Trautmann, 2015-08-03 Because of their enormous size elephants have long been irresistible for kings as symbols of their eminence In early civilizations such as Egypt Mesopotamia the Indus Civilization and China kings used elephants for royal sacrifice spectacular hunts public display of live captives or the conspicuous consumption of ivory all of them tending toward the elephant s extinction The kings of India however as Thomas R Trautmann shows in this study found a use for elephants that actually helped preserve their habitat and numbers in the wild war Trautmann traces the history of the war elephant in India and the spread of the institution to the west where elephants took part in some of the greatest wars of antiquity and Southeast Asia but not China significantly a history that spans 3 000 years and a considerable part of the globe from Spain to Java He shows that because elephants eat such massive

quantities of food it was uneconomic to raise them from birth Rather in a unique form of domestication Indian kings captured wild adults and trained them one by one through millennia Kings were thus compelled to protect wild elephants from hunters and elephant forests from being cut down By taking a wide angle view of human elephant relations Trautmann throws into relief the structure of India s environmental history and the reasons for the persistence of wild elephants in its forests

**Warfare in the Ancient World**  
 Brian Todd Carey, Joshua B. Allfree, John Cairns, 2006-01-19. An interesting study of the development of military organization and strategy across several millennia from Bronze Age Mesopotamia to the last days of Rome. The Pegasus Archive. *Warfare in the Ancient World* explores how civilizations and cultures made war on the battlefields of the Near East and Europe between the rise of civilization in Mesopotamia in the late fourth millennium BC and the fall of Rome. Through an exploration of twenty-six selected battles, military historian Brian Todd Carey surveys the changing tactical relationships between the four weapon systems: heavy and light infantry and heavy and light cavalry, focusing on how shock and missile combat evolved from tentative beginnings in the Bronze Age to the highly developed military organization created by the Romans. The art of warfare reached a very sophisticated level of development during this three-millennia span. Commanders fully realized the tactical capabilities of shock and missile combat in large battlefield situations. Modern principles of war like the primacy of the offensive, mass and economy of force were understood by pre-modern generals and applied on battlefields throughout the period. Through the use of dozens of multiphase tactical maps, this fascinating introduction to the art of war during western civilizations' ancient and classical periods pulls together the primary and secondary sources and creates a powerful historical narrative. The result is a synthetic work that will be essential reading for students and armchair historians alike. An ambitious book that sets out to cover four and a half thousand years of military history from the rise of the first civilizations in the Near East to the fall of the Western Roman Empire.

It begins with an examination of the cultural features that made warfare in the region unique, followed by a discussion of the main weapons used and the two major sites of fighting: sieges and naval contests. Three chapters examine the role played by animals such as elephants and horses. The final two chapters examine the shift from mercenary armies and masses of levies to smaller standing armies.
