ABSTRACT

From 1990 to 2000, a qualitative study of the implementation of the Kentucky Education Reform Act (KERA) was conducted in four rural school districts in Kentucky. KERA reflects key components of what would later be termed "systemic reform": a unifying set of goals that all students must attain, a coherent system of instructional guidance, and a restructured governance system. In addition, KERA has other components, such as the upgraded primary program. This book presents findings from the second phase of the 10-year study, focusing on the effects of KERA on curriculum, instruction, and student learning in six elementary schools in the four districts. In all six schools, student achievement improved, but in five schools, teachers focused more on improving whole-school performance on achievement measures than on improving the learning of each student, and had difficulty raising their expectations for low-income and minority children. KERA reforms increased classroom writing, the variety of instructional strategies, integration of subject matter, classroom computer use, and open-ended response and portfolio items for classroom assessment. However, teachers had difficulty moving beyond a teacher directed approach, and only a few integrated technology effectively into the curriculum. Testing for accountability became the focus of the assessment system, and the KERA goal of continuous performance-based student evaluation was neglected. School based decision-making councils did not make most key decisions as intended by KERA. The findings also note the importance of school leadership accountability goals and the need for more time for teachers in meeting school professional development. Ten appendices present KERA goals; dissemination efforts; data collection and research questions for both phases

Elementary Change Patricia J. Kannapel, Lola Aagaard, Pamela Coe, Cynthia A. Reeves, 2000 From 1990 to 2000 a qualitative study of the implementation of the Kentucky Education Reform Act KERA was conducted in four small rural school districts in Kentucky KERA reflects key components of what would later be termed systemic reform a unifying set of goals that all students must attain a coherent system of instructional guidance and a restructured governance system In addition KERA has other components such as the ungraded primary program This book presents findings from the second phase of the 10 year study focusing on the effects of KERA on curriculum instruction and student learning in six elementary schools in the four districts In all six schools student achievement improved but in five schools teachers focused more on improving whole school performance on achievement measures than on improving the learning of each student and had difficulty raising their expectations for low income and minority children KERA reforms increased classroom writing the variety of instructional strategies integration of subject matter classroom computer use and open ended response and portfolio items for classroom assessment However teachers had difficulty moving beyond a teacher directed approach and only a few integrated technology effectively into the curriculum Testing for accountability became the focus of the assessment system and the KERA goal of continuous performance based student evaluation was neglected School based decision making councils did not make most key decisions as intended by KERA The findings also note the importance of school leadership accountability goals and the need for more time for teachers in meeting school professional development Ten appendices present KERA goals dissemination efforts data collection and research questions for both phases of the study interview protocols and characteristics of parents students and community members interviewed Contains 151 references TD **The Link**, 2001 *Resources in Education*, 2001-10 [Learner-Centered Leadership](#) Arnold B. Danzig, Kathryn M. Borman, Bruce A. Jones, William F. Wright, 2017-09-25 Many new approaches to school improvement are being proposed in the current climate of assessment and school accountability This book explores one of these approaches a new model of leadership training known as Learner Centered Leadership LCL It is built around the fundamental idea that learning and learning communities are natural processes that when properly harnessed can lead to the highest levels of professional engagement and problem solving Key features of this exciting new approach to school leadership include the following Broad based and Generative The book's narratives vividly illustrate the extraordinary ability of LCL to generate new approaches to leadership development For example encouraging and assisting school leaders to reflect on their own leadership attributes relative to the implementation of the school mission to ensure high teacher efficacy and student learning In this respect the volume contributes significantly to the field of school leadership and professional development by extending above and beyond a narrow focus on instructional leadership Practice Oriented By creating communities that encourage conversation and analysis the new data driven models of school improvement are more likely to be successfully implemented Without

analytical discourse the process of interpreting school data and transforming it into practice would be largely lost Conceptually Appropriate The realization that everyone within a school students teachers administrators belongs to the same learning community minimizes status differences and encourages teamwork The LCL administrator is much less likely to be authoritarian and power oriented and much more likely to be transformative and student outcome focused This book is appropriate for master s level courses and certification seminars and for inservice workshops dealing with school leadership

Thinking About Schools Aimee Howley, Craig Howley, 2012-11-12 As its title implies this book has a deceptively simple mission to prepare would be school leaders to draw upon a variety of theoretical perspectives when thinking about schools and schooling It shows how theories can function as cognitive tools to be mastered carefully stored in one s intellectual toolbox and used to interpret and resolve real world problems Beneath this goal lies the belief that the most effective leaders are those who are able to construct their own well grounded interpretations of events and their own responses to those events Key features of this exciting new text include the following Focus on Alternative Theories The functionalist theoretical views that have dominated administrator preparation programs for the last half century are reviewed early in the book and are shown to be inadequate to the task of understanding and coping with the complex realities of modern day schooling The remainder of the book presents alternative views of schooling that taken together can be thought of as a theoretical repertoire from which to construct interpretations and solutions to everyday real world problems Focus on Diversity Diversity is examined from a variety of viewpoints Chapter 6 looks at the cultural bases of leadership Chapter 7 at comparative and international contexts and Chapter 8 at gender and sexual orientation Illustrative Cases Each chapter contains a case with an embedded dilemma similar to those that real world administrators confront While illustrating the particular theoretical view presented in the chapter these cases are sufficiently complex that they lend themselves to interpretation by any of the other theories considered in the book This book is appropriate for graduate level courses with titles such as Organizational Theory Theory of School Leadership or Introduction to Educational Administration It might also be used as one of several texts in advanced courses on leadership theory

Motivation, Engagement and Educational Performance J. Elliott, N. Hufton, W. Willis, L. Illushin, 2005-08-17 Key factors that impact upon children s educational motivation and engagement are here considered from an international and comparative perspective Based upon a major programme of research undertaken in sites in England the USA and Russia the authors identify interrelated elements operating at international national and local levels These include children s self perceptions goals interests and aspirations curriculum and pedagogy peer and parental influences teacher perceptions school traditions and practices together with the pervasive influence of broader social cultural historical and economic factors *Practicing Anthropology*, 2001

The New Accountability Martin Carnoy, Richard Elmore, Leslie Siskin, 2003-12-16 When it comes to the issue of US education reform hopeful politicians liberal and conservative alike have long touted the promises of standards based accountability But do accountability based reforms actually work What happens when they encounter the formidable challenge of the

comprehensive high school The New Accountability explores the current wave of assessment based accountability reforms at the high school level in the United States **Rural Education News** ,2001 **Hearing on the Challenges Facing Urban and Rural Schools** United States.
