Elements of Natural Philosophy Ernst Gottfried Fischer,1827 **The Elements of Natural Philosophy** William Thomson, One of the most celebrated scientists of the 19th century William Thomson Lord Kelvin was said to have more letters after his name than any man in the British Empire His prodigious accomplishments included both theoretical insights and significant inventions Among his contributions to theory were advances in hydrodynamics an innovative synthesis of the mathematical relationship between electricity and heat and major work in the second law of thermodynamics In the practical realm he created the absolute temperature scale which bears his name worked on the development of the first transatlantic telegraph cable and invented a telegraph receiver a compass adopted by the British Admiralty a form of analog computer for measuring tides and sounding equipment Always in the forefront of the leading scientists of the day he collaborated with James Clerk Maxwell Hermann von Helmholtz James Prescott Joule and Peter Guthrie Tait The Elements of Natural Philosophy was done with Tait a pioneering physicist and mathematician whose work in advanced algebra formed the basis of vector analysis and was instrumental in the later development of modern mathematical physics An abridgement of their original Treatise on Natural Philosophy this work was designed to be accessible to students with a basic knowledge of algebra geometry and trigonometry As such it is a book that nonspecialists can still appreciate Like Isaac Newton s great summation of natural philosophy in the late 17th century The Principia Mathematica this work remains of interest to

historians of science because it represented a similar summation of the grand synthesis that scientists building upon Newton's work envisioned at the end of the 19th century. Not long after its publication, however, was the advent of relativity and quantum physics, which considerably changed and enlarged the picture of the natural world as conceived by earlier generations of scientists.
