Understanding China's Legal System C. Stephen Hsu, 2003-03 Annotation View the Table of Contents Read the Introduction Understanding China through Big Data Yunsong Chen, Guangye He, Fei Yan, 2021-07-14 Chen He and Yan present a range of applications of multiple source big data to core areas of contemporary sociology demonstrating how a theory guided approach to macrosociology can help to understand social change in China especially where traditional approaches are limited by constrained and biased data In each chapter of the book the authors highlight an application of theory guided macrosociology that has the potential to reinvigorate an ambitious open minded and bold approach to sociological research These include social stratification social networks medical care and online behaviours among many others This research approach focuses on macro level social process and phenomena by using quantitative models to statistically test for associations and causalities suggested by a clearly hypothesised social theory By deploying theory oriented macrosociology where it can best assure macro level robustness and reliability big data applications can be more relevant to and guided by social theory An essential read for sociologists with an interest in quantitative and macro scale research methods which also provides fascinating insights into Chinese society as a demonstration of the utility of its methodology **Understanding China's New Common Prosperity** Liu Yuanchun, Song Yang, Wang Fei, Zhou Guangsu, 2024-01-16 This book explains China s new common prosperity policies their significance connotations and goals and explains the economic logic behind these often misunderstood policies First the authors explain the theory behind common prosperity Why is the Chinese government changing its economic policies now and what is its objectives and metrics The authors then go on to explain how the new policies are being designed what the test cases are across the country and how the government businesses families and individuals are working together to promote common prosperity An important book that will help scholars around the world understand China s new economic bottom line This book will be of interest to economists sociologists and sinologists **Teaching in Primary Schools in China and India** Nirmala Rao, Emma Pearson, Kai-ming Cheng, Margaret Taplin, 2013-02-11 This book compares primary education in urban and rural China and India It focuses on how the sociocultural context including educational policy educators and parents beliefs and the conditions under which teaching and learning occur shape classroom pedagogy and determine children s attainment This in depth authentic comparative analysis of the two largest educational systems in the world is a must read for scholars interested in the teaching and learning in these two rapidly developing Asian cultures A common set of questions has been addressed in diverse contexts The empirical work on which this book is based is most impressive videotaping of mathematics and language lessons interviews with parents and educators questionnaires with parents teachers and children and tests of children s mathematics attainment and this done in 3 locations in China 3 in India and 12 schools in total **Carbon, Nitrogen and Phosphorus Cycling in Forest Soils** Robert G. Qualls, 2019-06-21 The majority of carbon stored in the soils

of the world is stored in forests The refractory nature of some portions of forest soil organic matter also provides the slow gradual release of organic nitrogen and phosphorus to sustain long term forest productivity Contemporary and future disturbances such as climatic warming deforestation short rotation silviculture the invasion of exotic species and fire all place strains on the integrity of this homeostatic system of C N and P cycling On the other hand the CO₂ fertilization effect may partially offset losses of soil organic matter but many have questioned the ability of N and P stocks to sustain the CO₂ fertilization effect Despite many advances in the understanding of C N and P cycling in forest soils many questions remain For example no complete inventory of the myriad structural formulae of soil organic N and P has ever been made The factors that cause the resistance of soil organic matter to mineralization are still hotly debated Is it possible to engineer forest soil organic matter so that it sequesters even more C The role of microbial species diversity in forest C N and P cycling is poorly understood The difficulty in measuring the contribution of roots to soil organic C N and P makes its contribution uncertain Finally global differences in climate soils and species make the extrapolation of any one important study difficult to extrapolate to forest soils worldwide

findings and outlines how it can assure the quality of care Systems of accreditation for measuring and improving quality are described and show how they can be used easily and effectively to meet the challenges of the new NHS It is clear concise and relevant to all the current changes in healthcare provision All those responsible for delivering a service based on clinical and cost effectiveness will find it essential reading In the United Kingdom primary health care is based almost wholly on general practice From April 1999 all general practices will belong to primary care groups Questions of quality and accountability will be high on their agenda as part of the new arrangements for clinical governance This book on accreditation in primary care is therefore most timely Sir Donald Irvine President General Medical Council in the Introduction **Poland China Journal**,1921 Building the Foundation: Whole Numbers in the Primary Grades Maria G. Bartolini Bussi,Xu Hua Sun,2018-03-29 This twenty third ICMI Study addresses for the first time mathematics teaching and learning in the primary school and pre school setting while also taking international perspectives socio cultural diversity and institutional constraints into account One of the main challenges of designing the first ICMI primary school study of this kind is the complex nature of mathematics at the early level Accordingly a focus area that is central to the discussion was chosen together with a number of related questions The broad area of Whole Number Arithmetic WNA including operations and relations and arithmetic word problems forms the core content of all primary mathematics curricula The study of this core content area is often regarded as foundational for later mathematics learning However the principles and main goals of instruction on the foundational concepts and skills in WNA are far from universally agreed upon and practice varies substantially from country to country As such this study presents a meta level analysis and synthesis of what is currently known about WNA providing a useful base from which to gauge gaps and shortcomings as well as an opportunity to learn from the practices of different countries and contexts
