mammoth perhaps the most popular extinct animal outside of the dinosaurs Standing around 10 feet tall and weighing several tons woolly mammoths seem like the stuff of legend but ancient cave art indicated that unlike dinosaurs woolly mammoths were contemporaries of early humans with the last ones going extinct only about 4 000 years ago All of that explains why people have long been fascinated by woolly mammoths and have even envisioned bringing them back to life via genetics sometime in the future Woolly Mammoths The History and Legacy of the Most Famous Extinct Elephant Species looks at the geological origins of the creatures and analyzes the fossil finds
