**Fortress Britain** Andrew Saunders,1989      **British Fortifications, 1485-1945** Jean-Denis G.G. Lepage,2023-07-20  
This book details British fortifications used from the Tudor period beginning in 1485 through the end of World War II in 1945 With the advent of firearms the Tudor period indeed opened a new chapter in the histories of Britain fortification and warfare By 1500 AD Britain and Europe at large entered a new phase marked by the foundation of colonial empires and a broadened sphere of influence and rule During the following centuries British sailors ruthless adventurers fighting men and greedy merchants laid foundations to fortify the most widespread and most prosperous colonial Empire the world had ever seen This text focuses on British coastal fortifications and on combinations of fortresses used for more general strategic purposes Featured structures have protected points of vital importance such as capital cities military depots ports harbors and dockyards at essential locations in Britain and throughout the British Empire      **Castles, Town Defences, and Artillery Fortifications in Britain: 1983-1989** John R. Kenyon,1978      *Dictionary of Fortifications* Jean-Denis Lepage,2023-01-24  
This Dictionary of Fortifications is an attractive and convenient reference for anyone with an interest in castles forts walled cities and any other defensive architecture including temporary structures of any period The heart of the book is a useful glossary of over 1 200 terms relating to fortifications through the ages Drawn from many languages besides English each has at least a concise definition or description while more significant entries take the form of short articles Many are accompanied by a clear sketch diagram cross section floor plan or map skillfully executed by the author himself In all there are over 400 of these black and white illustrations Although the glossary is organized alphabetically from Abatis to Zwischenwiderstandnet cross references allow the reader to easily follow themes of interest through the book Buttressing the glossary there is a section giving an overview of the historical development of fortifications from prehistory to the present day A further chapter outlines the concomitant development of siege warfare over the same long span detailing the evolution of siege engines and other tactics used to overcome fortifications This is a fascinating reference for anyone with the slightest interest in military architecture      *British and Irish Archaeology* ,1994      **Fortress Europe** J.E. Kaufmann,H.W. Kaufmann,2022-06-02 A few of the fortifications and fortified lines of the world wars are well known and have often been written about illustrated and studied But they tend to distract attention from the wide range of fixed defenses constructed across Europe on an enormous scale after the Franco Prussian War of 1870 71 during a period of insecurity and aggression That is why this new highly illustrated study which covers the entire continent is so valuable The authors examine the major fortified positions and describe their strategic purpose their design and construction and the role they played in military planning and operations The outstanding contribution of the major military architects of the time is a key theme The work of S r de Rivi res Brialmont and others had a major influence on the course of the First World War and on the fortifications built before and during the Second World War Their approach is visible in the designs for the Maginot Line the East and West

walls of Germany the Vallo Alpino in Italy the Soviet Stalin and Molotov lines the Mannerheim and Salpa lines of Finland the Greek Metaxas Line the Bene Line of Czechoslovakia as well as the defenses built by the Dutch and Scandinavians The breadth of the coverage the degree of detail and the numerous illustrations make the book essential reading and reference for anyone who has a special interest in the world wars and the history of fortifications **First Forts** Eric

Klingelhofer,2010-11-11 Proto colonial archaeology explores the physical origins of the world culture that evolved out of contacts made in the Age of Exploration from Columbus to Cromwell The early defended sites show how colonizing Europeans first responded to the challenges of new environments and new peoples and how their choices led to conquest adaption or failure Fortifications once necessary to protect the colonies are now essential clues to understand their history The first comparative study of proto colonial fortifications First Forts is a collection of essays written by leading archaeologists in the field Meeting the needs of archaeologists and historians around the globe this book will also appeal to military enthusiasts preservationists and students of the Age of Exploration Contributors are David Orr Kathleen Deagan Steven Pendery Eric Klingelhofer Nicholas Lucchetti Edward Harris Roger Leech Paul Huey Jay Havisier Oscar Hefting Christopher DeCorse Ranjith Jayasena and Pieter Floore *Britain Turned Germany'* Serena Jones,2019-09-15 The speakers at the 2018 Helion conference offer a variety of insights into the depth and direction of research into the Thirty Years War with particular reference to the war s effect on the British Isles the careers of the officers from its shores who participated in the conflict and the trickle down effect of the war into the military thinking and technology of those isles Keynote speaker Professor Steve Murdoch examines the changes in understanding of British military participation in the Thirty Years War from a once unsophisticated and dismissive approach to a more enriched and interesting field of study Keith Downen examines the work of Catholic Irish colonel Gerat Barry which has been largely overlooked Micha Paradowski looks into the careers of three officers from the British Isles who fought abroad Arthur Aston Jr James Butler and Scotsman James Murray Arran Johnston considers the importance of General Alexander Leslie and his officer corps and the importance of their overseas service in the Thirty Years War as the basis for the effectiveness of the Scottish army in the Bishops Wars Prof Martyn Bennett explores the process of appointment of the rival command structures in 1642 at the start of the English Civil Wars David Flinham considers the foreign especially Dutch influence on English fortification during the period the methods employed and those who practiced them Stephen Ede Borrett examines contemporary vexillology and how much the Thirty Years War influenced the military flags used by the English Armies from 1639 to 1651 **The Castles of Henry VIII** Peter Harrington,2013-05-20 In the last years of his reign Henry VIII needed a radically modern system of defence to protect England and its new Church Anticipating a foreign onslaught from Catholic Europe after his split from Rome Henry energetically began construction of more than 20 stone forts to protect England s major ports and estuaries Aided by excellent illustrations Peter Harrington explores the departure from artillery vulnerable medieval castle designs to the low

sturdy stone fortresses inspired by European ideas He explains the scientific care taken to select sites for these castles and the transition from medieval to modern in this last surge of English castle construction **The British Armed Nation, 1793-1815** J. E. Cookson,1997 Looking at the impact of the French Revolutionary and Napoleonic Wars on the British Isles Cookson sheds light on the nature of the British state and the extent of its dependence on society s self organising powers

**The Chivalric Ethos and the Development of Military Professionalism** David J. B. Trim,2003 This volume probes the meaning and significance of military professionalism considers whether it required the waning of the chivalric ethos or merely resulted in it and assesses the influence of both value systems on the rise of Western states Scotland and the British Army, 1700-1750 Victoria Henshaw,2014-06-05 The wholesale assimilation of Scots into the British Army is largely associated with the recruitment of Highlanders during and after the Seven Years War This important new study demonstrates that the assimilation of Lowland and Highland Scots into the British Army was a salient feature of its history in the first half of the 18th century and was already well advanced by the outbreak of the Seven Years War Scotland and the British Army 1700 1750 analyses the wider policing functions of the British Army the role of Scotland s militia and the development of Scotland s military roads and institutions to provide a fuller understanding of the purpose and complexity of Scotland s military organisation and presence in Scotland in the turbulent decades between the Glorious Revolution and the defeat of Bonnie Prince Charlie which has been too often simplified as an army of occupation for the suppression of Jacobitism Instead Victoria Henshaw reveals the complexities and difficulties experienced by Scottish soldiers of all ranks in the British Army as nationality loyalty and prejudice clouded Scottish desires to use military service to defend the Glorious Revolution and the Union of 1707 *'Servant to The King for His Fortifications:' Paul Ive and The Practise of Fortification* Charles Stephenson,2008 **Suffolk's Defended Shore** Cain Hegarty,Sarah Newsome,2014-06-30 Suffolk s Defended Shore presents an illustrated history of the development of military defences on the Suffolk coast using data collected as part of the English Heritage national survey The survey involved the examination of both modern and historic aerial photographs which led to the creation of a detailed map of the archaeological remains on the county s coast The results of the survey are dominated by evidence for the military defence of the coast reflecting the importance of the Suffolk coast in national defence strategies over many years Extensively illustrated this book highlights the particular importance of historic aerial photographs which provide a different and unique perspective on the coastal defences constructed in World War II Photographs taken during and immediately after this war sometimes provide the only visual record of the rapidly evolving defences from this period **Novelty and Change** Charles Singleton,2024-08-25 The 2023 Century of the Soldier Conference discusses Novelty and Change through diverse papers on overlooked research impacted by the pandemic The 2023 Century of the Soldier Conference was held at the University of Worcester on the banks of the River Severn in the historic city of Worcester The theme of the conference was Novelty and Change and had a range of papers covering a variety

of topics The conference focused on new research and ideas that in some cases might have been overlooked in the disruption caused by the global coronavirus pandemic

**'The Furie of the Ordnance'** Stephen Bull, 2008 Shows how new developments in guns and artillery played a decisive role in the English Civil War NEW LOW PRICE The English Civil War has frequently been depicted as a struggle between Cavaliers and Roundheads in which technology played little part The first hand sources now tell us that this romantic picture is deeply flawed revealing a reality of gunpowder artillery and a grinding struggle of siege and starvation As with naval warfare developments in gun technology drastically changed land warfare in the years leading up to 1642 The Civil War was itself shaped largely by the availability of munitions A failure to procure them in 1643 and 1644 combined with abortive attempts on London ultimately proved the downfall of the Royalists Moreover a final move away from fortified local garrisons reshaped both the nature of warfare in England and the country itself STEPHEN BULL is Curator of Military History and Archaeology Lancashire Museums

**Castle to Fortress** J. E. Kaufmann, H. W. Kaufmann, 2019-07-30 The authors of *Castrum to Castle* trace the evolution of defensive architecture at the turn of the late Middle Ages and the beginning of the Renaissance Old Barbed Wire Blog Across western Europe the long tradition of castle building took on its most sophisticated form in the later Medieval period and then in response to the development of gunpowder weapons it underwent a fundamental change from castle to fortress This the second volume of a highly illustrated new study of medieval fortification gives a fascinating insight into the last great age of castles and the centuries of violence and conflict they were part of It traces the advances made between the twelfth and the fifteenth centuries looking in particular at the form these fortifications took in contexts as different as Italy Wales France and the Iberian Peninsula Many would regard this period in the history of castles as the classic age It was followed by a phase of relative decline as the conditions of warfare changed and castles had to be adapted to cope with cannon The conventional castle gave way to new styles of fortification But as the authors demonstrate they were still essential factors in military calculations and campaigns they were of direct strategic and tactical importance wherever there was an attempt to take or hold territory A fascinating treatise on the way such buildings were modified to provide protection from growing threats Books Monthly

*Reader's Guide to Military History* Charles Messenger, 2013-10-31 This book contains some 600 entries on a range of topics from ancient Chinese warfare to late 20th century intervention operations Designed for a wide variety of users it encompasses general reviews of aspects of military organization and science as well as specific wars and conflicts The book examines naval and air warfare as well as significant individuals including commanders theorists and war leaders Each entry includes a listing of additional publications on the topic accompanied by an article discussing these publications with reference to their particular emphases strengths and limitations

**Towers of Strength** W. H. Clements, 1998-08-12 Martello towers were built in the early part of the nineteenth century to defend the coast of England against Napoleonic invasion Almost 200 years later forty one of these handsome brick towers still stand along the coast of Kent Sussex Essex and Suffolk The chest of their

construction was comparable in relative terms to that of today's Trident missile system. The line of towers was never tested in action but acted as an effective deterrent against invasion. Today Martello towers are a familiar sight from Aldeburgh in Suffolk to Newhaven in Sussex but it is generally known that similar towers were built by the Royal Engineers to defend British interests in other parts of the world. Martello towers were being built as late as the 1850s as far afield as Canada, Mauritius, Australia and the Mediterranean. This book, illustrated with numerous photographs and plans, is the first comprehensive and detailed study of the known Martello towers built by the British. Its description of their construction, use, current condition and fate will fascinate the enquiring reader as well as being a source of interest to visitors. Many of the towers remain landmarks today, Fort Denison in Sydney Harbour being a case in point.

**The Dreadful Monster and its Poor Relations** Julian Hoppit, 2021-05-27. An invaluable primer to some of the underlying tensions behind contemporary political debate. Financial Times. It has always been an important part of British self-image to see the United Kingdom as an ancient, organic and sensibly managed place in striking contrast to the convulsions of other European countries. Yet as Julian Hoppit makes clear in this fascinating and surprising book, beneath the complacent surface the United Kingdom has in fact been in a constant, often very tense, argument with itself about how it should be run and most significantly, who should pay for what. The book takes its argument from an eighteenth-century cartoon which shows the central state as the Dreadful Monster gorging itself at the dinner table on all the taxes it can grab. Meanwhile the Poor Relations, Scotland, Wales and Ireland, both poor because of tax but also poor in the sense of needing special treatment, are viewed in London as an endless drain on the state. With drastically different levels of prosperity, population, industry, agriculture and accessibility between the United Kingdom's different nations, what is a fair basis for paying for the state?
