William Jaffe's Essays on Walras William Jaffé, 1983-05-31 Essays on the life and work of L on Walras the founder of general equilibrium analysis *Guide to Reprints* ,2009 **Economics Selections** ,1970 *Italian Economists of the 20th Century* Ferdinando Meacci, 1998-01-01 Italian Economists of the 20th Century provides a unique up to date assessment and appreciation of the work of 12 pioneering economists The essays written by a group of leading international scholars are a fitting tribute to the important contribution that Italian economists have made to 20th century economics *The Evolution of Economic Institutions* Geoffrey Martin Hodgson, 2007-01-01 This volume documents in a unique manner the momentum the institutionalist evolutionary research agenda has regained over the past two decades The thought provoking contributions come from prominent authors with a rather heterogeneous theoretical background Nonetheless they all convene in elaborating on issues that have always been at the core of the institutionalist agenda and show how these issues relate to cutting edge research in modern economics Ulrich Witt Max Planck Institute of Economics Jena Germany This excellent EAEPE Reader brings together a range of perspectives on the role of institutions in economics It is very well structured with parts on microeconomics macroeconomics markets and economic evolution Each part contains chapters written by renowned experts in their respective fields and there is an authoritative introductory chapter by the editor This Reader is invaluable for economics students and academic economists wishing to better understand how institutions and individual behaviours interact in the economic system Much of standard economic analysis either ignores institutions or makes overly restrictive assumptions about them the authors in this book show persuasively that economics without an adequate treatment of institutions and institutional change is of very little scientific worth John Foster The University of Queensland Australia This is a great set of essays To get the richness they contain the reader must be already familiar with the broad orientation of the literature on economic institutions Given that background I can think of no collection or essays that frame illuminate and probe modern institutional economics as well as does this set Geoffrey Hodgson who chose the collection and the authors of the essays are to be congratulated and thanked Richard R Nelson Columbia University US It is now widely acknowledged that institutions are a crucial factor in economic performance Major developments have been made in our understanding of the nature and evolution of economic institutions in the last few years This book brings together some key contributions in this area by leading internationally renowned scholars including Paul A David Christopher Freeman Alan P Kirman Jan Kregel Brian J Loasby J Stanley Metcalfe Bart Nooteboom and Ugo Pagano This essential reader covers topics such as the relationship between institutions and individuals institutions and economic development the nature and role of markets and the theory of institutional evolution The book not only outlines cutting edge developments in the field but also indicates key directions of future research for institutional and evolutionary economics Vital reading on one of the most dynamic and rapidly growing areas of research today The Evolution of Economic Institutions will be of great interest to

researchers students and lecturers in economics and business studies *The Reprint Bulletin* ,1978 Marginal Revolution in Economics Toru Maruyama,2024-01-02 This volume is devoted to a reappraisal of the Marginal Revolution on the occasion of its 150th anniversary The year 1871 should be remembered as one of the most important turning points in the history of economics W S Jevons C Menger and L Walras published epochal works at the very beginning of the 1870s Although these works were written independently they shared a common mathematical structure based on classical analysis For this reason the emergence of the trio is called the Marginal Revolution Indeed 1871 is the starting point of modern economics in the proper sense In 1971 several academic conferences were held on the occasion of the 100th anniversary of the Revolution which exerted the stimulating influence upon the historical researches into the Revolution Now more than fifty years have passed since then Economic theory has experienced further substantial changes in researchers central interest the way of reasonings and the styles of description during this period In view of the new achievements acquired in recent fifty years it seems an indispensable task for us to review and reevaluate the Marginal Revolution based upon the present status of economics We also keep in mind that some concepts and doctrines once discarded could reappear in a later stage of history in a more or less transfigured form The introductory chapter will be a guide for readers not only from the economics community but also from the mathematics community *HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY -Volume III* Pablo Lorenzano,Hans-Jörg Rheinberger,Eduardo Ortiz and Carlos Delfino Galles,2010-09-27 History and Philosophy of Science and Technology is a component of Encyclopedia of Physical Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on History and Philosophy of Science and Technology in four volumes covers several topics such as Introduction to the Philosophy of Science The Nature and Structure of Scientific Theories Natural Science A Short History of Molecular Biology The Structure of the Darwinian Argument In The Origin of Species History of Measurement Theory Episodes of XX Century Cosmology A Historical Approach Philosophy of Economics Social Sciences Historical And Philosophical Overview of Methods And Goals Introduction to Ethics of Science and Technology The Ethics of Science and Technology The Control of Nature and the Origins of The Dichotomy Between Fact And Value Science and Empires The Geo Epistemic Location of Knowledge Science and Religion Scientific Knowledge and Religious Knowledge Significant Epistemological Reference Points Thing Called Philosophy of Technology Transitions from Function Oriented To Effect Oriented Technologies Some Thought on the Nature of Modern Technology Technical Agency and Sources of Technological Pessimism These four volumes are aimed at a broad spectrum of audiences University and College Students Educators and Research Personnel **Calendar** University of Calcutta,1929 Includes Examination Papers Economic Growth and Long Cycles Nikolaos Chatzarakis,Persefoni Tsaliki,Lefteris Tsoulfidis,2024-06-03 Contemporary capitalism is characterized by periods of vigorous economic growth and periods of slow or even negative growth This book draws on the classical political

economy approach to consider both economic cycles and economic growth and draw conclusions about the inherent instability of the modern economy The book shows that the work of the old classical economists Smith and Ricardo and Marx is theoretically sound and capable of providing answers to both growth and cycles It also demonstrates the potential and natural integration of growth and cycles in a single model The microeconomic foundation of this model is the labor theory of value which continues with the General Law of Capital Accumulation the Law of the Falling Rate of Profit and the movement of the Industrial Reserve Army of Labour Finally a dynamic model of growth cum cycles is constructed consisting of the evolution and interaction of five key variables namely the rate of profit the propensity to invest in fixed capital technological change the reserve army of labour and the rate of capital devaluation The analysis demonstrates that economic growth and cycles are not disconnected from each other as they have been treated in the literature but rather interdependent aspects of the same evolutionary process of a capitalist economy This book will interest readers in the history of economic thought economic growth and development macroeconomics and political economy The Evolution of Economic Ideas Phyllis Deane,1978-10-05 An introduction to the history of economics for undergraduate students Puts some of the current theoretical controversies into long term perspective by tracing their historical antecedents and parallels Interpreting Classical Economics Heinz Kurz,Neri Salvadori,2007-07-12 First Published in 2007 Routledge is an imprint of Taylor Francis an informa company **The Calendar** University of Calcutta,1919 **Core Concepts in Sociology** J. Ayres,2021-07-27 Eminent physicist and economist Robert Ayres examines the history of technology as a change agent in society focusing on societal

roots rather than technology as an autonomous self-perpetuating phenomenon. With rare exceptions, technology is developed in response to societal needs that have evolutionary roots and causes. In our genus *Homo*, language evolved in response to a need for our ancestors to communicate both in the moment and to posterity. A band of hunters had no chance in competition with predators that were larger and faster without this type of organization, which eventually gave birth to writing and music. The steam engine did not leap fully formed from the brain of James Watt. It evolved from a need to pump water out of coal mines driven by a need to burn coal instead of firewood in turn due to deforestation. Later, the steam engine made machines and mechanization possible. Even quite simple machines increased human productivity by a factor of hundreds if not thousands. That was the Industrial Revolution. If we count electricity and the automobile as a second industrial revolution and the digital computer as the beginning of a third, the world is now on the cusp of a fourth revolution led by microbiology. These industrial revolutions have benefited many in the short term but devastated the Earth's ecosystems. Can technology save the human race from the catastrophic consequences of its past success? That is the question this book will try to answer.

Economic Wealth Creation and the Social Division of Labour Robert P. Gilles, 2018-07-26. This textbook introduces and develops new tools to understand the recent economic crisis and how desirable economic policies can be adopted. Gilles provides new institutional concepts for wealth creation such as network economies, which are based on the social division of labour. This volume investigates the formation of networks and hierarchical authority organisations with a focus on the role of trust. Gilles also looks at the theory of growth and development using real-world examples and problem sets to put into practice. This title is suitable reading for undergraduate MSc and postgraduate students in microeconomic analysis, economic theory, and political economy.

Development of Economic Analysis Ingrid H. Rima, 2009-01-13. Now in its seventh edition, Ingrid Rima's classic textbook charts the development of the discipline from the classical age of Plato and Aristotle through the middle ages to the first flowering of economics as a distinct discipline, the age of Petty, Quesnay, and Smith, to the era of classical economics and the marginalist revolution. The book then goes on to offer extensive coverage of the twentieth century, the rise of Keynesianism, econometrics, the Chicago School, and the neoclassical paradigm. The concluding chapters analyze the birth of late twentieth-century developments such as game theory, experimental economics, and competing schools of economic thought. This text includes a number of practical features: a family tree at the beginning of each section illustrating how the different developments within economics are interlinked; the inclusion of readings from the original key texts; a summary and questions to discuss along with glossaries and suggestions for further reading. This book provides the clearest, most readable guide to economic thought that exists and encourages students to examine the relevance of the discipline's history to contemporary theory.

Competition, Value and Distribution in Classical Economics Heinz D. Kurz, Neri Salvadori, 2022-03-09. Drawing in particular on the work of Sraffa, Smith, Ricardo, and Marx, the essays in this volume explore the characteristic features of the Classical economists' approach to economic problems and the renewal of

interest in that approach in modern times In recent years new material has been made available on both Sraffa and Marx which have made new insights and interpretations possible The release of Sraffa's hitherto unpublished papers and correspondence has led to reconsideration of doctrinal questions such as to what extent Sraffa built upon or deviated from the analyses of Adam Smith David Ricardo and other representatives of the classical British school and Karl Marx A major theme is also to what extent we can today equipped with Sraffa's insights and analytical tools re-interpret and develop ideas of classical authors which they could present only in primitive forms on technological progress exhaustible resources and other contemporary issues On Marx the publication of the MEGA2 edition of the works papers and correspondence of Marx and Engels also gives rise to a reconsideration of this relationship given Marx's disenchantment with some of his own work and return to ideas advocated by Ricardo especially as regards the long term tendency of the rate of profits Finally the classical notion of competition and monopoly deserve to be scrutinized carefully again and frequent misinterpretations in the literature refuted This volume is vital reading for scholars of classical economics Marx and Sraffa and the history of economic thought more broadly It also deals with issues in the areas of machinery and technical progress joint production and economic development and growth

Essays on Classical and Marxian Political Economy Samuel Hollander, 2013-02-11

Samuel Hollander's work has been provoking debate for over four decades This book brings together key contributions of recent years in addition to some brand new pieces The essays are introduced by a Preface in which Hollander reflects on his past work and reactions to it Highlights include two issues of particular current relevance Conspicuous is an extensive chapter regarding Adam Smith's often neglected arguments for government intervention in the economy to correct market failures and his critical view of the business class as an anti-social force Important economists considered in relation to Adam Smith's position on the role of the state include Jeremy Bentham and the Scottish Canadian John Rae Similarly of high present day interest is a re-examination of Karl Marx's theory of exploitation or the notion of profits as embezzlement demonstrating Marx's effective abandonment of this perspective in the case of the small active businessman as distinct from the major joint stock corporation Other papers demonstrate the close intellectual relationship between David Ricardo and Thomas Robert Malthus the extensive common ground between the British school and the French under the leadership of Jean Baptiste Say the failure of a so-called anti-Ricardian opposition in Britain represented by Samuel Bailey and the denial of a sharp discontinuity between classical and later neo-classical economics Finally several biographical essays are included as well as an extension of the autobiographical account appearing in *Collected Essays II*

A History of Economic Thought Lionel Robbins, 2000-10-16

Lionel Robbins's now famous lectures on the history of economic thought comprise one of the greatest accounts since World War II of the evolution of economic ideas This volume represents the first time those lectures have been published Lord Robbins 1898-1984 was a remarkably accomplished thinker writer and public figure He made important contributions to economic theory methodology and policy analysis directed the economic section of Winston

Churchill's War Cabinet and served as chairman of the Financial Times. As a historian of economic ideas he ranks with Joseph Schumpeter and Jacob Viner as one of the foremost scholars of the century. These lectures delivered at the London School of Economics between 1979 and 1981 and tape recorded by Robbins's grandson display his mastery of the intellectual history of economics, his infectious enthusiasm for the subject and his eloquence and incisive wit. They cover a broad chronological range beginning with Plato, Aristotle and Aquinas, focusing extensively on Adam Smith, Thomas Malthus and the classicals and finishing with a discussion of moderns and marginalists from Marx to Alfred Marshall. Robbins takes a varied and inclusive approach to intellectual history. As he says in his first lecture, 'I shall go my own sweet way, sometimes talk about doctrine, sometimes talk about persons, sometimes talk about periods.' The lectures are united by Robbins's conviction that it is impossible to understand adequately contemporary institutions and social sciences without understanding the ideas behind their development. Authoritative yet accessible, combining the immediacy of the spoken word with Robbins's exceptional talent for clear, well-organized exposition, this volume will be welcomed by anyone interested in the intellectual origins of the modern world.
