Form Creative Painting:

Form Gemma Guasch,Josep Asunción,2004 A paintings form is the element that lends it visual coherence and form derives from combinations of shapes as simple as triangles circles and squares or as complex as intersecting lines and overlapping irregular shapes intended to suggest motion perspective repose or very many other qualities This title shows examples of still life portraits landscapes water scenes skies and even abstract paintings then analyzes these works demonstrating in illustrations the fundamental shapes from which each painting is constructed

The Problem of Form in Painting and Sculpture Adolf von Hildebrand,1907 The Problem of Form in Painting and Sculpture is a seminal work on the principles of art and aesthetics Written by renowned German sculptor and philosopher Adolf von Hildebrand in 1907 the book explores the fundamental concepts of form space and composition in the visual arts Hildebrand argues that the essence of art lies in the artist's ability to capture the essential qualities of a subject and express them in a way that is both beautiful and meaningful He also discusses the role of the viewer in interpreting and appreciating art and provides insights into the creative process and the relationship between form and content With its clear and insightful analysis of the principles of art The Problem of Form in Painting and Sculpture remains an important text for anyone interested in the philosophy of aesthetics or the visual arts This scarce antiquarian book is a facsimile reprint of the old original and may contain some imperfections such as library marks and notations Because we believe this work is culturally important we have made it available as part of our commitment for protecting preserving and promoting the world's literature in affordable high quality modern editions that are true to their original work

 Erjavec, 2024-04-22 This volume presents a selection of aesthetic and art theoretical writings by the internationally renowned
 philosopher Ale Erjavec from the 1990s to the present Erjavec was an active participant in the artistic revolt in Slovenia
 throughout the 1980 and became one of the most notable international theorists of late and post socialist developments in art
 His work also extended to new emergent forms of contemporary art and visual culture in global art and culture networks The
 diverse contexts and artists with which he has engaged gives him a unique critical perspective on major debates in
 philosophical aesthetics and art theory **Art and Revolution in Latin America, 1910-1990** David Craven, 2006-01-01 In
 this uniquely wide ranging book David Craven investigates the extraordinary impact of three Latin American revolutions on
 the visual arts and on cultural policy The three great upheavals in Mexico 1910 40 in Cuba 1959 89 and in Nicaragua 1979
 90 were defining moments in twentieth century life in the Americas Craven discusses the structural logic of each movement s
 artistic project by whom how and for whom artworks were produced and assesses their legacies In each case he
 demonstrates how the consequences of the revolution reverberated in the arts and cultures far beyond national borders The
 book not only examines specific artworks originating from each revolution s attempt to deal with the challenge of socializing
 the arts but also the engagement of the working classes in Mexico Cuba and Nicaragua with a tradition of the fine arts made
 newly accessible through social transformation Craven considers how each revolution dealt with the pressing problem of
 creating a dialogical art one that reconfigures the existing artistic resource rather than one that just reproduces a populist
 art to keep things as they were In addition the author charts the impact on the revolutionary processes of theories of art and
 education articulated by such thinkers as John Dewey and Paulo Freire The book provides a fascinating new view of the Latin
 American revolutionaries from artists to political leaders who defined art as a fundamental force for the transformation of
 society and who bequeathed new ways of thinking about the relations among art ideology and class within a revolutionary

process The Challenge of Modern Art Allen Leepa, 2013-05-31 The science of aesthetics was originally based on classical art even a contemporary philosopher of art like Croce never departs from the data of the Graeco Roman and Renaissance tradition Modern art however has made a decisive break with that tradition and considerable confusion has been caused by the application to its products of criteria of judgment derived from a past historical phase Even in our private unprofessional approach to modern art we come unconsciously armed with such prejudices What therefore was necessary was a complete revision of aesthetics on the basis of the ample material produced by the modern movement in art and this Mr Allen Leepa has now provided The material in question consists primarily of the works of art themselves and these in significant selection Mr Leepa has subjected to a thorough functional analysis But he realises that the explanation of art does not end with its formal dissection the function of art as he says is to express emotional meanings in the organized patterns of a medium and he has ventured on the much more difficult task of defining the nature of that psychological process At this point formal analysis is of no avail and what we fall back on is the artist's own description of his activity Luckily modern artists have been surprisingly communicative and Mr Leepa has not failed to take advantage of the statements which from time to time artists like Picasso Matisse Klee and Mondrian have made He has been aided in his understanding of what they mean which is not always clear by his own practice as a painter which has saved him from some of the simplifications which an outsider might be tempted to make for the sake of a neat system Admirable for example is the way in which he insists in Chapter X on the mutual interaction of medium and idea in the process of creation We are far too apt to think of the work of art as the illustration of a preconceived idea instead of an organic growth in which idea only played the part of germ or seed Particular attention should be given to all that Mr Leepa has to say on the subject of abstract art for which the average critic has hitherto reserved his most obstinate resistance In its various forms and there is a wide divergence of aim within the so called abstract movement this type of art does of course make the most decisive break with the classical or humanist tradition It is to be observed however that it is precisely this type of art which lends itself to the formulation of a coherent aesthetic and though Mr Leepa quite rightly insists on its individualistic and subjective nature the final result would seem to be the discovery of archetypal forms of the widest social significance The last point I would like to select for emphasis from a book so replete with interest is the firm way in which Mr Leepa insists on the social significance of his subject **Emily**

Dickinson: a Pictorial Artist Dr. Bhavana Saxena, 2017-05-26 Emily Dickinson with her Keatsian pictorial quality is well discussed in the book Poems are full of colours shades lines depth and all dimensions of art and painting Mysticism of the Final world crispness of this Life philosophy behind the reason to survive adventure of Love and the Metaphysics of Death are the topics of this book through the vision of her poems The book will leave you with a tactile sense of colours and a painted soul
