Researching and Understanding Educational Networks Robert McCormick, Alison Fox, Patrick Carmichael, Richard Procter, 2010-06-25 In the twenty first century what could be more important than networks Such is the power of their influence and attendant technologies that it is unsurprising that our thinking about networks is permeated with images and metaphors from electronic networks This orientation may equally influence thinking about education whether that is of students or teachers *Researching and Understanding Educational Networks* extends the discussion of educational networks in a unique and novel way by relating it to teacher learning Following an investigation of teacher and school networks in the UK the authors found that theoretical perspectives taken from existing work on such networks were not adequate to provide an understanding of their potential nor to provide the basis for researching them in ways that reflected the variety of teacher experience This book presents analyses of the problems with existing theories of teacher learning which for example draw on ideas of communities of practice and explores what network theories can be brought to the problem of how teachers and schools create and share new knowledge about practice Innovative networking theories discussed include social network analysis social capital theories actor network theory investigations of electronic networks including computer mediated conferencing how people learn at events such as conferences *Researching and Understanding Educational Networks* explores a new application of networks theories derived from quite different fields of work and extends it both by being concerned about networks beyond organisations and specifically about educational networks Their application to educational networks and to teacher learning in particular is a unique contribution of the book This enables it to be of interest to both researchers and those studying for higher degrees including students who are professionals working in schools

Knowledge Networks Paul M. Hildreth, Chris Kimble, 2004-01-01 *Knowledge Networks Innovation Through Communities of Practice* explores the inner workings of an organizational internationally distributed Community of Practice The book highlights the weaknesses of the traditional KM approach of capture codify store and asserts that communities of practice are recognized as groups where soft knowledge that cannot be captured knowledge is created and sustained

Detection of Corona Discharge in Electric Networks Yevgen Sokol,Vitalii Babak,Artur Zaporozhets,Oleg Gryb,Ihor Karpaliuk,2023-10-13 The book is devoted to the solution of the problem of determining the presence of corona discharge on electrical equipment with acoustic radiation It is shown that corona discharge leads not only to irreversible losses of electrical energy but also interferes with the transmission of high frequency signals deteriorates insulating elements can become a source of conditions for the occurrence of a destructive arc discharge and is one of the factors of changing the continuity of the electrical system as a whole The book describes the processes in a corona discharge that lead to the occurrence of acoustic waves The authors analyzed acoustic radiation from a corona discharge reproduced in laboratory conditions The received acoustic signals were processed by Fourier transform Thus the features of the spectral function which belong specifically to the corona discharge in electrical networks with industrial frequency current were determined Based on the inverse Fourier transform a simplified model of the acoustic radiation of the corona discharge was constructed The authors proposed a method for detecting the presence of a corona discharge based on the spectral characteristics of acoustic radiation Techniques were developed to determine the presence of a corona discharge for the creation of stationary and mobile devices The advantages of the method of detecting the presence of corona discharge by the acoustic spectrum are shown The method makes it possible to determine the presence of a corona discharge remotely even out of direct sight regardless of the time of day and regardless of the season The book states that determining the presence of a corona discharge is not enough it is still necessary to determine its location The method of finding the coordinates of the corona discharge as a source of sound was described Methods of searching for corona discharge coordinates with a fixed scanning device and a moving scanning device are proposed A UAV is proposed as a mobile platform for the scanning system The influence of the Doppler effect on acoustic measurements when the UAV speed changes was taken into account The authors have shown that the use of coronal discharge detection with UAVs will not only enable the prevention of coronal discharge but also increase the frequency of surface inspections This will allow timely measures to be taken to improve the reliability of the power system operation The book is intended for the researchers postgraduate students and students specialized in theory and calculations of electrical systems Library of Congress Subject Headings Library of Congress.
