Forms Of Concrecence Alfred North White:

Forms of Concrecence Granville C. Henry,1993 Ricorso and Revelation traces the impact on Modernism of the archaeological discoveries of the Palace of Knossos the Royal Cemetery of Ur and the Tomb of Tutankhamen and the artifacts recovered from these sites showing how they entered the narrative strategies of the Modernist movement The author also develops a new argument about the four myth configurations the maze alchemy the Great Goddess and the Apocalypse which were of central importance to the literature of European Modernism between 1895 and 1946 studying their appearances in a wide range of European modernist writers and in the paintings of Picasso and the films of Jean Cocteau Drawing from a variety of theories on myth Smith suggests that each of these four myths represents a creative return to the origins ricorso a reduction of the raw materials of daily life to the fundamental elements of creation revelation followed by a recreation of the world cosmogenesis of the poet ontogenesis and of the text poesis

Contingent Computation M. Beatrice Fazi,2018-11-15 In Contingent Computation M Beatrice Fazi offers a new theoretical perspective through which we can engage philosophically with computing The book proves that aesthetics is a viable mode of investigating contemporary computational systems It does so by advancing an original conception of computational aesthetics that does not just concern art made by or with computers but rather the modes of being and becoming of computational processes Contingent Computation mobilises the philosophies of Gilles Deleuze and Alfred North Whitehead in order to address aesthetics as an ontological study of the generative potential of reality Through a novel philosophical reading of G del s incompleteness theorems and of Turing s notion of incomputability Fazi finds this potential at the formal heart of computational systems and argues that computation is a process of determining indeterminacy This indeterminacy which is central to computational systems does not contradict their functionality Instead it drives their very operation albeit in a manner that might not always fit with the instrumental representational and cognitivist purposes that we have assigned to computing

Quantum Mechanics and the Philosophy of Alfred North Whitehead Michael Epperson,2004-07-15 This is an extended analysis of the intricate relationships between relativity theory quantum mechanics and Alfred North Whitehead s cosmology Michael Epperson illuminates the intersection of science and philosophy in Whitehead s work

Whitehead's Metaphysics of Extension and Solidarity Jorge Luis Nobo,1986-06-30 At the base of Whitehead s philosophy of organism is a vision of the solidarity of all final actualities Each actuality is a discrete individual enjoying autonomous self determination yet each also requires all other actualities as essential components and partial determinants of its own nature This vision of universal solidarity Nobo demonstrates is the fundamental metaphysical thesis whose truth the categories and principles of Whitehead s philosophy were expressly designed to elucidate The received interpretations of Whitehead s thought Nobo shows have ignored the mutual relevance of the solidarity thesis and the organic categoreal scheme and for that reason have grossly misrepresented many of Whitehead s most important metaphysical doctrines Contending that the difficult tasks of interpreting and developing Whitehead s

metaphysics presuppose an understanding of the solidarity thesis Nobo explores that thesis and the metaphysical categories and principles most relevant to its elucidation In the process he not only corrects many misinterpretations but also develops important metaphysical doctrines that Whitehead neglected to make sufficiently explicit in his published writings It is precisely in terms of the neglected doctrine of eternal extensive continuity Nobo demonstrates that the more puzzling aspects of the solidarity thesis are satisfactorily explained He then shows that the extensional solidarity of all final actualities is an essential ingredient of the generalized conception of experience on which Whitehead builds his ontology cosmology and epistemology

Whitehead's Ontology John W. Lango, 1972-06-30 An examination of Whitehead's metaphysics through a study of his Process and Reality

Transforming Process Theism Lewis S. Ford, 2000-05-26 Traces variations of theism in Whitehead's principle works identifying a major problem in conventional understanding of process theism and constructing an original and provocative solution

Alfred North Whitehead George Louis Kline, 1989 This volume's aim is to clarify criticize and theoretically develop some of Whitehead's major philosophic ideas and insights Eighteen distinguished contributors follow Whitehead in his unique attempt to integrate the often disparate concerns of science including mathematics and mathematical logic art religion social life and common sense They manage to avoid the twin pitfalls of uncritical acceptance and impatient rejection of Whitehead's thought They delineate Whitehead's indebtedness to and divergence from the philosophic traditions of Plato Leibniz Hume Hegel Bergson and others Some of the distinguished philosophers contributing to this volume are Charles Hartshorne William Ernest Hocking Richard M. Rorty Gregory Vlastos William A. Christian Sr Nathaniel Lawrence Ivor Leclerc Victor Lowe Robert M. Palter and Donald W. Sherburne Originally published in 1963 by Prentice Hall this edition contains a new preface by the editor

Charles Olson and Alfred North Whitehead Shachar Bram, 2004 Annotation Through a detailed and thoughtful study of the impact of Alfred North Whitehead's philosophy on Olson's aesthetic theory this book points out the conceptual unity underlying what seems to be a sprawl of fragments in Olson's major work *The Maximus Poems* On the one hand concrete poetic units of *The Maximus Poems* serve as a starting point for clarifying how different elements are joined together in one unity On the other hand the book traces the blending of the whole poem at the macro level following its course through a temporal progress in which the poem moves from one poetic unit to the next that is from a unity of multiplicity to a new unity in which the previous unity is already part of the multiplicity building the new one Thus the book illuminates Olson's theory of the Long Poem as an all containing corpus governed by metaphysical principles equal to life itself enacted in the process of working on *The Maximus Poems*

Hegel and Whitehead George R. Lucas Jr., 1986-01-15 Hegel and Whitehead presents a careful exploration of the similarities between these two formidable representatives of systematic philosophy Some of the most distinguished scholars in European and American philosophy converge herein to explore the similarities in Hegel's and Whitehead's contemporary influence as well as in the

content of their respective systems and in their philosophical styles This volume begins with important critical comparative and historical assessments of the contemporary problems in metaphysics philosophy of science philosophy of mind ethics social thought and philosophy of religion of history and of culture against the background of the important contributions made to these discussions by both Hegel and Whitehead The result is a collection of vigorous new essays in systematic philosophy that reflect the enduring contributions of these two philosophers to the contemporary philosophical climate on two continents

Social Action Systems Thomas J. Fararo, 2001-09-30 Fararo studies general theoretical sociology as a time extended tradition with three phases classical postclassical and recent Employing a process philosophical approach the author seeks to examine these three phases in an effort to provide a synthesis of the theories that seek to lay the foundations of theoretical sociology The author especially focuses on the work of Talcott Parsons and George Homans two contemporary theorists whose common aspiration was to forge a theoretical foundation for sociology that would serve to unify and integrate all theories growing out of sociological research in much the same way that the theory of evolution guides and integrates all other biological theories To begin the author provides a history and overview of the key classical theoretical frameworks from the perspective of process philosophy which he applies to all three phases of the study Fararo then carefully analyzes two major postclassical bodies of general theory namely the evolving and intertwined frameworks of Parsons and Homans from their early theories of social systems to their later divergent perspectives on foundation and synthesis in sociological theory Finally the discussion turns to the recent phase of general theoretical sociology where more recent foundation strategies rational choice theory and generative structuralism are analyzed in relation to the postclassical phase of the tradition This important and sophisticated new work is essential for all those interested in sociological theory in particular and sociology in general

A Critique of the Philosophy of Being of Alfred North Whitehead in the Light of Thomistic Philosophy Leo A. Foley, 2016-04-18 Ideas good and bad are productive and a teacher of ideas can have a vast influence in the propagating of good and bad ideas We have only to review the influence of German Idealism upon German and English Romanticism to see this realized Similarly today in the United States we are reaping the fruit good and bad of ideas that have been sown during the past several decades Some of them we accept some we reject All of them deserve our investigation insofar as it is within our power to investigate them in order that as followers of truth we may sift the good from the bad From the preface

Alfred North Whitehead and Yi Yulgok Chung Soon Lee, 2006-02-23 This book explores the Confucian Christian dialogue in Korea through a comparative study of the cosmologies of Alfred North Whitehead 1861 1947 the founder of process philosophy and Yi Yulgok 1536 1584 the great scholar of Korean Neo Confucianism Although their philosophical traditions are different Yulgok and Whitehead s perspectives on the universe were very similar This study argues that Whitehead s theory of eternal object actual entity has affinities with Yulgok s theory of principle material force Their two theories both based on reciprocal dialectical interrelationships view the world as a cosmos characterized by the

process of becoming Accordingly Whitehead's panentheistic interpretation of the God world relationship correlates with Yulgok's Neo Confucian notion of how the Great Ultimate relates to material force These two concepts suggest a balanced structure of God and the world and offer insights into encouraging interreligious spirituality in Korea *Alfred North Whitehead on Learning and Education* Franz G. Riffert, 2005 In this book a selection of 15 papers explores Whitehead's educational ideas which are based on his radical process approach Following the Introduction which presents Whitehead's criticism of traditional education and the false psychology which it is based on the book is divided into two major parts The first part deals with Whitehead's philosophically inspired alternative theoretical framework for learning and education Special focus is laid on the concept of the learning process which according to Whitehead is essentially cyclic in nature In the second part it is shown how Whitehead's ideas can profitably be applied to different sub domains within education management education college education and evaluation <http://www.cambridgescholarspress.com>

The Philosophy of Alfred North Whitehead Paul Arthur Schilpp, 1951

An Introductory Dictionary of Theology and Religious Studies Orlando O. Espín, James B. Historical Dictionary of Metaphysics Gary Rosenkrantz, Joshua Hoffman, 2011 A dictionary of metaphysical terms with an emphasis on the history of the people and words Finite but Unbounded: New Approaches in Philosophical Anthropology Kevin M. Cahill, Martin Gustafsson, Thomas Schwarz Wentzer, 2017-05-22 World leading anthropologists and philosophers pursue the perplexing question fundamental to both disciplines What is it to think of ourselves as human A common theme is the open ended and context dependent nature of our notion of the human one upshot of which is that

perplexities over that notion can only be dealt with in a piecemeal fashion and in relation to concrete real life circumstances Philosophical anthropology understood as the exploration of such perplexities will thus be both recognizably philosophical in character and inextricably bound up with anthropological fieldwork The volume is put together accordingly Precisely by mixing ostensibly philosophical papers with papers that engage in close anthropological study of concrete issues it is meant to reflect the vital tie between these two aspects of the overall philosophical anthropological enterprise The collection will be of great interest to philosophers and anthropologists alike and essential reading for anyone interested in the interconnections between the two disciplines Faith Encounters of the Third Kind David J. Brewer, 2021-09-21 Interreligious dialogue that strives for both hospitality and honest discussion of difference Is it possible to have both Is it possible for religious traditions to engage one another in a spirit of humility while also working together toward mutual descriptions of God and the world This is the goal of this book to find points at which each of the religious traditions are vulnerable and open enough to listen to each other and to help each other toward a shared description of reality If you share these concerns concerns for interfaith dialogue as well as for deeply held notions of conviction and truth then the invitation is open for mutual constructive engagement
