The 1980 Guide to the Evaluation of Educational Experiences in the Armed Services: Army American Council on Education, 1980 **Department of the Army Pamphlet**, **The American Mathematical Monthly**, 1922 Includes section Recent publications **The Mathematics Teacher**, 1917 **The War of Guns and Mathematics** David Aubin, Catherine Goldstein, 2014-10-07 For a long time World War I has been shortchanged by the historiography of science Until recently World War II was usually considered as the defining event for the formation of the modern relationship between science and society In this context the effects of the First World War by contrast were often limited to the massive deaths of promising young scientists By focusing on a few key places Paris Cambridge Rome Chicago and others the present book gathers studies representing a broad spectrum of positions adopted by mathematicians about the conflict from militant pacifism to military scientific or ideological mobilization The use of mathematics for war is thoroughly examined This book suggests a new vision of the long term influence of World War I on mathematics and mathematicians Continuities and discontinuities in the structure and organization of the mathematical sciences are discussed as well as their images in various milieux Topics of research and the values with which they were defended are scrutinized This book in particular proposes a more in depth evaluation of the issue of modernity and modernization in mathematics The issue of scientific international relations after the war is revisited by a close look at the situation in a few Allied countries France Britain Italy and the USA The historiography has emphasized the place of Germany as the leading mathematical country before WWI and the absurdity of its postwar ostracism by the Allies The studies presented here help explain how dramatically different prewar situations prolonged interaction during the war and new international postwar organizations led to attempts at redrafting models for mathematical developments From Frechet Differentials to Firing Tables Alan Gluchoff, 2025-01-03 This monograph explores the history of the contribution to ballistics by the American mathematician Gilbert Ames Bliss during World War I Drawing on the then evolving calculus of variations Bliss pioneered a novel technique for solving the problem of differential variations in ballistic trajectory Called Bliss adjoint method this technique was both hailed and criticized at the time it was seen as both a triumphant application of pure mathematics to an applied problem and as a complex intrusion of higher mathematics into the jobs of military personnel not particularly interested in these matters Although he received much praise immediately after the War the details of Bliss work its furthering of pure mathematical thought and its absorption into mainstream ballistic work and instruction have never been adequately examined Gluchoff

explores the mathematics of Bliss work and the strands from which his technique was developed He then documents the efforts to make the adjoint method accessible to military officers and the conflicts that emerged as a result both between mathematicians and officers and among mathematicians themselves The eventual absorption of the adjoint method into range firing table construction is considered by looking at later technical books which incorporate it and finally its influence on the ongoing development of functional calculus is detailed From Frechet Differentials to Firing Tables will appeal to historians of mathematics physics engineering and warfare as well as current researchers professors and students in these areas
