overwhelmed by the many demands we now face in our working and private lives Summarizing the knowledge and experiences of three experts in the field and offering practical insights from specialists around the world this book offers a new approach to leadership and personal development by focussing on the links between these two areas The good old times of planning one's development in a linear step by step fashion over a lifetime are over While recognising that there are different learning styles and personality types the authors present a more proactive flexible and emergent approach to your development Topics such as sustainability complexity and creativity are considered key issues that should play a role in not only developing a positive future society but also in refining the current and future you This modern approach will give you a cutting edge advantage in our fast changing world Since the three authors whole heartedly agree with Einstein's maxim this book should be considered an attempt to equip you with new levels of thinking and new skill sets to make you more successful at leading and developing yourself and others in a variety of contexts With structured activities and proven techniques from people who have successfully applied the lessons found in this book Leadership and Personal Development A toolbox for the 21 century professional you will be armed with an effective approach to development *Whitaker's Books in Print*, 1998

Western culture is changing Postmodern exigencies are encroaching on all aspects of our lived experiences With them these exigencies bring tremendous pressures and challenges to Spiritual Leadership challenges that must be met and overcome lest this traditional institution render itself out dated and outmoded We are now confronted with the advent of an empowered educated and democratically geared population an epistemological culture that is engaged in its own determination that has information at its fingertips that feels entitled to its own points of view that passionately pursues its own development and that wants to feel validated in all these pursuits Postmodern Western society expects its Spiritual Leaders to be able to engage it at a level of depth that is sufficiently cogent to honor individual complexity personal trajectory and evolution philosophical differences scientific relevance empirical cogency cultural sensitivity religious background emotional inheritance and existential mystery It is a sophisticated and elegant culture steeped in autonomous entitlement and ready to easily discard that which it feels is no longer useful In the face of such a stark and startling challenge what can Spiritual Leaders do to keep up How do we approach our work when so much is demanded of us How do we conceive of our vocation in such a way as to avoid the slide into potential cultural obsolescence This book sets forth a framework of spiritual growth and spiritual leadership that addresses these very issues In its pages cherished traditional messages are interwoven with post modern therapeutic and care giving outlooks resulting in a product that is a must read for Spiritual Leaders today Spiritual Leadership must find a way to remain relevant cogent and integrated as it toils to disseminate its essential message of growth and transformation into this post modern world This book tells us how

Panoramas and Compilations in Nineteenth-Century Britain Helen Kingstone, 2023-01-06 This book shows how in

nineteenth century Britain confronted with the newly industrialized and urbanized modern world writers artists journalists and impresarios tried to gain an overview of contemporary history They drew on two successive but competing conceptual models of overview the panorama and the compilation Both models claimed to offer a holistic picture of the present moment but took very different approaches This book shows that panoramas 360 views previously associated with the Romantic period and compilations big data projects previously associated with the Victorian fin de siècle are intertwined relevant across the entire century and often remediated making them crucial lenses through which to view a broad range of genre and forms It brings together interdisciplinary research materials belonging to different period silos to create new understandings of how nineteenth century audiences dealt with information overload It argues for a new politics of distance one that recognizes the value of immersing oneself in a situation event or phenomenon but which also does not chastise us for trying to see the big picture This book is essential reading for students and scholars of nineteenth century literature history visual culture and information studies
