Forgotten Language Contemporary Poets And Nature:

The Forgotten Language Christopher Merrill, 1991 Over 125 poems about nature by 93 poets The Good in Nature and Humanity Stephen R. Kellert, Timothy Farnham, 2013-04-10 Scientists theologians and the spiritually inclined as well as all those concerned with humanity's increasingly widespread environmental impact are beginning to recognize that our ongoing abuse of the earth diminishes our moral as well as our material condition Many people are coming to believe that strengthening the bonds among spirituality science and the natural world offers an important key to addressing the pervasive environmental problems we face The Good in Nature and Humanity brings together 20 leading thinkers and writers including Ursula Goodenough Lynn Margulis Dorion Sagan Carl Safina David Petersen Wendell Berry Terry Tempest Williams and Barry Lopez to examine the divide between faith and reason and to seek a means for developing an environmental ethic that will help us confront two of our most imperiling crises global environmental destruction and an impoverished spirituality The book explores the ways in which science spirit and religion can guide the experience and understanding of our ongoing relationship with the natural world and examines how the integration of science and spirituality can equip us to make wiser choices in using and managing the natural environment The book also provides compelling stories that offer a narrative understanding of the relations among science spirit and nature Grounded in the premise that neither science nor religion can by itself resolve the prevailing malaise of environmental and moral decline contributors seek viable approaches to averting environmental catastrophe and more positively to achieving a more harmonious relationship with the natural world By bridging the gap between the rational and the religious through the concern of each for understanding the human relation to creation The Good in Nature and Humanity offers an important means for pursuing the quest for a more secure and meaningful world Nature Writing Don Scheese, 2013-10-28 In this comprehensive study of the genre Don Scheese traces its evolution from the pastoralism evident in the natural history observations of Aristotle and the poetry of Virgil to current American writers He documents the emergence of the modern form of nature writing as a reaction to industrialization Scheese's personal observations of natural settings sharpen the reader's understanding of the dynamics between author and locale His study is further informed by ample use of illustrations and close readings core writers such as Thoreau John Muir and Mary Austin showing how each writer's work exemplifies the pastoral tradition and celebrate a spirit of place in the United States The West Side of Any Mountain J. Scott Bryson, 2005-04-01 In contrast to nature poets of the past who tended more toward the bucolic and pastoral many contemporary nature poets are taking up radical environmental and ecological themes In the last few years interesting and evocative work that examines this poetry has begun to lay the foundation for studies in ecopoetics Informed in general by current thinking in environmental theory and specifically by the work of cultural geographer Yi Fu Tuan The West Side of Any Mountain participates in and furthers this scholarly attention by offering an overarching theoretical framework with which to approach the field One area that contemporary theorists

have found problematic is the dualistic civilization wilderness binary that focuses on the divisions between culture and nature thereby increasing the modern sense of alienation Tuan's place space framework offers a succinct vocabulary for describing the attitudes of ecological poets and other nature writers in a way that avoids setting up an adversarial relationship between place and space Scott Bryson describes the Tuanian framework and employs it to offer fresh readings of the work of four major ecopoets Wendell Berry Joy Harjo Mary Oliver and W S Merwin *The West Side of Any Mountain* will be of great interest to scholars and teachers working in the field of contemporary nature poetry It is recommended for nature writing courses as well as classes dealing with 20th century poetry contemporary literary criticism and environmental theory
