Elementary School Teachers' Beliefs about Teaching Environmental Education Susan E. Middlestadt, Rebecca Ledsky, Julie Sanchack, 1999 **Beliefs about Teaching Environmental Education Held by Trained Elementary School Teachers** Susan E. Middlestadt, Rebecca Ledsky, Julie Sanchack, Academy for Educational Development, North American Association for Environmental Education, 1997* **The Science Teaching Efficacy Belief Instruments (STEBI A and B)** James Deehan, 2016-07-28 The purpose of this Springer Brief is to provide a comprehensive review of both the STEBI methods and findings through the use of a clearly defined analytic framework A systematic review of literature yielded 107 STEBI A research items and 140 STEBI B research items The STEBI instruments have been used in a wide range of qualitative cross sectional longitudinal and experimental designs Analysis of the findings of the papers reveals that in service and pre service programs that use innovative practices such as cooperative learning inquiry based investigation and nature of science instruction can produce positive growth in participants science teaching efficacy beliefs The personal science teaching efficacy beliefs of pre service and in service teachers showed greater mean scores and higher growth than their outcome expectancies Implications are discussed *Handbook of Research on Science Education* Sandra K. Abell, Norman G. Lederman, 2013-03-07 This state of the art research Handbook provides a comprehensive coherent current synthesis of the empirical and theoretical research concerning teaching and learning in science and lays down a foundation upon which future research can be built The contributors all leading experts in their research areas represent the international and gender diversity that exists in the science education research community As a whole the Handbook of Research on Science Education demonstrates that science education is alive and well and illustrates its vitality It is an essential resource for the entire science education community including veteran and emerging researchers university faculty graduate students practitioners in the schools and science education professionals outside of universities The National Association for Research in Science Teaching NARST endorses the Handbook of Research on Science Education as an important and valuable synthesis of the current knowledge in the field of science education by leading individuals in the field For more information on NARST please visit <http://www.narst.org> **The Inclusion of Environmental Education in Science Teacher Education** Alec Bodzin, Beth Shiner Klein, Starlin Weaver, 2010-08-13 In the coming decades the general public will be required ever more often to understand complex environmental issues evaluate proposed environmental plans and understand how individual decisions affect the environment at local to global scales Thus it is of fundamental importance to ensure that higher quality education about these ecological issues raises the environmental literacy of the general public In order to achieve this teachers need to be trained as well as classroom practice enhanced This volume focuses on the integration of environmental education into science teacher education The book begins by providing readers with foundational knowledge of environmental education as it applies to the discipline of science education It relates the historical

and philosophical underpinnings of EE as well as current trends in the subject that relate to science teacher education. Later chapters examine the pedagogical practices of environmental education in the context of science teacher education. Case studies of environmental education teaching and learning strategies in science teacher education and instructional practices in K-12 science classrooms are included. This book shares knowledge and ideas about environmental education pedagogy and serves as a reliable guide for both science teacher educators and K-12 science educators who wish to insert environmental education into science teacher education. Coverage includes everything from the methods employed in summer camps to the use of podcasting as a pedagogical aid. Studies have shown that schools that do manage to incorporate EE into their teaching programs demonstrate significant growth in student achievement as well as improved student behavior. This text argues that the multidisciplinary nature of environmental education itself requires problem solving, critical thinking, and literacy skills that benefit students work right across the curriculum.

Primary Mathematics: Extending Knowledge in Practice Alice Hansen, 2008-06-09

Still the biggest concern for many on initial teacher training courses is the acquisition of subject knowledge and the ability to translate that into effective teaching. This book addresses this by building on the core subject knowledge covered in the Achieving QTS series and relating it to classroom practice. It supports trainees in extending and deepening their knowledge of Maths and demonstrating how to apply it to planning and implementing lessons. Practical and up-to-date teaching examples are used to clearly contextualize subject knowledge. A clear focus on classroom practice helps trainees to build confidence and develop their own teaching strategies.

Statistical models attempt to describe and quantify relationships between variables. In the models presented in this chapter, there is a response variable, sometimes called dependent variable, and at least one predictor variable, sometimes called independent or explanatory variable. When investigating a possible cause and effect type of relationship, the response variable is the putative effect and the predictors are the hypothesized causes. Typically, there is a main predictor variable of interest; other predictors in the model are called covariates. Unknown covariates or other independent variables not controlled in an experiment or analysis can affect the dependent or outcome variable and mislead the conclusions made from the inquiry.

Bock Velleman given the model p is the probability that a relationship is seen by mere chance. The smaller the p value, the more confident we can be that the pattern seen in the data is not random. In the type of models examined here, the R measures the proportion of the variation in the response variable that is explained by the predictors specified in the model. If R is close to 1, then almost all the variation in the response variable has been explained. This measure is also known as the multiple correlation coefficient. Statistical studies can be grouped into two types: experimental and observational.

Environmental Education in Primary Classrooms Jane Edwards,2015-10-26 The effectiveness of Education for Sustainable Development depends on the ability of schools and teachers to embrace pedagogies that reduce the gap between the rhetoric of education for the environment and the reality of classroom practices This book responds to the need to better understand the nature of the relationships between agency and structure that contribute to the development of educational rhetoric reality gaps in order to inform processes that most effectively facilitate pedagogical change This book explores the issues of pedagogical change through the experiences of Australian primary school teachers faced with the challenge of implementing an environmental education program in which young students were positioned as active participants in the social processes from which environmentally sustainable practices could be developed These teachers were required to adopt pedagogies that often represented the antithesis of their well established teacher directed approaches Through the use of Anthony Giddens Theory of Structuration this book provides unique perspectives of the teacher mediated manner in which certain elements of structure and agency interrelate to enable and constrain classroom practices essential understandings for school principals and educational policy developers who aim to effectively implement pedagogical change This book also demonstrates that the Theory of Structuration provides a valuable ontological research framework and provides social researchers with practical guidance for how to relate this theory to specific research issues [Current Index to Journals in Education](#) ,2001 [Interculturality in Schools](#) Robyn Moloney,Maria Lobytsyna,John De Nobile,2022-07-26 This book provides a comprehensive study of professional learning courses in intercultural settings exploring how this impacts teachers and brings about change in classrooms culture across schools as a whole and children s lives The authors argue that teachers

and schools must raise the stakes globally in an intercultural practice grounded in educational equity and anti racism Identifying the attributes that make a difference in teacher intercultural learning and change through analysis of both quantitative and qualitative data the study throws up marked tensions and contradictions between the desire to explore both an abstract personal concept and achieve practical outcomes in schools As case studies of two primary schools dig deep into teachers lives the book proposes a model of personal teacher interculturality which is constructed from the inside out The potential of neglected spaces in schools for intercultural identity is also highlighted by images of new practice This book is a supportive resource for schools or educational institutions in any global context that are seeking a fresh approach to intercultural education and holistic change
