Form-oriented Analysis:

Form-Oriented Analysis Dirk Draheim, Gerald Weber, 2005-10-14 Form based applications range from simple web shops to complex enterprise resource planning systems Draheim and Weber adapt well established basic modeling techniques in a novel way to achieve a modeling framework optimized for this broad application domain They introduce new modeling artifacts such as page diagrams and form storyboards and separate dialogue patterns to allow for reuse In their implementation they have developed new constructs such as typed server pages and tools for forward and reverse engineering of presentation layers The methodology is explained using an online bookshop as a running example in which the user can experience the modeling concepts in action The combination of theoretical achievements and hands on practical advice and tools makes this book a reference work for both researchers in the areas of software architectures and submit response style user interfaces and professionals designing and developing such applications More information and additional material is also available online On the Move to Meaningful Internet Systems ...: OTM ... Dialectical Thinking and Adult Development Michael Basseches, 1984 This book describes and illustrates the nature of dialectical thinking as a cognitive psychological phenomenon and makes the case that this form of cognitive organization is a possible successor to the adolescent formal operations stage It uses the idea of dialectical thinking to organize theory and research on adult forms of reasoning about specific kinds of issues into a rich and coherent conceptual framework for the study of adult development This framework makes feasible an approach to the study of adult development firmly rooted in the genetic epistemological tradition as an alternative to the approaches which currently dominate the field **Abstracts, Journal of Huazhong (Central China) University of Science and Technology**, 1988 **Beyond the Aspect Hypothesis** Emmanuelle Labeau, 2005 The Aspect Hypothesis AH claims that the association of any verb category lexical aspect with any grammatical aspect perfective or imperfective constitutes the endpoint of acquisition The present book evaluates the explanatory power of the Aspect Hypothesis for the acquisition of French past tenses which constitutes a serious stumbling block for foreign learners even at the highest levels of proficiency The present research applies the Aspect

Hypothesis to the production of 61 Anglophone advanced learners in a tutored environment In so doing it tests concurrent explanations including the influence of the input the influence of chunking and the hypothesis of cyclic development It discusses the cotextual and contextual factors that still provoke non native glitches at the final stage of the Aspect Hypothesis The book shows that the AH fails to account for the complex phenomenon of past tense development as it adopts a local and linear approach *Proceedings of the Annual Conference of the American Academy of Advertising* American Academy of Advertising,1977 Macworld ,1986 **Organizing Information** Dagobert Soergel,1985 This book gives a theoretical base and a perspective for the analysis design and operation of information systems particularly their information storage and retrieval ISAR component whether mechanized or manual Information systems deal with many types of entities events persons documents business transactions museum objects research projects and technical parts to name a few Among the purposes the serve are to inform the public to support managers researchers and engineers and to provide a knowledge base for an artificial intelligence program The principles discussed in this book apply to all these contexts The book achieves this generality by drawing on ideas from two conceptually overlapping areas data base management and the organization and use of knowledge in libraries and by integrating these ideas into a coherent framework The principles discussed apply to the design of new systems and more importantly to the analysis of existing systems in order to exploit their capabilities better to circumvent their shortcomings and to introduce modifications where feasible
