Forgotten Justice:

Open Justice in the Digital Age Philippe Jouglex, 2024-06-13 This book discusses the principle of open justice with a focus on the mechanism of video streaming of court proceedings The principle of open justice is multidimensional and involves both the human right to a fair trial and freedom of expression The book distinguishes between three components of open justice public hearings media coverage of proceedings and publication of judgments All three have been and or could be substantially affected by the digital revolution public hearings could benefit from video streaming the media coverage from social media and the publication of judgments from online databases The book analyses recent advances and challenges related to the digitalization of open justice Particular attention is paid to the relevant case law of European courts to the impact of the GDPR with an emphasis on the sensitive issue of pseudonymizing judgments and to a comparison of various national practices Although the book's primary focus is on European law it will also be of interest to scholars from other continents either for purposes of comparative research or because the topic itself touches on general theory of law issues

Tax Law, Religion, and Justice Allen Calhoun, 2021-03-08 This book asks why tax policy is both attracted to and repelled by the idea of justice Accepting the invitation of economist Henry Simons to acknowledge that tax justice is a theological concept the work explores theological doctrines of taxation to answer the presenting question The overall message of the book is that taxation is an instrument of justice but only when taxes take into account multiple goods in society the requirements of the government the property rights of society's members and the material needs of the poor It is argued that this answer to the presenting question is a theological and ethical answer in that it derives from the insistence of Christian thinkers that tax policy take into account material human need *necessitas* Without the *necessitas* component of the tax balance tax systems end up honoring only one of the three components of the tax equation and cease to reflect a coherent idea of justice The book will be of interest to academics and researchers working in the areas of tax law economics theology and history

Biopolitics and Historic Justice Kathrin Braun, 2021-05-11. Human rights violations linked to norms of health, fitness and social usefulness have long been overlooked by Historic Justice Studies. Kathrin Braun introduces the concept of injuries of normality to capture the specifics of this type of human rights violation and the respective struggles for historic justice. She examines the processes of *Vergangenheitsbewältigung* in the context of coercive sterilization, institutional killings as well as the persecution of homosexual men and of asocials under Nazi rule. She argues that an analytic perspective on political temporality allows us to better understand the formation of these biopolitical human rights violations and their exclusion from memory and historic justice.
