Wallace, 2005-04-04 Showing the relevance of Hegel's arguments this book discusses both original texts and their interpretations **Second Metropolis** Blair A. Ruble, 2001-05-28 By exploring and comparing North America's Russia's and Japan's second cities Chicago Moscow and Osaka *Second Metropolis* discloses the extent to which social fragmentation frequently viewed as an obstacle to democratic development actually fostered a pragmatic pluralism that nurtured pluralistic public policies Such policies are explored through six case studies the politics of street railways and charter reform in Chicago adult education and housing in Moscow and harbor revitalization and poverty alleviation in Osaka that illustrate how even those with massive political and economic power were stymied by the complexity of their communities Chicago Moscow and Osaka though the products of very different nations and cultures nonetheless shared an important experience of inclusive politics during an era of extraordinary growth and social diversity The success of all three cities which went well beyond mere survival rested on a distinctive political resource pragmatic pluralism

Chronicles in Stone Victoria Donovan, 2019-11-15 *Chronicles in Stone* is a study of the powerful and pervasive myth of the Russian Northwest its role in forming Soviet and Russian identities and its impact on local communities Combining detailed archival research participant observation and oral history work it explores the transformation of three northwestern Russian towns from provincial backwaters into the symbolic homelands of the Soviet and Russian nations The book's central argument is that the Soviet state exploited the cultural heritage of the Northwest to craft patriotic narratives of the people's genius heroism and strength that could bind the nation together after 1945 Through sustained engagement with local voices it reveals the ways these narratives were internalized revised and resisted by the communities living in the region Donovan provides an alternative lens through which to view the rise of Russian patriotic consciousness in the twentieth and twenty-first centuries adding a valuable regional dimension to our knowledge of Russian nation building and identity politics

 in 1987 this book is based on research concerned primarily with the Central Industrial Region It uses archival and published
 sources focusing on a category of immigrants which is comparatively well documented in official records those who enlisted
 formally in the urban burgher classes The book follows two key lines of enquiry The first seeks clarification of the legal
 provisions governing such enlistment and the second introduces a large amount of data on this enlistment The book uses the

 D'haen,2019-07-25 The recent return of world literature to the centre of literary studies has entailed an increased attention
 to non European literatures but in turn has also further marginalized Europe s smaller literatures Dutch and Flemish
 Literature as World Literature shows how Dutch language literature from its very beginnings in the Middle Ages to the
 present has not only always taken its cue from the major literary traditions of Europe and beyond but has also actively
 contributed to and influenced these traditions The contributors to this book focus on key works and authors providing a
 concise yet highly readable history of Dutch language literature and demonstrating how this literature is anchored in world
 literature Library of Congress Catalog Library of Congress,1980-07 Monuments for Posterity Antony
 Kalashnikov,2023-04-15 Monuments for Posterity challenges the common assumption that Stalinist monuments were
 constructed with an immediate propagandistic function arguing instead that they were designed to memorialize the present

for an imagined posterity In this respect even while pursuing its monument building program with a singular ruthlessness and on an unprecedented scale the Stalinist regime was broadly in step with transnational monument building trends of the era and their undergirding cultural dynamics By integrating approaches from cultural history art criticism and memory studies along with previously unexplored archival material Antony Kalashnikov examines the origin and implementation of the Stalinist monument building program from the perspective of its goal to immortalize the memory of the era He analyzes how this objective affected the design and composition of Stalinist monuments what cultural factors prompted the sudden and powerful yearning to be remembered and most importantly what the culture of self commemoration revealed about changing outlooks on the future both in the Soviet Union and beyond its borders *Monuments for Posterity* shifts the perspective from monuments political ideological content to the desire to be remembered and prompts a much needed reconsideration of the supposed uniqueness of both Stalinist aesthetics and the temporal culture that they expressed Many Stalinist monuments still stand prominently in postsocialist cityscapes and remain the subject of continual heated political controversy Kalashnikov makes manifest monuments intentional attempts to seduce us the posterity for whom they were built

Copper Overview - From Historical Aspects to Applications Daniel Fernández González, 2024-08-28 Copper is a metal that currently is a key element in the field of electricity although it has significant importance in other fields particularly when it is alloyed due to its mechanical properties and corrosion resistance Moreover copper and some of its compounds are gaining importance in other topics due to their antibacterial properties Nevertheless this metal which was one of the first used by humans has been crucial for their development and for this reason two periods of history are called the Copper Age and Bronze Age due to the importance of Cu and Cu Sn respectively in the fabrication of utensils weapons and ornamental objects From that moment the utilization of copper has significantly grown to an actual production approaching 30 Mt of which around 80% corresponds to the mine production while the rest comes from recycling

The reutilization of copper or the exploitation of secondary resources is a topic of increasing importance due to both the depletion of high grade deposits and the importance of environmental aspects in metallurgical industries This book provides a collection of research works and reviews that emphasize some of the above reported topics

Building the Churches of Kievan Russia Pavel A. Rappoport, 2016-12-05 This work is the first systematic study of how monumental buildings were constructed in medieval Russia It deals specifically with ecclesiastical architecture but also discusses such secular architecture palaces or towers In scope the book covers the territory of the Kievan state and the principalities that succeeded it from the 10th century to the 13th century Pavel Aleksandrovich Rappoport was the author of many of the standard works on the architectural history of Russia whether monumental military or domestic He was also a leading archaeologist In *Building the Churches of Kievan Russia* his aim is to investigate how people went about building them from brickmaking and lime firing to the roofing and decoration from how the churches were laid out to how much brickwork was laid in a day This book treats all these processes as one integrated and interconnected procedure The detailed analysis enables Rappoport to identify the work of particular teams of builders even individual masters and to follow their progress from one site to another and one town to a second Similarly he documents how the Byzantine styles and methods of church building imported into Russia after its conversion in 989 were gradually adapted to meet the needs of local circumstances and climate This study will be of direct relevance to those concerned with the architecture and the Church of pre Mongol Russia as well as its social history The investigation of the earliest churches furthermore represents the sole extended discussion of Byzantine building practices In terms of methodology the book will be of interest to all architectural historians and archaeologists concerned with the Middle Ages and makes accessible in English material that has hitherto only been available in Russian

Staging Democracy Jessica Pisano, 2022-07-15 Focusing on the experiences of people in Russia and Ukraine *Staging Democracy* shows how some national leaders seeming popularity rests on local economic compacts Jessica Pisano draws on long term research in rural communities and company towns analyzing how local political and business leaders seeking favor from incumbent politicians used salaries benefits and public infrastructure to pressure citizens to participate in command performances Pisano looks at elections whose outcome was known in advance protests for hire and smaller mises en scene to explain why people participate what differs from spectacle in totalitarian societies how political theater exists in both authoritarian and democratic systems and how such performances reshape understandings of the role of politics *Staging Democracy* moves beyond Russia and Ukraine to offer a novel economic argument for why some people support Putin and similar politicians Pisano suggests we can analyze politics in both democracies and authoritarian regimes using the same analytical lens of political theater
