Form And Matter Themes In Contemporary Metaphysics:

Form and Matter David S. Oderberg, 1998 **Special Issue--form and Matter** David S. Oderberg, 1998 **Form, Matter, Substance** Kathrin Koslicki, 2018-08-23

In *Form Matter Substance* Kathrin Koslicki develops a contemporary defense of the Aristotelian doctrine of hylomorphism. According to this approach, objects are compounds of matter (*hyle*) and form (*morphe* or *eidos*), and a living organism is not exhausted by the body cells, organs, tissue, and the like that compose it. Koslicki argues that a hylomorphic analysis of concrete particular objects is well equipped to compete with alternative approaches when measured against a wide range of criteria of success. However, a plausible application of the doctrine of hylomorphism to the special case of concrete particular objects hinges on how hylomorphists conceive of the matter composing a concrete particular object, its form, and the hylomorphic relations which hold between a matter-form compound, its matter, and its form. Koslicki offers detailed answers to these questions surrounding a hylomorphic approach to the metaphysics of concrete particular objects. As a result, matter-form compounds emerge as occupying the privileged ontological status traditionally associated with substances due to their high degree of unity.

Neo-Aristotelian Perspectives in Metaphysics Daniel D. Novotný, Lukáš Novák, 2014-04-16

This volume re-examines some of the major themes at the intersection of traditional and contemporary metaphysics. The book uses as a point of departure Francisco Suárez's *Metaphysical Disputations*, published in 1597. Minimalist metaphysics, in empiricist/pragmatist clothing, have today become mainstream in analytic philosophy. Independently of this development, the progress of scholarship in ancient and medieval philosophy makes clear that traditional forms of metaphysics have affinities with some of the streams in contemporary analytic metaphysics. The book brings together leading contemporary metaphysicians to investigate the viability of a neo-Aristotelian metaphysics.

A Dynamic Theory of Hylomorphism Jeremy W. Skrzypek, 2025-06-20

This book introduces a novel hylomorphic theory of material objects according to which material objects are understood as comprised or composed of both matter and activity, where activity plays the role of form. This theory, *hyloneergeism*, captures the dynamic nature of many of the objects of our experience, such as living organisms, better than other leading varieties of contemporary hylomorphism. Hylomorphism is the theory according to which material objects are understood as comprised or composed of two fundamental parts/components/aspects/principles: matter and form. Many contemporary hylomorphists endorse a version according to which the form of a material object is understood as a certain kind of complex relation or structure realized in its material parts. Others endorse a version according to which the form of a material object is understood as a certain kind of power or disposition continuously activated in the object or in its material parts. This book argues against structural and dispositional varieties of hylomorphism in favor of a third approach, *hyloneergeism*. Drawing on various aspects of traditional Aristotelian hylomorphism and other contemporary occurrence-based theories of material objects, it argues that *hyloneergeism* has the resources to successfully avoid or resolve several major concerns for other competing hylomorphic

views A Dynamic Theory of Hylomorphism will appeal to researchers and graduate students working in metaphysics ancient philosophy and medieval philosophy

Fire Within the Universe Hermes Varini, 2002

Neo-Aristotelian Perspectives on Formal Causation Ludger Jansen, Petter Sandstad, 2021-03-21 This is the first volume of essays devoted to Aristotelian formal causation and its relevance for contemporary metaphysics and philosophy of science The essays trace the historical development of formal causation and demonstrate its relevance for contemporary issues such as causation explanation laws of nature functions essence modality and metaphysical grounding The introduction to the volume covers the history of theories of formal causation and points out why we need a theory of formal causation in contemporary philosophy Part I is concerned with scholastic approaches to formal causation while Part II presents four contemporary approaches to formal causation The three chapters in Part III explore various notions of dependence and their relevance to formal causation Part IV finally discusses formal causation in biology and cognitive sciences

Neo-Aristotelian Perspectives on Formal Causation will be of interest to advanced graduate students and researchers working on contemporary Aristotelian approaches to metaphysics and philosophy of science This volume includes contributions by Jos Tom's Alvarado Christopher J Austin Giacomo Giannini Jani Hakkarainen Ludger Jansen Markku Kein nen Gyula Klima James G Lennox Stephen Mumford David S Oderberg Michele Paolini Paoletti Sandeep Prasada Petter Sandstad Wolfgang Sattler Benjamin Schnieder Matthew Tugby and Jonas Werner

Aquinas's Theory of Perception Anthony J. Lisska, 2016-06-09 Anthony J Lisska presents a new analysis of Thomas Aquinas's theory of perception While much work has been undertaken on Aquinas's texts little has been devoted principally to his theory of perception and less still on a discussion of inner sense The thesis of intentionality serves as the philosophical backdrop of this analysis while incorporating insights from Brentano and from recent scholarship The principal thrust is on the importance of inner sense a much overlooked area of Aquinas's philosophy of mind with special reference to the vis cogitativa Approaching the texts of Aquinas from contemporary analytic philosophy Lisska suggests a modest innate or structured interpretation for the role of this inner sense faculty Dorothea Frede suggests that this faculty is an embarrassment for Aquinas to the contrary the analysis offered in this book argues that were it not for the vis cogitativa

Aquinas's philosophy of mind would be an embarrassment. By means of this faculty of inner sense Aquinas offers an account of a direct awareness of individuals of natural kinds referred to by Aquinas as incidental objects of sense which comprise the principal ontological categories in Aquinas's metaphysics. By using this awareness of individuals of a natural kind Aquinas can make better sense out of the process of abstraction using the active intellect (*intellectus agens*). Were it not for the *vis cogitativa* Aquinas would be unable to account for an awareness of the principal ontological category in his metaphysics.

Metaphysical Themes 1274-1671 Robert Pasnau, 2013-02-07 Robert Pasnau traces the developments of metaphysical thinking through four rich but for the most part neglected centuries of philosophy running from the thirteenth century through to the seventeenth. At no period in the history of philosophy other than perhaps our own have metaphysical problems received the sort of sustained attention they received during the later Middle Ages and never has a whole philosophical tradition come crashing down as quickly and completely as did scholastic philosophy in the seventeenth century. The thirty chapters work through various fundamental metaphysical issues sometimes focusing more on scholastic thought sometimes on the seventeenth century. Pasnau begins with the first challenges to the classical scholasticism of Bonaventure and Thomas Aquinas runs through prominent figures like John Duns Scotus and William Ockham and ends in the seventeenth century with the end of the first stage of developments in post scholastic philosophy on the continent with Descartes and Gassendi and in England with Boyle and Locke.

All Things Are Full of Gods David Bentley Hart, 2024-08-27 A world renowned philosopher's genre defying exploration of the mystery of consciousness. In a blossoming garden located far outside all worlds a group of aging Greek gods have gathered to discuss the nature of existence the mystery of mind and whether there is a transcendent God from whom all things come. Turning to Eros Psyche asks: Do you see this flower my love? So begins David Bentley Hart's unprecedented exploration of the mystery of consciousness. Writing in the form of a Platonic dialogue he systematically subjects the mechanical view of nature that has prevailed in Western culture for four centuries to dialectical interrogation. Powerfully rehabilitating a classical view in which mental acts are irreducible to material causes he argues through the gods exchanges that the foundation of all reality is spiritual or mental rather than material. The structures of mind organic life and even language together attest to an infinite act of intelligence in all things that we may as well call God. Engaging contemporary debates on the philosophy of mind free will revolutions in physics and biology the history of science computational models of mind artificial intelligence information theory linguistics cultural disenchantment and the metaphysics of nature Hart calls readers back to an enchanted world in which nature is the residence of mysterious and vital intelligences. He suggests that there is a very special wisdom to be gained when we in Psyche's words devote more time to the contemplation of living things and less to the fabrication of machines.

God and Caesar George Pell, 2007-10 Drawing on a deep knowledge of history and human affairs the essays pinpoint the key issues facing Christians and non believers in determining the future of modern democratic life.

Analytical Thomism Matthew S. Pugh, 2017-03-02 Analytical Thomism is

a recent label for a newer kind of approach to the philosophical and natural theology of St Thomas Aquinas It illuminates the meaning of Aquinas s work for contemporary problems by drawing on the resources of contemporary Anglo Saxon analytical philosophy the work of Frege Wittgenstein and Kripke proving particularly significant This book expands the discourse in contemporary debate exploring crucial philosophical theological and ethical issues such as metaphysics and epistemology the nature of God personhood action and meta ethics All those interested in the thought of St Thomas Aquinas and more generally contemporary Catholic scholarship problems in philosophy of religion and contemporary metaphysics will find this collection an invaluable resource *The Oxford Handbook of Continental Philosophy* Brian Leiter,Michael Rosen,2009-10-22

The Oxford Handbooks series is a major new initiative in academic publishing Each volume offers an authoritative and up to date survey of original research in a particular subject area Specially commissioned essays from leading figures in the discipline give critical examinations of the progress and direction of debates Oxford Handbooks provide scholars and graduate students with compelling new perspectives upon a wide range of subjects in the humanities and social sciences The Oxford Handbook of Continental Philosophy is the definitive guide to the major themes of the continental European tradition in philosophy in the nineteenth and twentieth centuries Brian Leiter and Michael Rosen have assembled a stellar group of contributors who provide a thematic treatment of continental philosophy treating its subject matter philosophically and not simply as a series of museum pieces from the history of ideas The scope of the volume is broad with discussions covering a wide range of philosophical movements including German Idealism existentialism phenomenology Marxism postmodernism and critical theory as well as thinkers like Hegel Marx Nietzsche Freud Heidegger and Foucault This Handbook will be an essential reference point for graduate students and professional academics working on continental philosophy as well as those with an interest in European literature the history of ideas and cultural studies Fregean Realism Andrei

Pop,2024-12-15 Fregean Realism Frodo Lives and Other Fictions argues that literary fictions pictures and other artworks are modes of access to Gottlob Frege s third realm of objective thoughts about both what is in the real world and what is not but might or might not be Starting with a critique of fictionalism the doctrine that art makes no ontological commitments because it depends on acts of pretending Andrei Pop shifts focus to the shared meaning addressed by acts of pretending and other audience reactions to works of art This book shows that a Fregean theory of sense assertion and concepts does justice to the context specificity of artistic meaning while allowing for durable indeed eternal conceptual content It explores implications for venerable problems such as the truth of art the reality of aesthetic properties beauty and ugliness but also for specific genres or modes like sculpture allegory the relation between image and caption and the first person picture

E.J. Lowe and Ontology Miroslaw Szatkowski,2022-03-17 This volume collects fifteen original essays on E J Lowe s work on metaphysics and ontology The essays connect Lowe s insights with contemporary issues in metaphysics E J Lowe 1950 2014 was one of the most influential analytical philosophers of the twentieth and early twenty first century Drawing

inspiration from Aristotle's thought E J Lowe treated metaphysics as an autonomous discipline concerned with the fundamental structure of reality The chapters in this volume reflect on his path breaking work They deal with a wide range of metaphysical issues including four category ontology the causal and non causal aspects of agency categorial fundamentality and non fundamentality the existence of relations property dualism powers and abilities personal identity predication and topological ontology Taken together the chapters reflect the liveliness of contemporary debates in metaphysics and the enduring impact of Lowe's thought on them E J Lowe and Ontology will be of interest to researchers and advanced students working in metaphysics and philosophy of mind

Hegelian Metaphysics Robert Stern, 2009-05-07 The great German idealist philosopher G W F Hegel has exerted an immense influence on the development of philosophy from the early 19th century to the present But the metaphysical aspects of his thought are still under appreciated In a series of essays Robert Stern traces the development of a distinctively Hegelian approach to metaphysics and certain central metaphysical issues The book begins with an introduction that considers this theme as a whole followed by a section of essays on Hegel himself Stern then focuses on the way in which certain key metaphysical ideas in Hegel's system such as his doctrine of the concrete universal and his conception of truth relate to the thinking of the British Idealists on the one hand and the American Pragmatists on the other The volume concludes by examining a critique of Hegel's metaphysical position from the perspective of the continental tradition and in particular Gilles Deleuze

Real Essentialism David S. Oderberg, 2007-11-13 Real Essentialism presents a comprehensive defence of neo Aristotelian essentialism Do objects have essences Must they be the kinds of things they are in spite of the changes they undergo Can we know what things are really like can we define and classify reality Many if not most philosophers doubt this influenced by centuries of empiricism and by the anti essentialism of Wittgenstein Quine Popper and other thinkers Real Essentialism reinvigorates the tradition of realist essentialist metaphysics defending the reality and knowability of essence the possibility of objective immutable definition and its relevance to contemporary scientific and metaphysical issues such as whether essence transcends physics and chemistry the essence of life the nature of biological species and the nature of the person

Personal Identity Ellen Frankel Paul, Fred Dycus Miller, Jeffrey Paul, 2005 What is a person What makes me the same person today that I was yesterday or will be tomorrow Philosophers have long pondered these questions In Plato's Symposium Socrates observed that all of us are constantly undergoing change we experience physical changes to our bodies as well as changes in our manners customs opinions desires pleasures pains and fears Aristotle theorized that there must be some underlying substratum that remains the same even as we undergo these changes John Locke rejected Aristotle's view and reformulated the problem of personal identity in his own way is a person a physical organism that persists through time or is a person identified by the persistence of psychological states by memory These essays written by prominent philosophers and legal and economic theorists offer valuable insights into the nature of personal identity and its implications for morality and public policy

Neo-Aristotelian

Perspectives on Contemporary Science William M.R. Simpson, Robert C. Koons, Nicholas J. Teh, 2017-10-19 The last two decades have seen two significant trends emerging within the philosophy of science the rapid development and focus on the philosophy of the specialised sciences and a resurgence of Aristotelian metaphysics much of which is concerned with the possibility of emergence as well as the ontological status and indispensability of dispositions and powers in science Despite these recent trends few Aristotelian metaphysicians have engaged directly with the philosophy of the specialised sciences Additionally the relationship between fundamental Aristotelian concepts such as hylomorphism substance and faculties and contemporary science has yet to receive a critical and systematic treatment Neo Aristotelian Perspectives on Contemporary Science aims to fill this gap in the literature by bringing together essays on the relationship between Aristotelianism and science that cut across interdisciplinary boundaries The chapters in this volume are divided into two main sections covering the philosophy of physics and the philosophy of the life sciences Featuring original contributions from distinguished and early career scholars this book will be of interest to specialists in analytical metaphysics and the philosophy of science
