We first of all commenced by using short manuscript accounts of the various processes and instruments for the use of our students. This although satisfactory as far as it went was found insufficient and had to be supplemented by references to books not always accessible Learning from various guarters the desirability of a simple yet systematic treatise on physical instruments we were at length induced to undertake the task ourselves It was first proposed to publish the whole in one volume but as the matter grew under our hands it was suggested to us by Professor Sir Henry Roscoe that it might be advantageously published in three volumes This arrangement will we imagine be convenient for students who wish to cultivate some particular branch of physical inquiry The present volume will we hope be followed in due course by one on Electricity and Magnetism and our work will be rendered complete by a third on Heat Light and Sound About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www forgottenbooks com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition.
