Formal Description Of Programming Concepts:

Formal Description of Programming Concepts Erich Neuhold, Manfred Paul, 1991-10-04 In software engineering there is a growing need for formalization as a basis for developing powerful computer assisted methods This volume contains seven extensive lectures prepared for a series of IFIP seminars on the Formal Description of Programming Concepts The authors are experts in their fields and have contributed substantially to the state of the art in numerous publications The lectures cover a wide range in the theoretical foundations of programming and give an up to date account of the semantic models and the related tools which have been developed in order to allow a rigorous discussion of the problems met in the construction of correct programs In particular methods for the specification and transformation of programs are considered in detail One lecture is devoted to the formalization of concurrency and distributed systems and reflects their great importance in programming Further topics are the verification of programs and the use of sophisticated type systems in programming This compendium on the theoretical foundations of programming is also suitable as a textbook for special seminars on different aspects of this broad subject

Formal Description of Programming Concepts - III, 1987 Logic of Programs
 Concurrency Semantics Term rewriting and logic programming Higher order programming Programming Languages and Systems Andrew Gordon, 2010-03-10 Annotation This book constitutes the refereed proceedings of the 19th European Symposium on Programming ESOP 2010 held in Paphos Cyprus in March 2010 as part of ETAPS 2010 the European Joint Conferences on Theory and Practice of Software The 30 revised full papers presented together with two invited talks one abstract and one full were carefully reviewed and selected from 121 full paper submissions The topics addressed include programming paradigms and styles methods and tools to write and specify programs and languages methods and tools for reasoning about programs methods and tools for implementation and concurrency and distribution Algebraic System Specification and Development Michel Bidoit, 1991-06-26 Methods for the algebraic specification of abstract data types were proposed in the early 1970s in the USA and Canada and became a major research issue in Europe shortly afterwards Since then the algebraic approach has come to play a central role in research on formal specification and development as its range of applications was extended to the specification of complete software systems to the formal description of the program development process and to the uniform definition of syntax and semantics of programming languages Today this approach extends beyond just software to the development of integrated hardware and software systems These flourishing activities in the area of algebraic specifications have led to an abundance of approaches theories and concepts which have universal algebra category theory and logic as a common mathematical basis This volume is an annotated bibliography which provides an up to date overview of past and present work on algebraic specification No attempt is made to provide a coherent introduction to the topic for beginners the intention is rather to provide a guide to the current literature for researchers in algebraic specification and neighboring fields Some indications of how the different approaches are related are included together with some ideas concerning possible future directions Formal Description of Programming Concepts-III Martin Wirsing, 1987 Programming Languages and Systems Bruno C. d. S. Oliveira, 2020-11-26 This book constitutes the proceedings of the 18th Asian Symposium on Programming Languages and Systems APLAS 2020 held in Fukuoka Japan in December 2020 The 19 papers presented in this volume were carefully reviewed and selected from 46 submissions They were organized in topical sections named Invited Papers Types Program Analysis Semantics Language Design and Implementation Concurrency Verification and Logic and Automata The conference was held virtually due to the COVID 19 pandemic

Theoretical Computer Science: Exploring New Frontiers of Theoretical Informatics Jan Leeuwen, 2000-07-26 This book constitutes the refereed proceedings of the International Conference IFIP TCS 2000 held in Sendai Japan in August 2000 The 32 revised full papers presented together with nine invited contributions were carefully

reviewed and selected from a total of 70 submissions. The papers are organized in two tracks on algorithms complexity and models of computation and on logics semantics specification and verification. The book is devoted to exploring new frontiers of theoretical informatics and addresses all current topics in theoretical computer science. *Mathematical Foundations of Computer Science 1996* Wojciech Penczek, Andrzej Szalas, 1996-08-07. This book constitutes the refereed proceedings of the 21st International Symposium on Mathematical Foundations of Computer Science MFCS 96 held in Crakow Poland in September 1996. The volume presents 35 revised full papers selected from a total of 95 submissions together with 8 invited papers and 2 abstracts of invited talks. The papers included cover issues from the whole area of theoretical computer science with a certain emphasis on mathematical and logical foundations. The 10 invited presentations are of particular value.
