human lives through a narrative lens that honors experience as a source of important knowledge and understanding The book includes several exemplary cases with the author's critique and analysis of the work The following are new to this edition New exemplary cases including Menon's autobiographical narrative inquiry as the starting point for framing a research puzzle and justifying

a study Chung s account of a study that begins with living alongside participants and a paper from Swanson s autobiographical narrative inquiry An expanded discussion of the philosophical grounding of narrative inquiry An expanded discussion of relational ethics in narrative inquiry that highlights links to a relational ontology An updated account of the field of narrative inquiry that highlights future directions including the necessity of response groups and questions of responsibility and community The increasing interest in narrative inquiry as research methodology across disciplines makes this book an essential guide and an excellent text for graduate courses in qualitative inquiry education and nursing research sociology and all courses in autobiographical and narrative research and inquiry Education with Character James Arthur,2003 Education with character is the latest buzzphrase but until now there s been no real consensus on some of the key issues This book addresses the gap adopting a cross disciplinary approach to the matters in hand **Education for Character** Frank Chapman Sharp,1917 **Virtue Ethics and Moral Education** David Carr,Jan Steutel,2005-06-22 This collection of original essays on virtue ethics and moral education seeks to fill this gap in the recent literature of moral education combining broader analyses with detailed coverage of the varieties of virtue weakness and integrity relativism and rival traditions means and methods of educating the virtues The rare collaboration of professional ethical theorists and educational philosophers provides a ground breaking work and an exciting new focus in a growing area of research

Moral Development: The great justice debate Bill Puka,1994 First published in 1994 Routledge is an imprint of Taylor Francis an informa company Reaffirming Legal Ethics Kieran Tranter,Francesca Bartlett,Lillian Corbin,Michael Robertson,Reid Mortensen,2010-07-02 This volume offers a comprehensive review of legal ethics as an international movement Contributors include many of the key participants to the legal ethics field from all over the world and many of the recognised emerging thinkers taking stock of the last thirty years of legal ethics practice and scholarship **An Introduction to Child Psychology** Charles Wilkin Waddell,1918 Education, Values and Mind (International Library of the Philosophy of Education Volume 6) David Cooper,2010-02-25 The subjects discussed in this volume range from political education to the education of the emotions and from motivation to the training of teachers Apart from its value as a testimony to Professor Peters impact the volume will stimulate reflection on central issues in the philosophies of education mind and value **R. S. Peters on Education and Ethics** R.S. Peters,2021-07-14 R S Peters on Education and Ethics reissues seven titles from Peters life s work Taking an interdisciplinary approach the books are concerned with the philosophy of education and ethics Topics include moral education and learning authority and responsibility psychology and ethical development and ideas on motivation amongst others The books discuss more traditional theories and philosophical thinkers as well as exploring later ideas in a way which makes the subjects they discuss still relevant today **A Syllabus and Bibliography of Child Study** Charles Wilkin Waddell,William Thomas Root,1915 **Journal of Accounting, Ethics & Public Policy Vol. 4, No. 1** Robert McGee,2004-10 This quarterly journal publishes scholarly articles in the interdisciplinary areas of

accounting ethics and public policy **Moral Development and Moral Education (Routledge Revivals)** R. S. Peters, 2015-06-11 First published in 1981 this collection of essays was taken from Peters larger work *Psychology and Ethical Development* 1974 in order to provide a more focused volume on moral education for students Peters background in both psychology and philosophy makes the work distinctive which is evident from the first two essays alone Freud s theory of Moral Development in Relation to that of Piaget and Moral Education and the Psychology of Character He also displays balance in his acceptance that reason and feeling are both of great importance where the subject of moral education is concerned Although written some time ago the book discusses issues which are still of considerable interest and importance today *The Handbook of Virtue Ethics* Stan van Hooft, 2014-09-11 Virtue ethics has emerged as a distinct field within moral theory whether as an alternative account of right action or as a conception of normativity which departs entirely from the obligatoriness of morality and has proved itself invaluable to many aspects of contemporary applied ethics Virtue ethics now flourishes in philosophy sociology and theology and its applications extend to law politics and bioethics The Handbook of Virtue Ethics brings together leading international scholars to provide an overview of the field Each chapter summarizes and assesses the most important work on a particular topic and sets this work in the context of historical developments Taking a global approach by embracing a variety of major cultural traditions along with the Western the Handbook maps the emergence of virtue ethics and provides a framework for future developments **Ethics and the University** Michael Davis, 2002-01-04 Ethics and the University brings together two closely related topics the practice of ethics in the university academic ethics and the teaching of practical or applied ethics in the university This volume is divided into four parts A survey of practical ethics offering an explanation of its recent emergence as a university subject situating that subject into a wider social and historical context and identifying some problems that the subject generates for universities An examination of research ethics including the problem of plagiarism A discussion of the teaching of practical ethics Michael Davis explores how ethics can be integrated into the university curriculum and what part particular cases should play in the teaching of ethics An exploration of sexual ethics Ethics and the University provides a stimulating and provocative analysis of academic ethics which will be useful to students academics and practitioners **Caring** Peta Bowden, 2008-01-28 In *Caring* Peta Bowden extends and challenges recent debates on feminist ethics She takes issue with accounts of the ethics of care that focus on alleged principles of caring rather than analysing caring in practice Caring Bowden argues must be understood by working through examples Following this approach Bowden explores four main caring practices mothering friendship nursing and citizenship Her analysis of the differences and similarities in these practices their varying degrees of intimacy and reciprocity formality and informality vulnerability and choice reveals the practical complexity of the ethics of care Caring recognizes that ethical practices constantly outrun the theories that attempt to explain them and Bowden s unique approach provides major new insights into the nature of care without resorting to indiscriminate unitary models It will be essential

reading for all those interested in ethics gender studies nursing and the caring professions Mindfulness and Learning
Terry Hyland, 2011-08-21 In recent decades education at all levels has been seriously impoverished by a growing obsession with standards targets skills and competences According to this model only a circumscribed range of basic cognitive skills and competences are the business of education whose main role is to provide employability credentials for people competing for jobs in the global economy The result is a one dimensional economistic and bleakly utilitarian conception of the educational task In Mindfulness and Learning Celebrating the Affective Dimension of Education Terry Hyland advances the thesis that education stands in need of a rejuvenation of its affective function the impact it has on the emotional social moral and personal development of learners Drawing on the Buddhist conception of mindfulness he advances a powerful argument for redressing this imbalance by enhancing the affective domain of learning Mindfulness and Learning Celebrating the Affective Dimension of Education shows how the concept and practice of mindfulness non judgmental present moment awareness and experience can enrich learning at all levels Mindfulness thus contributes to the enhanced achievement of general educational goals and helps remedy the gross deficiency of the affective emotional aspects of contemporary theory and practice The author outlines a mindfulness based affective education MBAE programme and shows how it might be introduced into educational provision from the early years to adult education with a view to harmonising the cognitive affective balance across the system **Age of the Passions** John Dwyer, 2001-01-01 The eighteenth century is often described as the age of reason This book argues that it should also be considered the age of the passions Eighteenth century writers recognised the passions as the springs of human life and actions They began to explore self interest sociability and love in ways that would have momentous consequences for the development of western culture The century's philosophes did not merely acknowledge the existence of the passions they sought to manipulate them for the good of society When carefully cultivated self interest led to prudent behaviour and national improvement sociability contributed to inter group harmony and national identity the powerful attraction between the sexes metamorphosed into politeness and altruism This book explores the eighteenth century language of the passions in its specifically Scottish context suggesting that Scottish writers such as Allan Ramsay James Fordyce and James Macpherson were cultural pioneers whose significance goes far beyond the transitory popularity of the literary products they created It also examines thinkers like Adam Smith and John Millar from a radically different perspective And it constructs new connections between the philosophy social thought sermons letters poetry and epic literature of enlightened Scottish society The Scottish contribution to modern consciousness was nothing short of profound The Scots brought the passions into the centre of discourse so they could no longer be ignored only exploited or repressed

Good Lives And Moral Education Studies In Moral Philosophy Vol 4 Book Review: Unveiling the Power of Words

In a world driven by information and connectivity, the energy of words has been evident than ever. They have the capacity to inspire, provoke, and ignite change.
