Elementary Structures Reconsidered Levi Strauss On Kinship:

Elementary Structures Reconsidered Francis Korn, 2023-11-15 *Elementary Structures Reconsidered* offers a critical analysis of Claude Lévi Strauss's seminal work *Les Structures élémentaires de la parenté* a landmark in social anthropology that has significantly influenced the field. Lévi Strauss's theory of kinship systems which he presents as a general theory asserts that kinship terminologies are not merely descriptive of biological relationships but are based on social categories that reflect systems of exchange particularly marriage. His distinction between closed and open systems of exchange forms the core of his typology with closed systems prescribing specific rules for marriage and kinship while open systems leave room for more flexibility. The critique offered in this monograph focuses on testing and reassessing Lévi Strauss's ideas examining whether they provide meaningful insights into the nature of kinship systems and whether his classification of kinship structures holds up against empirical analysis. The author critically engages with Lévi Strauss's claims about the prescriptive nature of kinship systems questioning whether these propositions truly offer a general theory applicable to all kinship systems or whether they are simply a repackaging of earlier anthropological work. Drawing from a tradition of scholars such as Durkheim, Mauss, Kroeber, and Hocart the monograph investigates the empirical and theoretical foundations of Lévi Strauss's approach offering alternative perspectives and highlighting ambiguities in his writing. While Lévi Strauss's influence on the study of kinship is undeniable the monograph argues that his theories though insightful need to be critically re-examined and that his vision of a final conclusive theory of kinship may still leave room for further innovation in the field. This title is part of UC Press's *Voices Revived* program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact. Drawing on a backlist dating to 1893 *Voices Revived* makes high quality peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1973.

Elementary Structures Reconsidered Francis Korn, 1973 [The Elementary Structures of Kinship](#) Claude Lévi-Strauss, 2016-05-10 Professor Lévi Strauss's first major work *Les Structures élémentaires de la Parenté* has acquired a classic reputation since its original publication in 1949 and it has become the constant focus of academic debate about central theoretical concerns in social anthropology. It is however a long and difficult book for many students to read in French and its arguments have consequently become known even among professional anthropologists largely through critical analysis. It was republished in a revised French edition in 1967 with a new foreword by the author and it is this text with his further emendations that has been used in this translation. Lévi Strauss applies his intellectual powers to the perennial problem of incest which he elucidates by means of the concept of exchange as formulated by Marcel Mauss in his famous analysis of the gift *Essai sur le don* 1925. He distinguishes two elementary modes of exchange which govern not only the conventional variety of goods and services but also the transfer of women in marriage: these are restricted and generalized exchange. With a mass of ethnographic evidence he demonstrates how the formidable intricacy of marriage customs

comprising moral and jural ideas and institutions which appear to be essentially arbitrary can be seen as local and historical rules of exchange Charles L vi Strauss traces these rules throughout a vast range of simple societies chiefly in Australia and mainland Southeast Asia but also in the Americas in Oceania and in other parts of the world To this survey he adds two extended sections on the great civilizations of China and India He continues with a briefer consideration of the passage from elementary to complex structures with particular reference to African societies and concludes with a stimulating chapter on the principles of kinship exchange as the universal basis for marriage prohibitions and the formal relations between the sexes as part of a universe of communication Although much of the work is technical consisting of detailed analyses of types of social organization with which social anthropologists will be most familiar it also contains much that will be of interest to psychologists linguists and philosophers and to all who are interested in the possibility and the technique of the structural analysis of human activity After the successes moreover of L vi Strauss s subsequent books notably *Structural Anthropology* *Tristes Tropiques* *Totemism* and *The Savage Mind* this new edition of the work which founded his present outstanding reputation will have additional value as a further means of contact with one of the original minds of this century The translation has been made by James Harle Bell and John Richard von Sturmer of the University of New England Australia and by Rodney Needham of the University of Oxford Dr Needham also acted as general editor and supplied the work with a new general index He is the translator of L vi Strauss s *Le Totemisme aujourd hui* and author of *Structure and Sentiment* 1962 and numerous papers which have contributed to the recognition of Professor L vi Strauss s work in the English speaking world

Claude Lévi-Strauss and the Making of Structural Anthropology Marcel Hénaff, 1998 As anthropology continues to transform itself this book affords a broad and balanced account of the remarkable accomplishments of one of the great intellectual innovators of the 20th century It presents an authoritative and accessible analysis of Claude Levi Strauss s research in anthropological theory and practice as well as his contributions to debates surrounding linguistics epistemology ethics and aesthetics

Engels Revisited (Routledge Revivals) Janet Sayers, Mary Evans, Nanneke Redclift, 2012-12-06 This reissued

work first published in 1987 examines the problematic and divisive attitudes which bourgeois and socialist feminists take to the question of the links between patriarchy and capitalism and the importance of class conflict as a major cause of women's subordination Engels still occupies a central role in this debate and feminists writing in the hundred years since the publication of *The Origin of the Family Private Property and the State* frequently turn to this book in an attempt to find validation for their central argument The contributors to this volume reconsider Engels theories and review evidence from those societies that have attempted to implement his belief that the key to the emancipation of women lies in their entry to social production

How Kinship Systems Change Robert Parkin, 2021-07-16 Using some of his landmark publications on kinship along with a new introduction chapter and conclusion Robert Parkin discusses here the changes in kinship terminologies and marriage practices as well as the dialectics between them The chapters also focus on a suggested trajectory linking South Asia and Europe and the specific question of the status of Crow Omaha systems The collection culminates in the argument that whereas marriage systems and practices seem infinitely varied when examined from a very close perspective the terminologies that accompany them are much more restricted

Deleuze, The Dark Precursor Eleanor Kaufman, 2012-08-09 Gilles Deleuze is considered one of the most important French philosophers of the twentieth century Eleanor Kaufman situates Deleuze in relation to others of his generation such as Jean Paul Sartre Pierre Klossowski Maurice Blanchot and Claude Lévi Strauss and she engages the provocative readings of Deleuze by Alain Badiou and Slavoj Žižek Deleuze *The Dark Precursor* is organized around three themes that critically overlap dialectic structure and being Kaufman argues that Deleuze's work is deeply concerned with these concepts even when he advocates for the seemingly opposite notions of univocity nonsense and becoming By drawing on scholastic thought and reading somewhat against the grain Kaufman suggests that these often maligned themes allow for a nuanced even positive reflection on apparently negative states of being such as extreme inertia This attention to the negative or minor category has implications that extend beyond philosophy and into feminist theory film American studies anthropology and architecture

Dictionary of Concepts in Cultural Anthropology Robert H. Winthrop, 1991-11-18 The field of cultural anthropology describes and interprets the thought and behavior of contemporary and near contemporary societies Inherently pluralistic it offers a framework in which the distinctive perspectives of each cultural world can be appreciated Robert Winthrop's dictionary describes the major concepts that have shaped the discipline both historically and theoretically It sets modern anthropology in its proper context within the broader intellectual tradition Eighty entries review the key concepts culture race nature symbolism adaptation the primitive etc that have established the fundamental problems and issues guided research and served as the focus for debate in key areas of the discipline The entries which range from 2 000 to 6 000 words in length are both thorough in treatment and contemporary in relevance Some entries are primarily of historical significance while others describe recent developments Each entry contains an annotated bibliography and a guide to additional reading on the subject While this is

not primarily a technical lexicon many terms have been glossed and explained Designed to be useful to students of anthropology this dictionary will assist those in other disciplines to find their way through the anthropological labyrinth

Theoretical Sociology Seth Abrutyn, Kevin McCaffree, 2021-03-30 Since Durkheim's influential work a century ago sociological theory has been among the most integrative and useful tools for social scientists across many disciplines Sociological theory has nevertheless due to its usefulness expanded so very broadly that some wonder whether the concept of general theory or even the attempt to link middle range theories is still of any use This book a collection of top theorists reflecting on the present and future of the craft addresses this most important question Taking their lead from Jonathan Turner's important recent work and drawing on their own broad experience Seth Abrutyn and Kevin McCaffree have organized the chapters in this book from the general integrative and review focused bookend chapters to more specific chapters on innovations in theory construction at the micro meso and macro levels Moreover the book's microsociological content on interpersonal violence solidarity identity and emotion coheres with chapters in mesosociological dynamics on class education and networks which in turn integrate with the chapters on inequality justice morality and cultural evolution found in the section on macrosociology The distinguished contributors share a distinct commitment to the development innovation and relevance of general sociological theory This volume is an invaluable sourcebook for advanced students and social science faculty interested in understanding how sociological theory's past and present are informing its future

Seeing Things Hidden Malcolm Bull, 1999 The multiplicity of the self and the inaccessibility of truth are commonplaces of contemporary thought But in *Seeing Things Hidden* they become key features of a philosophy of history that reunites emancipatory political theory with the apocalyptic tradition Apocalyptic is the revelation of things hidden But what does it mean to be hidden And why are things hidden in the first place By gently teasing out the meanings of hiddenness this book develops a new theory of apocalyptic and explores its relation to the writings of Kant Hegel Benjamin and Derrida Exploiting affinities between the work of Lukács and recent American philosophers like Rorty and Cavell Bull argues that the central dynamic of late modernity is the coming into hiding of the contradictory identities generated through political and social emancipation Drawing on analytic and Continental philosophy he articulates the most ambitious philosophy of history since Francis Fukuyama's *The End of History* presenting fresh interpretations of such icons of modernity as Hegel's master slave dialectic Benjamin's angel of history Du Bois's concept of double consciousness and Rawls's veil of ignorance
