elements of an abstract human species specific cognitive computational process We conjecture that the fundamental technical concepts of counterpoint plausibly form the basis of natural musical logic and coherence and somehow reflect the basis of a representing system for a generative capacity evidenced in the creation and interpretation of musicalistic expressions It is plausible to assume that a thorough investigation of the musical generating principles of consonance and dissonance as developed through the technical perspective of species counterpoint can lead to surprising insights necessary for the formulation of a general theory of music Music like language is obviously an extremely complex system Music theory must simplify this complexity and endeavour to discover its primitive elements which can be used to develop a systematic representation of levels that contributes to greater descriptive and explanatory salience of musicalistic structure Bee Gees, Process and Latent Elements in Music Production Pat O'Grady,2024-11-26 This book examines the creative process of the Bee Gees and the latent elements that shaped their sound From their formative Australian work to the highs of their disco years and the scores of songs they wrote and produced for other artists the Bee Gees catalogue is vast and varied It is also distinctive Songs feature their signature falsetto vocals close three part harmony and knack for pop songwriting This book takes a unique approach to the musicology of music production It analyzes processual accounts and demo recordings to uncover what are defined as the latent elements of music production such as instruments lyrics meanings space sounds and recording techniques that are crucial in shaping the completed recordings but are absent from what we hear It is a must read book for music production academics and students as well as anyone interested in the Bee Gees creative process Harvard Dictionary of Music Willi Apel,1969 Contains nearly 1000 pages of precise and accessible information on all musical subjects
