Seminar Reports in Mathematics (Los Angeles) California. University. Department of Mathematics, Los Angeles, 1924 Braid and Knot Theory in Dimension Four Seiichi Kamada, 2002 Braid theory and knot theory are related via two famous results due to Alexander and Markov Alexander's theorem states that any knot or link can be put into braid form Markov's theorem gives necessary and sufficient conditions to conclude that two braids represent the same knot or link Thus one can use braid theory to study knot theory and vice versa In this book the author generalizes braid theory to dimension four He develops the theory of surface braids and applies it to study surface links In particular the generalized Alexander and Markov theorems in dimension four are given This book is the first to contain a complete proof of the generalized Markov theorem Surface links are studied via the motion picture method and some important techniques of this method are studied For surface braids various methods to describe them are introduced and developed the motion picture method the chart description the braid monodromy and the braid system These tools are fundamental to understanding and computing invariants of surface braids and surface links Included is a table of knotted surfaces with a computation of Alexander polynomials Braid techniques are extended to represent link homotopy classes The book is geared toward a wide audience from graduate students to specialists It would make a suitable text for a graduate course and a valuable resource for researchers **The Book of Amos** M. Daniel Carroll R., 2020-11-19 In this commentary on the book of Amos Daniel Carroll combines a detailed reading of the Hebrew text with attention to its historical background and current relevance What makes this volume unique is its special attention to Amos's literary features and what they reveal about the book's theology and composition Instead of reconstructing a hypothetical redactional history this commentary offers a close reading of the canonical form against the backdrop of the eighth century BCE *5 Lb. Zitarelli,2019-10-21 This is the first truly comprehensive and thorough history of the development of mathematics and a mathematical community in the United States and Canada This first volume of the multi volume work takes the reader from the European encounters with North America in the fifteenth century up to the emergence of a research community the United States in the last quarter of the nineteenth In the story of the colonial period particular emphasis is given to several prominent colonial figures Jefferson Franklin and Rittenhouse and four important early colleges Harvard Qu bec William Mary and Yale During the first three quarters of the nineteenth century mathematics in North America was largely the occupation of scattered individual pioneers Bowditch Farrar Adrain B Peirce This period is given a fuller treatment here than previously in the literature including the creation of the first PhD programs and attempts to form organizations and found journals With the founding of Johns Hopkins in 1876 the American mathematical research community was finally and firmly founded The programs at Hopkins Chicago and Clark are detailed as are the influence of major European mathematicians

including especially Klein Hilbert and Sylvester Klein's visit to the US and his Evanston Colloquium are extensively detailed. The founding of the American Mathematical Society is thoroughly discussed. David Zitarelli was emeritus Professor of Mathematics at Temple University. A decorated and acclaimed teacher, scholar, and expositor, he was one of the world's leading experts on the development of American mathematics. Author or co-author of over a dozen books, this was his magnum opus, sure to become the leading reference on the topic and essential reading not just for historians. In clear and compelling prose, Zitarelli spins a tale accessible to experts, generalists, and anyone interested in the history of science in North America.

ICMLG2016-4th International Conference on Management, Leadership and Governance Dmitry Vasilenko and Natalia Khazieva, *To the Ends of the Earth* Allan Heaton Anderson, 2013-01-04. In *To the Ends of the Earth* Allan Anderson offers a historical and theological examination of the growth of global Pentecostalism. Examining such issues as revivalism, healing, gender, worship, and globalization, Anderson seeks to show how the growth of global Pentecostalism is changing the face of Christianity as a whole. Catalogue, *4th International Conference on Nanotechnologies and Biomedical Engineering* Ion Tiginyanu, Victor Sontea, Serghei Railean, 2019-09-17. This book gathers the proceedings of the 4th International Conference on Nanotechnologies and Biomedical Engineering held on September 18-21, 2019, in Chisinau, Republic of Moldova. It continues the tradition of the previous conference proceedings, thus reporting on both fundamental and applied research at the interface between nanotechnologies and biomedical engineering. Topics include developments in bio-micro-nanotechnologies and devices, biomedical signal processing, biomedical imaging, biomaterials for biomedical applications, biomimetics, bioinformatics, and e-health, and advances in a number of related areas. The book offers a timely snapshot of cutting-edge multidisciplinary research and developments in the field of biomedical and nano-engineering. Scientific and Technical Aerospace Reports, 1992-07.
