Forgotten Flies:

Forgotten Flies Paul Schmookler, Ingrid V. Sils, 1999-01-01 **Making Death Matter** Tara Mehrabi, 2016-11-18 This thesis is a contribution to feminist laboratory studies and a critical engagement with the natural sciences or more precisely research on the biochemical workings and deadly relations of Alzheimer's disease emanating from a year of field work in a Drosophila fly lab. The natural sciences have been a point of fascination within the field of gender studies for decades. Such sciences produce knowledge on what gets to count as nature and natural, healthy or sick, normal or not, and they have done it with great societal authority and impact throughout European modernity. However, feminist technoscience scholars argue that science and knowledge is socially produced and political too. Concepts such as nature, animal, human body, sex, and life itself are not simply given, natural realities but phenomena processed through the naturecultures of the laboratory. Situated within such theoretical and methodological approaches, this thesis wonders how scientific facts about Alzheimer's disease are made in the lab today. What kinds of realities, bodies, and ethico-political concerns are enacted? Who gets to live and who gets to die in everyday laboratory practices? Theoretically, the thesis is grounded particularly within Karen Barad's agential realism and posthumanist performativity, and as such it accounts for human and nonhuman entanglements through which AD is performed in the lab in relational ways. In other words, the thesis explores how AD is enacted in the bodies of transgenic fruit flies, *Drosophila melanogaster*, as these flies embody the disease, live and die with it. Last but not least, the thesis explores the materialities of death, dying, embodiment, and biological waste in a biochemistry lab as constitutive parts of the produced knowledge about AD.

Denna avhandling utgör ett bidrag till feministiska laboratoriestudier och är en kritisk analys av naturvetenskaperna. Närmar sig det en feministisk studie av forskning om Alzheimers sjukdom, dess biokemiska verkningar och de olika relationer utifrån ett forskningsfältarbete som labbtekniker i ett flyglabb. Naturvetenskaperna har under decennier fascinerat genusforskare. Dessa discipliner formar kunskapen om vad som är knas, som natur och naturligt, hlsa och sjukdom, normalt eller inte, och de har gjort sig med stor samhällslig auktoritet genom Europeisk modernitet. Forskare inom feministiska teknovetenskapliga studier har länge påvisat att vetenskap också är social praktik med politiska implikationer. Begrepp som natur, djur, maskligt eller kropp, kön och livet självt kan inte tas för givna utan formas också i laboratoriets naturkultur. Med utgångspunkt i sådana feministiska teknovetenskapliga teoribildningar och metodologiska utgångspunkter bearbetar denna avhandling frågor om hur vetenskapliga fakta om Alzheimers sjukdom skapas i laboratoriet idag. Vilka kroppar, verkligheter och etiska politiska förhållningssätt aktualiseras? Vem får leva och vem får dö i vardagliga laboratoriepraktiker? Teoretiskt bygger avhandlingen framför allt på Karen Barads agentiella realism, när den diskuterar sammanväningen mellan maskligt och icke maskligt, samt det som kallas posthumanistisk performativitet i relation till Alzheimers sjukdom, som den förkroppsligas i transgena fruktflugor *Drosophila melanogaster* i laboratoriet. I särskilt fokus står relationerna som skapas inom den biokemiska forskningen kring det biologiska avfall och kroppslighet. *Pollinators and*

Pollination Jeff Ollerton, 2021-01-18 A unique and personal insight into the ecology and evolution of pollinators their relationships with flowers and their conservation in a rapidly changing world The pollination of flowers by insects birds and other animals is a fundamentally important ecological function that supports both the natural world and human society Without pollinators to facilitate the sexual reproduction of plants the world would be a biologically poorer place in which to live there would be an impact on food security and human health would suffer Written by one of the world's leading pollination ecologists this book provides an introduction to what pollinators are how their interactions with flowers have evolved and the fundamental ecology of these relationships It explores the pollination of wild and agricultural plants in a variety of habitats and contexts including urban rural and agricultural environments The author also provides practical advice on how individuals and organisations can study and support pollinators As well as covering the natural history of pollinators and flowers the author discusses their cultural importance and the ways in which pollinator conservation has been portrayed from a political perspective The book draws on field work experiences in South America Africa Australia the Canary Islands and the UK For over 30 years the author has spent his career researching how plants and pollinators evolve relationships how these interactions function ecologically their importance for society and how we can conserve them in a rapidly changing world This book offers a unique and personal insight into the science of pollinators and pollination aimed at anyone who is interested in understanding these fascinating and crucial ecological interactions [Animal Diversity and Biogeography of the Cuatro Ciénegas Basin](#) Fernando Álvarez, Margarita Ojeda, 2019-05-09 This volume investigates the contemporary fauna that inhabit the Cuatro Ciénegas Basin Divided into 15 chapters it addresses and describes their diversity taxonomic and biogeographic affinities and ecological characteristics The Cuatro Ciénegas Valley is a unique oasis in the south central region of the State of Coahuila part of the Sonoran Desert in Mexico Several clues specially derived from the study of the microbiota suggest a very ancient origin of the valley and its permanence through time This condition had promoted a high level of endemism and led to unique interactions between the resident species **The Rubá'iyát of Hāfiz** Ḥāfiz, 1912 *The New-York Review*, 1839 *Interpreting Japan* Brian J.
