Eric Higgs,Andrew Light,David Strong,2010-12-15 Can we use technology in the pursuit of a good life or are we doomed to having our lives organized and our priorities set by the demands of machines and systems How can philosophy help us to make technology a servant rather than a master Technology and the Good Life uses a careful collective analysis of Albert Borgmann's controversial and influential ideas as a jumping off point from which to address questions such as these about the role and significance of technology in our lives Contributors both sympathetic and critical examine Borgmann's work especially his device paradigm apply his theories to new areas such as film agriculture design and ecological restoration and consider the place of his thought within philosophy and technology studies more generally Because this collection carefully investigates the issues at the heart of how we can take charge of life with technology it will be a landmark work not just for philosophers of technology but for students and scholars in the many disciplines concerned with science and technology studies

Central Eastern European Minorities after WWI represents the result of research that the author has carried over recent years and was facilitated by the 2008 PRIN project Programmi di Ricerca di Rilevante Interesse Nazionale and the 2010 Sapienza Research funds The book analyses the conditions of national minorities after World War I when the geo political

map of Central Eastern Europe was redefined by international diplomacy The new settlements were based on the principle of national self determination and were conditioned by the geographic reality of Central Eastern Europe where states and nations rarely coincided The second volume of the book analyses some special aspects of this question and focuses on the interpretation of some particular cases which had an outstanding role in the definition of the international framework The massacres of the Armenians in the Ottoman Empire and of the Jews in Eastern Europe for example alarmed the international community and contributed to the 1919 emergency of minority rights The role of Kin States such as Germany and Hungary instead characterized the entire interwar period and conditioned the stability of Europe and the League of Nations Finally special cases like those of Slovakia and Bosnia are also helpful in understanding the ideas of nation and minority and how conceptualisations of the latter have changed throughout the last century
