e-Learning in Aviation Suzanne Kearns, 2016-04-29 Whereas traditional classroom instruction requires pilots to be pulled off the line a training facility to be maintained and instructors to be compensated e learning is extremely cost effective and therefore an attractive alternative However e learning only saves money if the training is effective Eager to reap financial benefits e learning courses have a history of varying dramatically in quality The poorest courses are those that directly convert classroom based presentations to an online format not recognizing that computer based instruction is an entirely different medium Addressing this issue directly e Learning in Aviation explores the characteristics of computer based course design and multimedia that are associated with improved learning It then provides guidance regarding how to use research based instructional design principles to plan design develop and implement an e Learning course within an aviation organization and continually evaluate whether or not the course is accomplishing instructional goals A blended learning strategy which incorporates both face to face and computer based instruction is suggested as the most appropriate choice for the majority of aviation companies The goal of this approach is to utilize e Learning as a tool to reduce time at the training centre and thereby increase pilot productivity and potentially improve the quality of training Although the examples within this book focus on pilot training the suggestions and guidelines are applicable to all employee groups within the industry

Corporate E-Learning Luther Tai, 2008 Corporate e learning has become increasingly important in the contemporary universal access business world and can provide strategic and competitive advantages to corporations as a way to accelerate training and reduce the high costs of face to face learning programs However most of the books that are written about e learning do not describe in detail how corporate e learning is actually implemented within a specific company Corporate E Learning fills that gap by describing in depth how e learning programs are developed and instituted and how their effectiveness is measured from the perspective of practicing e learning professionals at IBM an early and liberal user of e learning technologies to train their global workforce Drawing on a wealth of in person interviews of numerous e learning professionals at IBM as well as recent e learning literature Tai discusses how IBM has significantly contributed to the evolution of corporate e learning In the course of doing so he makes useful comparisons with other companies and industries and draws conclusions that are applicable to any company considering utilizing e learning Companies should be careful concludes Tai to use e learning only when it makes strategic and economic sense not simply because the technology is available In addition e learning should always be used along with other more traditional means of learning and carefully monitored by feedback mechanisms to measure whether its objectives have been accomplished and how e learning programs might improve in the future Corporate E Learning is designed for classroom use in technology management courses and will also appeal to corporate professionals who are involved in training human resources development and performance improvement
