text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1893 edition Excerpt We of the present times call an age a century They of Plato's day the initiated writers at any rate by a millennium meant not 1 000 but 100 000 years while the Hindus more independent than any have never concealed their chronology Thus for 9 000 years the Initiates will read 900 000 years during which space of time i e from the first appearance of the Aryan Race when the Pliocene portions of the once great Atlantis began gradually sinking and other continents to appear on the surface down to the final disappearance of Plato's small island of Atlantis A the Aryan races had never ceased to fight with the descendants of the first giant races This war lasted till nearly the close of the age which preceded the Kali Yuga and was the Mahabharata or Great War so famous in Indian history Such blending of events and epochs and the bringing down of hundreds of thousands into thousands of years does not interfere with the numbers of years that have elapsed according to the statement made by the Egyptian priests to Solon since the destruction of the last portion of Atlantis The 9 000 years were the correct figures The latter event had never been kept a secret and had only faded out of the memory of the Greeks The Egyptians had their records complete because of their isolation being surrounded by sea and desert they had been left untrammelled by other nations till about a few millenniums before our era History catches a glimpse of Egypt and its great Mysteries for the first time through Herodotus if we do not take into account the Bible and its queer chronology And how little Herodotus could tell is confessed by himself when speaking of a mysterious tomb of an Initiate at Sais in the sacred precinct
