Elementary Chinese ... San Tzŭ Ching Yinglin Wang,1900 **Modern Chinese Parts of Speech** Guo Rui,2019-03-04 What is the essence of a part of speech Why is it difficult to classify parts of speech What are the bases and criteria for classifying them How should they be classified In doing so how should a conversational word be dealt with How should nominalization be treated These are just some of the questions answered in this book The classification of parts of speech in Chinese is a tough job due to the language's lack of morphological differences Based on the analysis of nearly 40 000 Chinese characters this book proposes that essentially a part of speech is not of distributional type and that its intrinsic basis is an expressional function and the semantic type Essentially large categories such as substantive words predicate words and modification words are classes of words classified according to their expressional functions Basic categories such as nouns verbs and adjectives are classes that combine semantic types with syntactical functions In classifying parts of speech the book pays attention not to identifying a single distributive characteristic that is internally universal and externally exclusive but to clustering the grammatical functions that have the same classification value through the reflection representation relationship among distribution expressional function and semantic type distribution reflects expressional function and semantic type which are in turn represented as distribution thereby identifying the classification criteria It uses distributional compatibility and the correlation principle to analyze which distributional differences represent differences in parts of speech and which do not In this way grammatical functions that have equal classification values are collected into one equivalent function cluster each of which represents one part of speech The book uses four strategies to classify parts of

speech namely the homogeneity strategy the homomorphical strategy the priority homomorphical strategy and the consolidation strategy It will be a valuable reference for Chinese linguistic researchers and students as well as Chinese learners 本手工 80 课 1 15 课 韦玉音交际 65 课 有课文 文生词 于彦典 宗合连 习作 成地 四 词 韦 含 子 转 册 **Chinese Lexical Semantics** Meichun Liu, Chunyu Kit, Qi
