Gottfried Semper In Zurich An Intersection Of Theory And Practice:

Gottfried Semper in Zurich Mikesch Muecke, 2023-03-15 In the past Gottfried Semper 1803 1873 has been framed as a significant theoretician but not an important architect Few scholars have until now examined the resonances between his writings and his built works This scholarly text explores the consequences of thinking architectural production as the intersection of theory and practice in six of Semper's little known works that he created during his tenure in Zurich Switzerland between 1854 and 1871 This book has three objectives the first is to retrace the tentative seams that link Semper's built and written works and in this process challenge the still pervasive assumption that the architect's buildings have little to do with his important theoretical and historical texts The second objective is to construct a detailed analysis of Semper's lesser known works with the intent to map a constellation of his theoretical and practical tactics The third objective is to show how these means of production may inform a different practice of writing and building that considers the expanded interdisciplinary role architecture can play in the twenty first century From this perspective Semper's hybrid work advanced via the roles of influential writer teacher and designer holds the potential to undermine the entrenched lines of division between disciplines at the same time that it promotes new linkages between design and building for contemporary practice

Gottfried Semper in Zurich Mikesch W. Muecke, 2005 Until now Gottfried Semper 1803 1873 has been framed as an important theoretician but a merely historicist architect With a few exceptions no scholar has so far analyzed the resonance between his writings and his built works Rather than limit himself to a historical analysis of either the author explores in this text the consequences of thinking architectural production as the convergence of writing and building in six of Semper's lesser known works developed during his tenure in Zurich Switzerland between 1854 and 1871 **How**

Schuldenfrei, 2020-04-08 This edited volume considers the ways in which multiple stages phases or periods in an artistic or design process have served to arrive at the final artifact with a focus on the meaning and use of the iteration To contextualize iteration within artistic and architectural production this collection of essays presents a range of close studies in art architectural and design history using archival and historiographical research media theory photography material studies and critical theory It examines objects as unique yet mutable works by examining their antecedents successive exemplars and their afterlives and thus their role as organizers or repositories of meaning Key are the roles of writing the use of media

and relationships between object image and reproduction This volume asks how a closer look at iteration reveals new perspectives into the production of objects and the production of thought alike Written by an international team of contributors offering a range of perspectives it looks broadly at meaning and insight offered by the iteration for processes of design for historical research and for the reception of creative works
